FIRMWARE

Step 1: Obtain an updated firmware image file from your ISP.

Step 2: Enter the path to the image file location in the box below or click the "Browse" button to locate the image file.

Step 3: Click the "Update Firmware" button once to upload the new image file.

NOTE: The update process takes about 2 minutes to complete, and your DSL Router will reboot. Please DO NOT power off your router before the update is complete.

Update Firmware

Helpful Hints...

Please Note: As firmware is often released to correct a specific issue, it is recommended that there is no need to update your firmware if you are not experiencing any technical concerns or difficulties in the operation of your product.
