DDNS

This page allows you to add a Dynamic DNS address.

The Dynamic DNS service allows you to alias a dynamic IP address to a static hostname in any of the many domains, allowing your DSL router to be more easily accessed from various locations on the Internet.

Choose Add or Remove to configure Dynamic DNS.

DYNAMIC DNS

	Hostname	Username	Service	Interface

Add Edit Delete

ADD DYNAMIC DNS

D-DNS provider : dlinkddns.com(Free)

Hostname :

Interface : pppoa_8_35_1/ppp_0_8_35_1

Username :

Password :

Apply Cancel

Helpful Hints...

DDNS - This stands for Dynamic DNS.
By creating a static hostname, users will be able to point to this in order to access a dynamic IP address from anywhere in the world.

Note: In some cases DDNS service require you to open the WAN http service in **Maintenance -> Access Control -> Services.**
