

# D-Link Earns Microsoft's Xbox™ Compatibility Logo for Routers

- *Two D-Link Routers Receive Compatibility Logos from Microsoft for the Xbox™ Video Game System*

**Sydney, April 14, 2003** - D-Link, a worldwide leader in design, development, and manufacturing of networking, broadband, wireless, and communications technologies, today announced that two D-Link routers have passed the test for Microsoft logo compatibility with Xbox Live™ and the Xbox™ video game system from Microsoft. The NEW D-Link DI-604 4-Port Broadband Router and the already successful D-Link DI-614+ AirPlus Enhanced Wireless Broadband Router have been tested extensively with Xbox Live and meet the highest standard of quality according to Microsoft, who has awarded the Xbox Home Router Compatibility Logo to both routers.

"Earning the Xbox Live Compatibility Logo from Microsoft is great and it underscores our commitment to the Xbox and the gaming community at large," said Maurice Famularo, marketing manager D-Link Australia & New Zealand. "The DI-604 and the DI-614+ are excellent performance and protection choices for gamers who want to have a fast, reliable and satisfying experience while playing on Xbox Live."

"Coupled with the DWL-810+ Ethernet to 22Mbps Wireless LAN Client Adapter, gamers can also further enhance their experience by going wireless", says Famularo. The DWL-810+ basically converts any standard Ethernet port into a wireless connection.

Both the D-Link DI-604 4-Port Broadband Router and the D-Link AirPlus Enhanced Wireless DI-614+ Broadband Router provide the latest in technology and features important to online gamers accessing Xbox Live while remaining affordable and easy to install and use. The D-Link DI-604 is an award-winning platform packed with advanced router and firewall features at an unbeatable price. Both routers provide a high-speed solution for online gamers accessing Xbox Live using an Ethernet connection, allowing the maximum frame-rate possible and less dropped connections, keeping the gamer immersed in Xbox Live.

## About D-Link

### **True Networking Pioneer and Hardware Manufacturer Since 1986.**

D-Link is a worldwide leader and award-winning designer, developer, and true manufacturer of networking, broadband, digital electronics, and voice and data communications solutions for the digital home, Small Office/Home Office (SOHO), Small to Medium Business (SMB), and Workgroup to Enterprise environments. With global manufacturing International Standards Organization ISO 9001, 9002, ISO 14001 Certifications and numerous National Technical Excellence awards earned for R&D and manufacturing, D-Link delivers product excellence, quality, reliability, compatibility, high-performance within standards, and easy installation software, educational materials, and manuals.

The company has increased its world-class production capacity to more than a million square feet of manufacturing facilities in six state-of-the-art factories in four countries -- Taiwan, China, India, and the United States. With millions of Ethernet adapters and millions of hub and switch ports manufactured and shipped, D-Link is a dominant market participant and price/performance leader in the network and communications market. D-Link has been profitable every year since its inception in 1986, and continues to grow at a rate that will allow the Company to experience continued prosperity, D-Link sets the standards for market affordability, while focusing on "Building Networks for People."
