

PRESS ANNOUNCEMENT For Immediate Release

D-LINK SHIPS AFFORDABLE HIGH-SPEED ADSL2+ MODEM ROUTER

With integrated firewall protection and Quality of Service, D-Link's DSL-526B provides all the essentials to establish a secure high-speed broadband connection

SYDNEY, Aust. – April 27, 2010 – D-Link Australia & New Zealand, the end-to-end networking solutions provider for business and consumers, today introduced the DSL-526B ADSL2+ Modem Router, an affordable high-performance ADSL2+ broadband networking solution for homes and small offices.

With integrated ADSL2/2+ supporting up to 24Mbps download speed and 2Mbps upstream, firewall protection and Quality of Service (QoS), this modem router provides all the essential features that a home or small office needs to establish a secure and high-speed remote link to the outside world.

"The new D-Link DSL-526B is an easy and affordable way to create a high-speed broadband connection to watch TV and listen to live music on the Internet, play games and experience clear voice over IP (VoIP) phone calls," said Maurice Famularo, Marketing Director for D-Link Australia and New Zealand.

This ADSL2+ Combo Modem Router – supporting both Ethernet and USB downstream connections – connects a computer to the Internet using an integrated high-speed ADSL2+ interface. When needed, multiple computers at home and the office can also share the high-speed Internet line using the router's built-in DHCP server and NAT functions via an externally connected Ethernet switch.

The DSL-526B's security features prevent unauthorised access to the network from Internet intruders. The modem router provides firewall security using Stateful Packet Inspection (SPI) and Denial of Service attack protection. SPI inspects the contents of all incoming packet headers before deciding what packets are allowed to pass through. Router access control is provided with packet filtering based on port number and MAC/IP addresses.

For Quality of Service (QoS), the router supports multiple priority queues to enable a group of home or office users to experience the benefit of smooth network connection of inbound and outbound data without concern of traffic congestion. This QoS support allows users to enjoy high ADSL transmission for applications such as VoIP, streaming multimedia and online gaming.

Price and Availability

The D-Link DSL-526B ADSL2+ Combo Modem Router is available now with recommended retail prices of AU\$79.95 inc. GST and NZ\$110 inc. GST.

For more information, see D-Link's websites at www.dlink.com.au and www.dlink.co.nz.

END OF ANNOUNCEMENT

About D-Link

D-Link is the global leader in connectivity for small, medium and large enterprise business networking. The company is an award-winning designer, developer and manufacturer of networking, broadband, digital electronics, voice, data and video communications solutions for the digital home, Small Office/Home Office (SOHO), Small to Medium Business (SMB), and Workgroup to Enterprise environments. With millions of networking and connectivity products manufactured and shipped, D-Link is a dominant market participant and price/performance leader in the networking and communications market.
