D-LINK DFL-260E NETDEFEND UTM FIREWALL FOR SMB BLOCKS VIRUSES, HACKERS AND HARMFUL CONTENT

Intrusion Protection System and Web Content Filtering constantly updated by D-Link's global sensor grid with Kaspersky Labs providing anti-virus signatures

SYDNEY, Aust. – August 8, 2011 – D-Link Australia & New Zealand, the end-to-end networking solutions provider for business and consumers, today introduced the DFL-260E NetDefend™ Unified Threat Management (UTM) Firewall, providing small to mid-sized businesses with comprehensive defence against virus attacks, unauthorised intrusions and harmful content.

The DFL-260E is the latest addition to D-Link's NetDefend UTM Firewall family designed to protect small to mid-sized businesses (SMBs) from a wide variety of network threats. It includes the same comprehensive security features as the DFL-860E NetDefend™ UTM Firewall released earlier this year but with capacities and pricing to suit smaller businesses.

The new UTM firewall provides integrated policy-based routing, Network Address Translation, Virtual Private Network (VPN), proactive network security, Intrusion Prevention System (IPS), Web Content Filtering, Anti-Virus Protection, traffic load balancing and bandwidth management in one rack-mountable chassis.

The firewall's hardware is designed to increase performance, and a web surfing control database contains millions of URLs for Web Content Filtering. Real-time IPS, anti-virus and URL database update services protect the network from application exploits, network worms, malicious code attacks, and provide everything needed to manage employee Internet access behaviour.

The DFL-260E's network management features include Remote Management, Bandwidth Control Policies, URL/Keyword Blocking, Access Policies and SNMP. For network monitoring, the firewall supports e-mail alerts, system log, consistency checks and real-time statistics.

Maintaining an effective defence requires that all three databases used by the UTM firewall are kept up to date. To provide a robust defence, D-Link offers optional 12-month NetDefend Firewall UTM Services subscriptions which include distinct NetDefend service updates for IPS, Anti-Virus and Web Content Filtering (free three-month trials are also available).

Price and Availability

The D-Link DFL-260E NetDefend™ UTM Firewall is available now with recommended retail prices of AU$625 inc. GST and NZ$874 inc. GST. 12-month IPS, Anti-Virus or Web Content Filtering update subscriptions are available for AU$255 inc. GST and NZ$356 inc. GST each.

For more information, see D-Link's websites at www.dlink.com.au and www.dlink.co.nz and the NetDefend Centre at http://security.dlink.com.tw.

END OF ANNOUNCEMENT

About D-Link

D-Link is the global leader in connectivity for small, medium and large enterprise business networking. The company is an award-winning designer, developer and manufacturer of networking, broadband, digital electronics, voice, data and video communications solutions for the digital home, Small Office/Home Office (SOHO), Small to Medium Business (SMB), and Workgroup to Enterprise environments. With millions of networking and connectivity products manufactured and shipped, D-Link is a dominant market participant and price/performance leader in the networking and communications market.

D-Link Australia and New Zealand headquarters are located at Building A, Level 3, 11 Talavera Road, North Ryde, NSW, 2113, Sydney Australia. Phone (02) 8899 1800; Fax (02) 8899 1868; Internet www.dlink.com.au / www.dlink.co.nz; email marketing@dlink.com.au.
