

D-LINK ANNOUNCES OUTDOOR BUSINESS-CLASS 802.11G WIRELESS ACCESS POINT

Sydney and Auckland Sept 7, 2004 —D-Link today introduced the *AirPremier* DWL-2700AP, a rugged business-class outdoor 802.11g access point that delivers point-to-point and multi-point connectivity up to 500 meters. With extensive management capability, the DWL-2700AP complies with 802.1x user-based authentication and supports WPA, as well as the recently ratified 802.11i security standard. The D-Link DWL-2700AP is enclosed in a sturdy watertight die-cast housing with built-in heater and lightning protection to shield against the toughest weather conditions.

"Our new robust outdoor weather-proof access point provides seamless access between remote buildings with the speed and performance IT professionals expect for point-to-point and multi-point installations," said Garen Casey, Wireless Product Manager, D-Link Australia & New Zealand. "The access point performance is exceptional, even under extreme weather conditions"

The D-Link *AirPremier* 802.11g Outdoor Wireless Access Point features Wireless Distribution System (WDS) offering 5 operational modes - Access Point for creating a Wireless Local Area Network (WLAN), Wireless Repeater to extend the range of D-Link *AirPremier* 802.11g wireless LANs by an additional 50% of coverage, AP-to-AP Bridging for wirelessly connecting two networks, Point-to-Multipoint Bridging for wirelessly connecting multiple networks and Wireless Access Point Client Mode for access points that need to be connected as clients. The *AirPremier* AP is fully compatible with all D-Link high-gain outdoor antenna's to extend the range even further for maximum possible coverage.

The D-Link *AirPremier* DWL-2700AP offers robust enterprise-level SNMP management giving network administrators full control of network access and usage. With wireless security features such as IEEE 802.1x user-based authentication, WPA support and support for the 802.11i (AES) security standard, offering the best encryption and wireless security currently available. The *AirPremier* AP supports IEEE 802.3af Power over Ethernet (PoE), providing power to the device over standard twisted-pair Ethernet cables and eliminating the need for an outdoor power source. The outdoor wireless Access Point is easy to manage with the D-Link web-based user interface or via Telnet configuration.

About D-Link

True Networking Pioneer and Hardware Manufacturer Since 1986

D-Link is a worldwide leader and award-winning designer, developer, and true manufacturer of networking, broadband, Wireless, digital electronics, and voice and data communications solutions for the digital home, Small Office/Home Office (SOHO), Small to Medium Business (SMB), and Workgroup to Enterprise environments. With global manufacturing International Standards Organization ISO 9001, 9002, ISO 14001 Certifications and numerous National Technical Excellence awards earned for R&D and manufacturing, D-Link delivers product excellence, quality, reliability, compatibility, high-performance within standards, and easy installation software, educational materials, and manuals.

The company has increased its world-class production capacity to more than a million square feet of manufacturing facilities in six state-of-the-art factories in four countries -- Taiwan, China, India, and the United States. With millions of Ethernet adapters and millions of hub and switch ports manufactured and shipped, D-Link is a dominant market participant and price/performance leader in the network and communications market. D-Link has been profitable every year since its inception in 1986, and continues to grow at a rate that will allow the Company to experience continued prosperity. D-Link sets the standards for market affordability, while focusing on "Building Networks for People."
