

## **D-LINK SHIPS WIRELESS ADSL2+ MODEMS IN REGION**

- **Now Shipping as of Monday 16<sup>th</sup> Aug 04**
- **First to ship Wireless 802.11g ADSL2+ Combo DSLModem/AccessPoint/Router**
- **Over \$1M on back order for this product**

**Sydney and Auckland, Aug 16 , 2004** — D-Link, a worldwide leader in design, development, and manufacturing of networking, broadband, wireless, and communications technologies, today announced plans to introduce and ship ADSL2+ modems as of today.

ADSL2+ is being tipped to become the new standard in ADSL broadband technology. Capable of increasing download speeds from 8Mbps to 24Mbps, ADSL2+ also overcomes distance from the exchange limitations currently being experienced by normal ADSL technology.

First off the rank is the new **DSL-G604T** Wireless High-Speed ADSL Router.

Key Features include

- Built-in ADSL Modem with IP Router
- Up to 54Mbps Wireless LAN Access Point (802.11g and Backward compatible to 802.11b)
- 4-Port 10/100Mbps Switch
- Supports All Major ISPs
- 3 Year Warranty

Firmware inside the DSL-G604T can be upgraded to support new DSL standards, including ADSL2, ADSL2+ and reach-extended ADSL2 (RE-ADSL2), providing better speeds, longer distance coverage, reduced power consumption while maintaining ADSL's always-on functionality. This allows you to take advantages of the higher speeds and functions when the new standards become available, without changing your existing ADSL hardware or installation.

"D-Link is the first to start shipping the new standard capable ADSL modems," said Dean Williams, Broadband Product Manager D-Link Australia & New Zealand.

"We have just a tad over \$1M in backorders waiting to ship to the channel for just the DSL-G604T." said Williams.
