

D-Link's New High-Performance Router Creates High Speed Wireless Network

D-Link Wireless 150 Router Supports Wireless 150 and 802.11n/g/b

SYDNEY, Aust. – July 22, 2009 – D-Link Australia & New Zealand, the end-to-end networking solutions provider for business and consumers, today announced it is shipping the D-Link DIR-600 Wireless 150 Router, allowing users to create a high-speed wireless home network connecting a wide range of wireless devices and standards.

The DIR-600 provides a high speed connection to other Wireless 150 or 802.11n devices and is backward compatible with 802.11g/b. This ensures compatibility with a broad range of wireless devices, supporting the latest high speed wireless standards and older wireless technologies. The DIR-600 also includes four Ethernet ports ready to connect Ethernet-enabled PCs, print servers or other devices – and connect to a broadband modem to wirelessly share a high-speed Internet connection.

"D-Link's new DIR-600 wireless router makes it easy and affordable for users to create a wireless network that supports whatever wireless devices they need to connect, including the latest high-speed wireless standards or older wireless networking technologies," said Maurice Famularo, Marketing Director for D-Link Australia and New Zealand.

With the D-Link Quick Router Setup Wizard, users can set up a wireless network in minutes. The wizard helps install the new hardware, connect to a network, add new devices and configures Internet Service Provider (ISP) settings to quickly establish broadband Internet connectivity. The DIR-600 is Wi-Fi Protected Setup™ (WPS) certified, making it even easier to configure wireless network and enable security.

When it comes to security, the DIR-600 includes a built-in firewall that safeguards the network from harmful attacks. The Stateful Packet Inspection (SPI) firewall analyses network traffic, and includes parental control features that prevent users from viewing inappropriate content. The DIR-600 also supports WEP, WPA and WPA2 encryption to keep network traffic secure.

Price and Availability

The D-Link DIR-600 Wireless 150 Router is available now with recommended retail prices of AU\$99.95 inc. GST and NZ\$125.95 inc. GST.
