D-LINK WIRELESS G BROADBAND VPN ROUTER PROVIDES COMPLETE SOHO NETWORK SOLUTION

D-Link DIR-330 allows small and home offices to create a secure Virtual Private Network with up to 8 remote users, plus broadband, wireless and wired connectivity

SYDNEY, Aust. – March 1, 2010 – D-Link Australia & New Zealand, the end-to-end networking solutions provider for business and consumers, today introduced the DIR-330 Wireless G NetDefend™ Broadband VPN Router with 4-Port Switch, an easy to deploy wireless routing, switching, Virtual Private Network and firewall solution designed specifically for small and home offices.

Providing superior performance in a compact desktop chassis, the new D-Link DIR-330 can create a secure, encrypted Virtual Private Network (VPN) allowing up to eight remote users to access a central network through the Internet simultaneously.

“With small businesses becoming increasingly network dependent, the need to invest in a reliable networking and security solution is crucial,” said Maurice Famularo, Marketing Director, D-Link Australia & New Zealand. “The D-Link DIR-330 offers high return on investment through robust security features, flexible configuration and superb network protection for small and home office networks.”

In addition to VPN functionality, it can be connected to a cable or DSL line to share high-speed Internet access. It also doubles as a 4-port full-duplex 10/100 switch to connect up to 4 Ethernet-enabled devices. The router also functions as a wireless 802.11g/802.11b access point to connect wireless devices to your network.

The DIR-330 encrypts all wireless transmission using WPA™ or WPA2™ to ensure wireless security. It also protects the network from online intruders and potential attacks with Dual Active Firewall protection using Network Address Translation (NAT) and Stateful Packet Inspection (SPI) technologies.

For optimal VPN configuration, the DIR-330 has an integrated VPN Client and Server to support almost any required VPN policy. It can support IPsec, PPTP, and L2TP protocols in Server mode as well as handle pass-through traffic.

Price and Availability

The D-Link DIR-330 Wireless G NetDefend™ Broadband VPN Router with 4-Port Switch is available now with recommended retail prices of AU\$275 inc. GST and NZ\$360 inc. GST.
