Entry-Level D-Link Wireless G Router Includes USB Print Server

Industry Standard Wireless G Networking With Shared USB Printer Support Under AU\$100

SYDNEY, Aust., October 14, 2008 – D-Link, the end-to-end networking solutions provider for business and consumers, today announced it is shipping the DIR-320 Wireless G Router with USB Print Server, a new entry-level wireless G router that includes a USB port for connection to a USB printer for less than AU\$100.

“The DIR-320 provides everything needed by home or small office users who want to share an existing Internet connection and USB printer,” said Maurice Famularo, Marketing Director for D-Link Australia and New Zealand. “It combines the robustness, speed and range of industry standard wireless G networking with a USB shared printer support and it does so far more cost-effectively than purchasing two separate devices.”

The DIR-320 Wireless G Router connects to a broadband modem to wirelessly share a high-speed Internet connection. The 'Guest Zone' function provides a secondary wireless service set identifier (SSID). This means users can set up a second public name for their wireless network which is separate from the main network domain for better security and management.

The D-Link Wireless G Router also includes a built-in firewall to safeguard wireless networks from harmful attacks. Additional security features like MAC address filtering prevents unauthorised network access and parental control features prevent users from viewing inappropriate content. The DIR-320 also supports WPA and WPS encryption for wireless security.

In addition to a USB port supporting connection to a USB printer for sharing on the network, the D-Link Wireless G Router also provides four Ethernet ports to connect Ethernet-enabled PCs, game consoles and other devices to the Internet.

With D-Link's Quick Router Setup Wizard and Wi-Fi Protected Setup (WPS), users can set up a new wireless network in minutes. It configures Internet Service Provider (ISP) settings to quickly establish broadband Internet connectivity and makes it easy to add new wireless devices.

Price and Availability

DIR-320 Wireless G Router with USB Print Server is available now with recommended retail prices of AU\$99.95 inc. GST and NZ\$129.95 inc. GST.

For more information, see D-Link's websites at www.dlink.com.au and www.dlink.co.nz.
