

Multifunction Print Servers: Multifunction Printer Support

- **Scanning and printing** functionality is supported for the printer models listed below.
- **Printing only** (no scanning) functionality is supported for virtually all printers except for host-based (GDI) printers. Unfortunately we do not have a list of all non host-based printers available on the market. Please check with your printer vendor if your printer model is not host-based (DGI) so it can be connected to a print server. The list of printer models successfully tested with the print server is given below.

Scanning and printing:
