WIZARD

The D-Link Wireless Gaming Router™ powered by GameFuel™ technology meets the demands of individuals who demand powerful and reliable performance for the ultimate online gaming experience.

INTERNET CONNECTION SETUP WIZARD

The following Web-based Setup Wizard is designed to assist you in connecting your new D-Link Router to the Internet. This Setup Wizard will guide you through step-by-step instructions on how to get your Internet connection up and running. Click the button below to begin.

Launch Internet Connection Setup Wizard

Note: Before launching these wizards, please make sure you have followed all steps outlined in the Quick Installation Guide included in the package.

MICROSOFT WINDOWS CONNECT NOW WIZARD

The following wizard uses Microsoft's Windows Connect Now technology to automatically configure the wireless settings on your Gateway. Make sure that you have sucessfully run Microsoft's Network Wireless Configuarion Wizard on your computer before using this feature.

Use Windows Connect Now

WIRELESS SECURITY SETUP WIZARD

The following Web-based Setup Wizard is designed to assist you in your wireless network setup. This Setup Wizard will guide you through step-by-step instructions on how to set up your wireless network and how to make it secure.

Launch Wireless Security Setup Wizard

Note: Some changes made using this Setup Wizard may require you to change some settings on your wireless client adapters so

D-Link

WELCOME TO THE D-LINK SETUP WIZARD

This wizard will guide you through a step-by-step process to configure your new D-Link router and connect to the Internet.

- Step 1: Set your Password
- Step 2: Select your Time Zone
- Step 3: Configure your Internet Connection
- Step 4: Save Settings and Connect

Next   **Cancel**

STEP 1: SET YOUR PASSWORD

By default, your new D-Link Router does not have a password configured for administrator access to the Web-based configuration pages. To secure your new networking device, please set and verify a password below:

Password :

Verify Password :

[Prev] [Next] [Cancel]

STEP 2: SELECT YOUR TIME ZONE

Select the appropriate time zone for your location. This information is required to configure the time-based options for the router.

(GMT-08:00) Pacific Time (US/Canada), Tijuana

[Prev] [Next] [Cancel]

GAMERLOUNGE NETWORKING EVOLVED

D-Link

STEP 3: CONFIGURE YOUR INTERNET CONNECTION

Your Internet Connection could not be detected, please select your Internet Service Provider (ISP) from the list below. If your ISP is not listed; select the "Not Listed or Don't Know" option to manually configure your connection.

[Not Listed or Don't Know ▾]

If your Internet Service Provider was not listed or you don't know who it is, please select the Internet connection type below:

○ **DHCP Connection (Dynamic IP Address)**
Choose this if your Internet connection automatically provides you with an IP Address. Most Cable Modems use this type of connection.

○ **Username / Password Connection (PPPoE)**
Choose this option if your Internet connection requires a username and password to get online. Most DSL modems use this connection type of connection.

○ **Username / Password Connection (PPTP)**
Choose this option if your Internet connection requires a username and password to get online. Most DSL modems use this connection type of connection.

○ **Username / Password Connection (L2TP)**
Choose this option if your Internet connection requires a username and password to get online. Most DSL modems use this connection type of connection.

⦿ **Static IP Address Connection**
Choose this option if your Internet Setup Provider provided you with IP Address information that has to be manually configured.

[Prev]   [Next]   [Cancel]

DHCP CONNECTION (DYNAMIC IP ADDRESS)

To set up this connection, please make sure that you are connected to the D-Link Router with the PC that was originally connected to your broadband connection. If you are, then click the Clone MAC button to copy your computer's MAC Address to the D-Link Router.

MAC Address : 00:0C:76:52:7C:40 (optional)

Clone Your PC's MAC Address

Host Name :

Note: You may also need to provide a Host Name. If you do not have or know this information, please contact your ISP.

Prev   Next   Cancel

SETUP COMPLETE!

The Setup Wizard has completed. Click the Connect button to save your settings and reboot the router.

Prev   Cancel   Connect

WIRELESS SECURITY MODE

Security Mode : ◯ None ⦿ WEP ◯ WPA-Personal ◯ WPA-Enterprise

WEP

WEP is the wireless encryption standard. To use it you must enter the same key(s) into the router and the wireless stations. For 64 bit keys you must enter 10 hex digits into each key box. For 128 bit keys you must enter 26 hex digits into each key box. A hex digit is either a number from 0 to 9 or a letter from A to F. For the most secure use of WEP set the authentication type to "Shared Key" when WEP is enabled.

You may also enter any text string into a WEP key box, in which case it will be converted into a hexadecimal key using the ASCII values of the characters. A maximum of 5 text characters can be entered for 64 bit keys, and a maximum of 13 characters for 128 bit keys.

WEP Key Length : 128 bit (26 hex digits) (length applies to all keys)

WEP Key 1 : ●●●●●●●●●●●●●●●●●●●●●●●●●●

WEP Key 2 : ●●●●●●●●●●●●●●●●●●●●●●●●●●

WEP Key 3 : ●●●●●●●●●●●●●●●●●●●●●●●●●●

WEP Key 4 : ●●●●●●●●●●●●●●●●●●●●●●●●●●

Default WEP Key : WEP Key 1
