ErP Power Usage

This device is an Energy Related Product (ErP) with High Network Availability (HiNA), and automatically switches to a power-saving Network Standby mode within 1 minute of no packets being transmitted. It can also be turned off through a power switch to save energy when it is not needed.

Network Standby: 5.5019 watts

Switched Off: 0.0630 watts

Package Contents

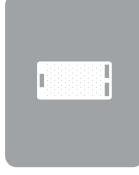

Wireless AC1200 Dual-Band Gigabit ADSL2+/VDSL2 Modem Router (DSL-2885A)

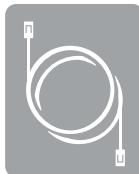

Power Adapter

Ethernet Cable

DSL Microsplitter

Phone Cable

If any of the above items are missing, please contact your reseller.

Note: Using a power supply other than the one included with the DSL-2885A may cause damage and void the warranty for this product.

System Requirements

Network Requirements	<ul style="list-style-type: none">• An active account with an Internet Service Provider using one of the following connection types:<ul style="list-style-type: none">• A VDSL/ADSL connection to a telephone line using the DSL port• A broadband device connected using the WAN port• A mobile broadband 3G/4G/LTE connection using a compatible USB modem. A list of compatible USB dongles is available at www.dlink.com.• 802.11ac/n/g/b/a wireless or Ethernet port
Web-based Configuration Utility Requirements	<p>Computer with the following:</p> <ul style="list-style-type: none">• Windows®, Macintosh, or Linux-based operating system• An installed Ethernet adapter <p>Browser Requirements:</p> <ul style="list-style-type: none">• Internet Explorer 10 or higher• EDGE Browser 20 or higher• Firefox 11 or higher• Safari 5 or higher• Chrome 17 or higher <p>Windows® Users: Make sure you have the latest version of Java installed. Visit www.java.com to download the latest version.</p>

Introduction

The D-Link DSL-2885A Wireless AC1200 Dual-Band Gigabit ADSL2+/VDSL2 Modem Router shares your DSL Internet connection over blazing-fast Wireless AC, and uses advanced AC beamforming technology to maximize the speed and range of your wireless signal to significantly outperform 802.11n and other older, non-beamforming capable 802.11ac devices. It also comes equipped with a Gigabit WAN port, two USB ports, and four Gigabit ports to provide speeds up to 10 times faster than standard 10/100 ports. Multiple WAN ports provide uninterrupted Internet service thanks to failover protection, allowing you to use the DSL port to connect to your VDSL/ADSL service, the WAN port to connect to Ethernet based networks, or a supported mobile broadband USB dongle to connect to the Internet using your mobile provider. With the addition of Advanced Quality of Service (QoS), data streams are separated, which helps organize and prioritize your network traffic so your video streaming, gaming, and VoIP calls run smoother over both your wired and wireless network.

The DSL-2885A is equipped with D-Link AutoZoning, which increases the coverage of your home wireless network. D-Link AutoZoning hand-off technology communicates with your router and other D-Link AutoZoning capable repeaters in your home network to ensure your wireless devices have a seamless connection. As you move around your house D-Link's AutoZoning technology automatically switches wireless devices to the access point, router, or repeater with the strongest signal, so you'll always get the best possible Wi-Fi, no matter where you are in your home.

The DSL-2885A's SharePort technology lets you take advantage of file sharing. Simply plug in a USB storage drive into a USB port on the back or side of your DSL-2885A and you can access files, stream videos, view photos, or listen to music on your laptop or mobile devices.

The DSL-2885A Wireless AC1200 Dual-Band Gigabit ADSL2+/VDSL2 Modem Router provides incredible speeds, smart antenna technology, fast ports, cloud features, and terrific security features. It also features an innovative design and easy installation options.

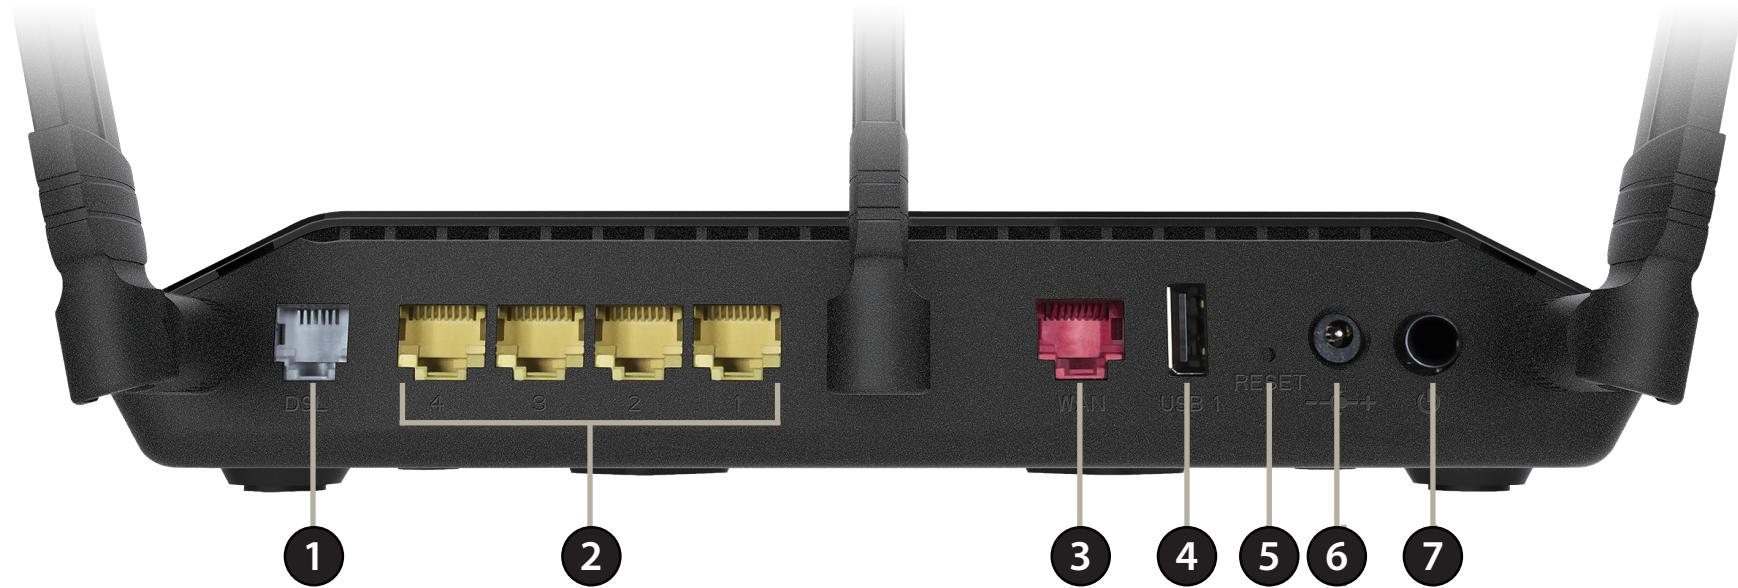

Features

- **Faster Wireless Networking** - The DSL-2885a is dual band capable and equipped with three antennas to provide up to a full 1200 Mbps* for your wireless devices. It operates on both the 2.4 GHz and 5 GHz bands to allow separation of traffic so users can participate in high-bandwidth activities, such as video streaming, online gaming, and real-time audio, without affecting low-priority traffic like email and web surfing.
- **Compatible with 802.11n/g/b/a Devices** - The DSL-2885A is still fully compatible with the 802.11n, 802.11g, and 802.11a standards, so it can connect with existing 802.11n, 802.11g, 802.11b, and 802.11a wireless devices.
- **Advanced Firewall Features** - The web-based user interface displays a number of advanced network management features including:
 - **Content Filtering** - Easily apply content filtering based on MAC address, URL, and/or domain name.
 - **Scheduling** - The firewall, wireless, and port forwarding features can be scheduled to be active on a schedule you define.
 - **Secure Multiple/Concurrent Sessions** - The DSL-2885A can pass through VPN sessions. It supports multiple and concurrent IPSec and PPTP sessions, so users behind the DSL-2885A can securely access corporate networks.
- **User-friendly Setup Wizard** - Through its easy-to-use web-based user interface, the DSL-2885A lets you control what information is accessible to those on the wireless network, whether from the Internet, or from your company's server. Configure your router to your specific settings within minutes.

* Maximum wireless signal rate derived from IEEE Standard 802.11a, 802.11b, 802.11g, 802.11n, and 802.11ac specifications. Actual data throughput will vary. Network conditions and environmental factors, including volume of network traffic, building materials and construction, and network overhead, lower actual data throughput rate. Environmental conditions will adversely affect wireless signal range.

Hardware Overview

Back Panel

1	DSL Port	Connects to an DSL-enabled telephone line and with the supplied microsplitter.
2	Gigabit LAN Ports (1-4)	Connects to Ethernet devices such as computers, switches, storage (NAS) devices and game consoles.
3	Gigabit WAN Port	Connects to Ethernet WAN devices.
4	USB 2.0 Port	Connects to USB flash drives to share content.
5	Reset Button	To reset the device to its factory default settings, use a paper clip to press and hold the reset button for 3 seconds.
6	Power Connector	Connector for the supplied power adapter.
7	Power Button	Press the power button to power the DSL-2885A on and off.

Side Panel

1	USB 2.0 Port	Connect a USB flash drive to share content on your network.
2	WPS Button	Press to start the WPS process and automatically create a secure connection to a WPS client.
3	Wi-Fi Button	Press and hold for 2 seconds to enable or disable Wi-Fi.

Hardware Overview

LEDs

1	Power	Solid Green	A solid green light indicates the device is powered on and working properly.
		Solid Red	A solid red light indicates that the device is booting or an error has occurred.
		Blinking Green	A blinking green light indicates that backup mode is active.
		Blinking Red	A blinking red light indicates that the device is resetting to the factory defaults or that the firmware is being updated.
2	WAN	Solid Blue	A solid blue light indicates an Ethernet WAN port connection.
		Blinking Blue	A blinking blue light indicates Ethernet WAN port activity.
3	LAN Ports 1-4	Solid Blue	A solid blue light indicates a device is connected to the respective LAN port.
		Blinking Blue	A blinking blue light indicates LAN port activity.
4	Wireless 2.4/5G	Solid Green	A solid green light indicates that the 2.4/5 GHz wireless network is enabled.
5	WPS	Blinking Green	A blinking green light indicates the WPS process is active.
6	USB 1-2	Solid Green	A solid green light indicates that a USB device is detected on a USB port.
7	DSL	Solid Green	A solid green light indicates a proper connection to a DSL enabled telephone line.
		Blinking Green	A blinking green light indicates the DSL port is negotiating a connection.
8	Internet	Solid Green	A solid green light indicates an Internet connection.
		Solid Red	A solid red light indicates no Internet connection is available.

Installation

This section will walk you through the installation process. Placement of the router is very important. Do not place the router in an enclosed area such as a closet, cabinet, attic, or garage.

Note: This installation section is written for users who are setting up their home Internet service with the DSL-2885A Wireless AC1200 Dual-Band Gigabit ADSL2+/VDSL2 Modem Router for the first time. If you are replacing an existing DSL modem and/or router, you may need to modify these steps.

Before you Begin

- Make sure to have your DSL service information provided by your Internet Service Provider handy. This information is likely to include your DSL account's Username and Password. Your ISP may also supply you with additional WAN configuration settings which are necessary to establish a connection. This information may include the connection type (DHCP IP, Static IP, PPPoE, or PPPoA) and/or ATM PVC details.
- If you are connecting a considerable amount of networking equipment, it may be a good idea to take the time to label each cable or take a picture of your existing setup before making any changes.
- We suggest setting up your DSL-2885A from a single device and verifying that it is connected to the Internet before connecting additional devices.
- If you have DSL and are connecting via PPPoE, make sure you disable or uninstall any PPPoE connection software such as WinPoET, BroadJump, or EnterNet 300 from your computer as the DSL-2885A will be providing this functionality.

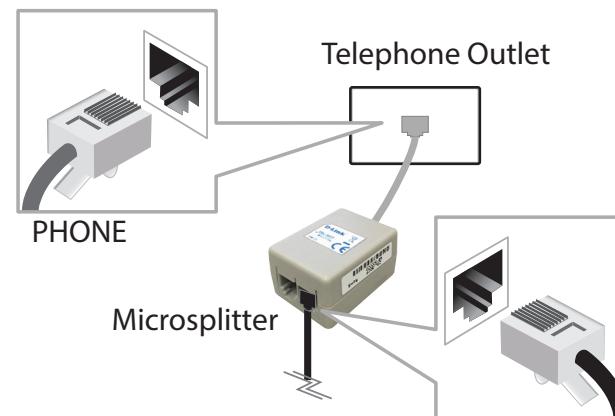

Wireless Installation Considerations

The D-Link wireless router lets you access your network using a wireless connection from virtually anywhere within the operating range of your wireless network. Keep in mind that the number, thickness and location of walls, ceilings, or other objects that the wireless signals must pass through may limit the range. Typical ranges vary depending on the types of materials and background RF (radio frequency) noise in your home or business. The key to maximizing wireless range is to follow these basic guidelines:

1. Keep the number of walls and ceilings between the D-Link router and other network devices to a minimum - each wall or ceiling can reduce your adapter's range from 3-90 feet (1-30 meters.) Position your devices so that the number of walls or ceilings is minimized.
2. Be aware of the direct line between network devices. A wall that is 1.5 feet thick (0.5 meters), at a 45-degree angle appears to be almost 3 feet (1 meter) thick. At a 2-degree angle it looks over 42 feet (14 meters) thick! Position devices so that the signal will travel straight through a wall or ceiling (instead of at an angle) for better reception.
3. Building materials make a difference. A solid metal door or aluminum studs may have a negative effect on range. Try to position access points, wireless routers, and computers so that the signal passes through drywall or open doorways. Materials and objects such as glass, steel, metal, walls with insulation, water (fish tanks), mirrors, file cabinets, brick, and concrete will degrade your wireless signal.
4. Keep your product away (at least 3-6 feet or 1-2 meters) from electrical devices or appliances that generate RF noise.
5. If you are using 2.4 GHz cordless phones or X-10 (wireless products such as ceiling fans, lights, and home security systems), your wireless connection may degrade dramatically or drop completely. Make sure your 2.4 GHz phone base is as far away from your wireless devices as possible. The base transmits a signal even if the phone is not in use.

Manual Setup

- 1 Connect the supplied microsplitter to the telephone outlet. If you are using a telephone handset on the same outlet, connect it to the PHONE port on the microsplitter.

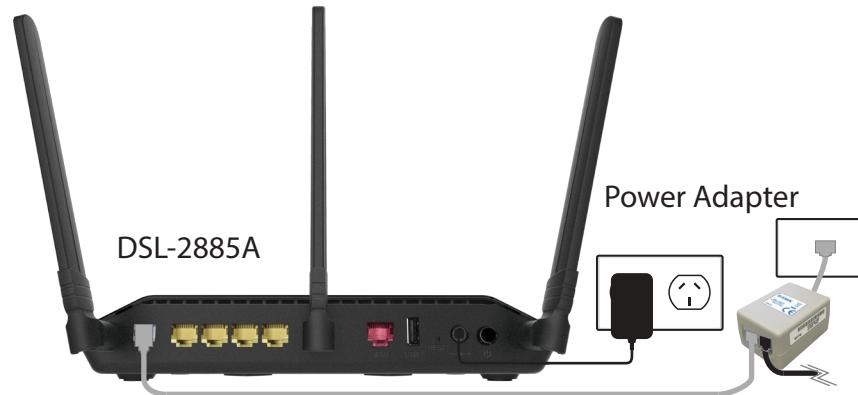

- 2 Connect the phone cable from the DSL port on the microsplitter to the DSL port of the DSL-2885A.

Caution: To reduce the risk of fire, use only No. 26 AWG or larger telecommunication line cord.

- 3** Plug the power adapter into your modem router and connect to an available power outlet or surge protector.

Caution: Use only the included power adapter with this product.

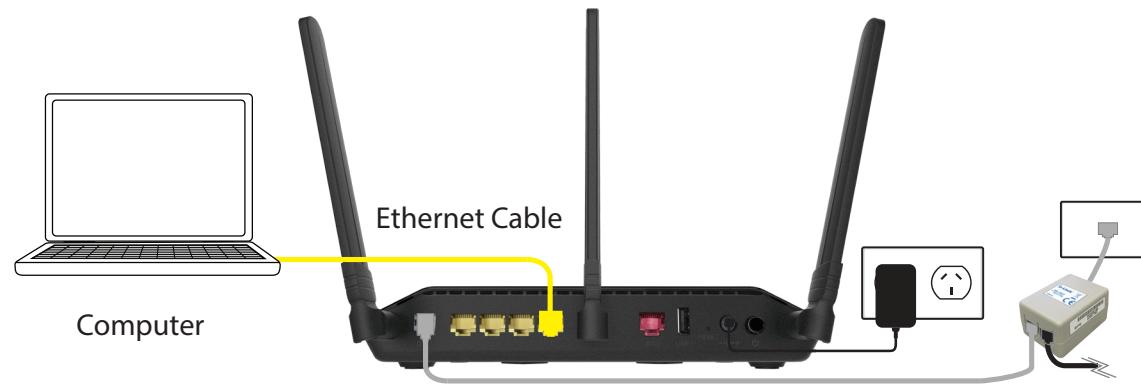

- 4** Press the power button and verify that the power LED is lit. Allow one minute for the DSL-2885A to boot up. After it has powered up, verify that the Power and DSL LEDs are both lit.

5

- If you wish to use a wired connection, connect the Ethernet cable from a LAN port of the DSL-2885A to the Ethernet port on your computer.

6

- If you wish to use a wireless connection, the default Wi-Fi Networks are *dlink-2885A-z* and *dlink-2885A5G-z*. Select either one from your computer's wireless utility and connect. Enter the default Wi-Fi password printed on the product label on the bottom of the DSL-2885A.

Getting Started

There are two ways you can configure your router to connect to the Internet and connect to your clients:

- **D-Link Setup Wizard** - This wizard will launch when you log into the router for the first time. Refer to **Setup Wizard on page 14**.
- **Manual Setup** - Log into the router and manually configure your router. Refer to **Configuration on page 19**.

Setup Wizard

If this is your first time installing the router, open your web browser and enter **http://dlinkrouter.local.** in the address bar. Alternatively, enter the IP address of the router (default: **http://192.168.1.1**).

The wizard is designed to guide you through a step-by-step process to configure your new D-Link router and connect to the Internet.

Click **Next** to continue.

A screenshot of the "Welcome" screen of the D-Link Setup Wizard. At the top, there's a teal header bar with the word "Welcome". Below the header, there are three icons: a globe icon labeled "Internet", a four-port Ethernet icon labeled "DSL-2885A", and a smartphone icon labeled "Wi-Fi Client". A descriptive text block below the icons says: "This wizard will guide you through a step-by-step process to configure your new D-Link device." Three numbered steps are listed: "Step 1: Install your device", "Step 2: Configure your Network and Wi-Fi settings", and "Step 3: Set your router password". At the bottom left is a language selection dropdown set to "English" with a downward arrow. At the bottom right is a blue "Next" button.

Ensure that your DSL phone cable is connected to both the router and the wall jack. If you are using an Ethernet WAN connection, connect it now.

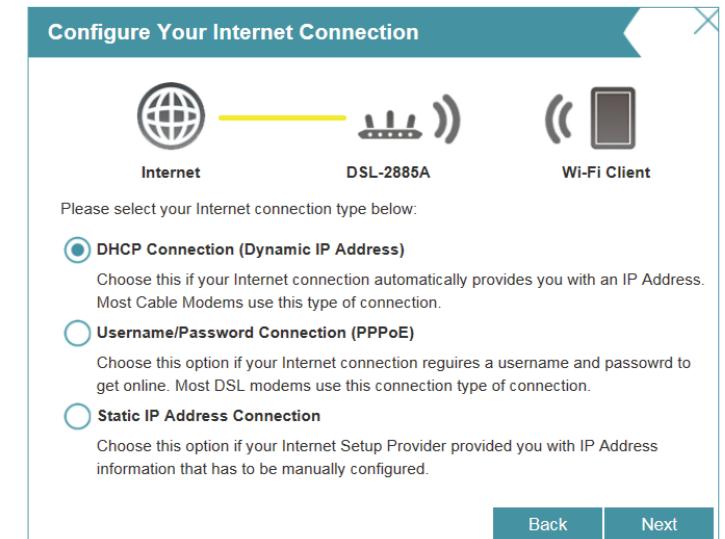

Click **Next** to continue.

A screenshot of the "Install" screen of the D-Link Setup Wizard. The top has a teal header bar with the word "Install". The main content area contains text instructions: "Please plug one end of the grey phone cable included with your device into the port labeled DSL on your device. Plug the other end of this cable into your wall mounted phone jack. If you live in AU or NZ, you will need to connect the microfilter splitter that we supplied to your wall mounted phone jack first. Then connect the grey phone cable to the DSL port on the microfilter splitter." Below the text is a diagram showing a black router labeled "Your Device" with a yellow cable labeled "DSL" connected to a white wall outlet. At the bottom are three buttons: "Skip Wan Settings", "Back", and "Next".

Setup Wizard (continued)

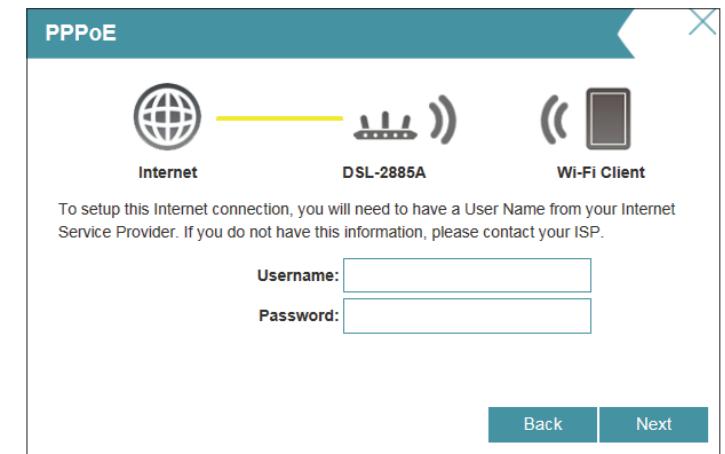

If the router does not detect a valid Internet connection, a list of connection types to choose from will be displayed.

Select your Internet connection type (this information can be obtained from your Internet Service Provider) and click **Next** to continue.

If the router detected or you selected **PPPoE**, enter your PPPoE username and password and click **Next** to continue.

Note: Make sure to remove your PPPoE software from your computer. The software is no longer needed and will not work through a router.

Setup Wizard (continued)

If the router detected or you selected **Static IP**, enter the static IP and DNS settings supplied by your ISP. Click **Next** to continue.

The Static IP setup screen shows a network diagram at the top with three nodes: 'Internet' (represented by a globe icon), 'DSL-2885A' (represented by a router icon), and 'Wi-Fi Client' (represented by a smartphone icon). A yellow line connects 'Internet' to 'DSL-2885A', and another line connects 'DSL-2885A' to 'Wi-Fi Client'. Below the diagram, text instructs the user to have IP information from their ISP if they chose a Static IP connection. It includes five input fields for IP Address, Subnet Mask, Gateway Address, Primary DNS Address, and Secondary DNS Address. At the bottom are 'Back' and 'Next' buttons.

Static IP

Internet ————— DSL-2885A ————— Wi-Fi Client

To set up this connection you will need to have a complete list of IP information by your Internet Service Provider. If you have a Static IP connection and do not have this information, please contact your ISP.

IP Address:

Subnet Mask:

Gateway Address:

Primary DNS Address:

Secondary DNS Address:

Back Next

Create a Wi-Fi password (between 8-63 characters). Your wireless clients will need to have this passphrase or key entered to be able to connect to your wireless network.

Click **Next** to continue.

The Wi-Fi Settings screen shows a network diagram at the top with three nodes: 'Internet' (globe icon), 'DSL-2885A' (router icon), and 'Wi-Fi Client' (smartphone icon). A yellow line connects 'Internet' to 'DSL-2885A', and another line connects 'DSL-2885A' to 'Wi-Fi Client'. Below the diagram, text instructs the user to give their Wi-Fi network a name (SSID) and password. It includes two input fields for 2.4GHz and 5GHz Wi-Fi Network Names, both pre-filled with 'dlink-2885A-z'. Below this, it says the Network Name can be up to 32 characters. It also includes two input fields for 2.4GHz and 5GHz Wi-Fi Passwords, both pre-filled with 'A_Strong_Password123'. Below this, it says the password must be at least 8 characters. At the bottom are 'Back' and 'Next' buttons.

Wi-Fi Settings

Internet ————— DSL-2885A ————— Wi-Fi Client

To setup a Wi-Fi network you will need to give your Wi-Fi network a name(SSID) and password.

2.4GHz Wi-Fi Network Name: dlink-2885A-z

5GHz Wi-Fi Network Name: dlink-2885A5G-z

The Wi-Fi Network Name is up to 32 characters. You will need to join your Wi-Fi network using this Network Name (SSID).

2.4GHz Wi-Fi Password: A_Strong_Password123

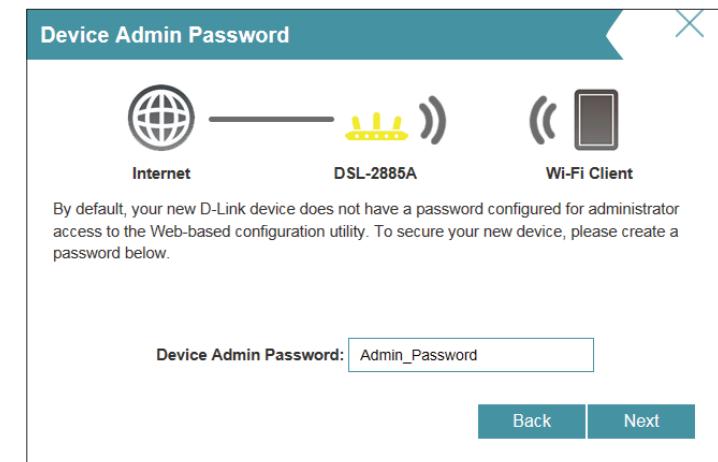

5GHz Wi-Fi Password: A_Strong_Password123

The password must contain at least 8 characters. You will need to join your Wi-Fi network using this password.

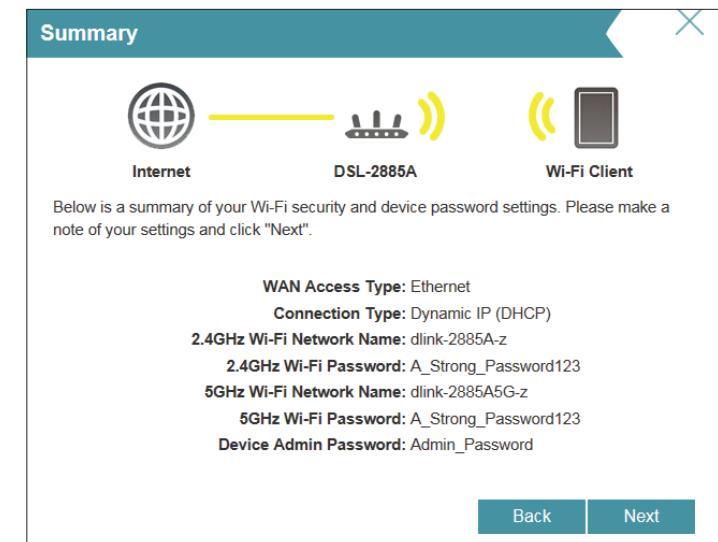

Back Next

Setup Wizard (continued)

In order to secure the router, please enter a new password. You will be prompted for this password every time you want to use the router's web configuration utility. Click **Next** to continue.

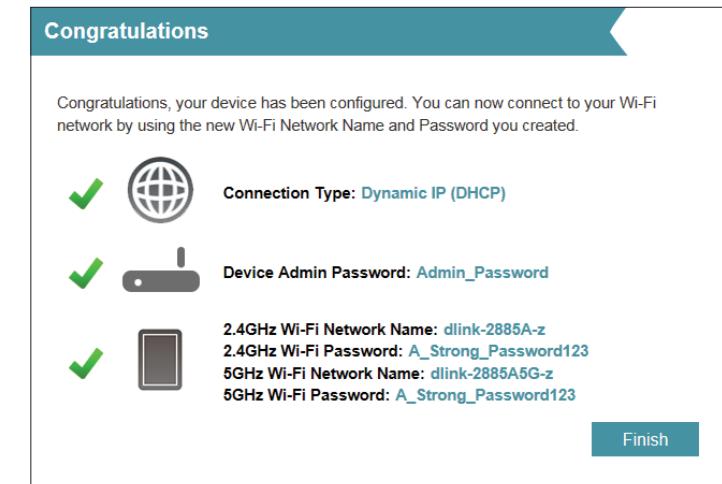

The Summary window will display your settings. Click **Next** if you are satisfied, or click **Back** to make changes to them.

Setup Wizard (continued)

At the end of the wizard, you will be presented with a final summary of your settings. Click **Finish** to close the wizard.

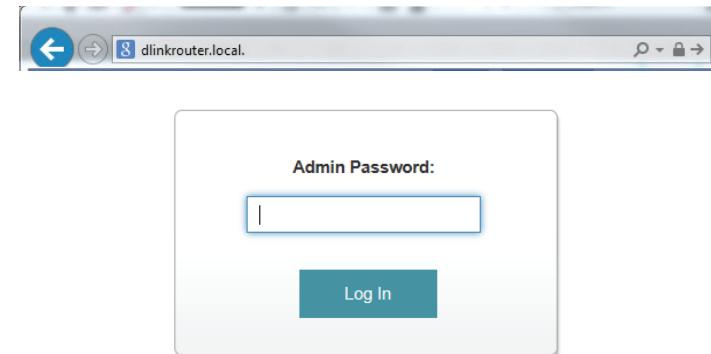

Configuration

To access the configuration utility, open a web-browser such as Internet Explorer and enter **http://dlinkrouter.local./**

Windows and Mac users may also connect by typing the IP address of the router (by default this is **http://192.168.1.1**) in the address bar.

Enter your password. If you previously followed the Setup Wizard (see page 14), please use the admin password you entered during the wizard. Otherwise, leave the password blank. Click **Log In** to proceed.

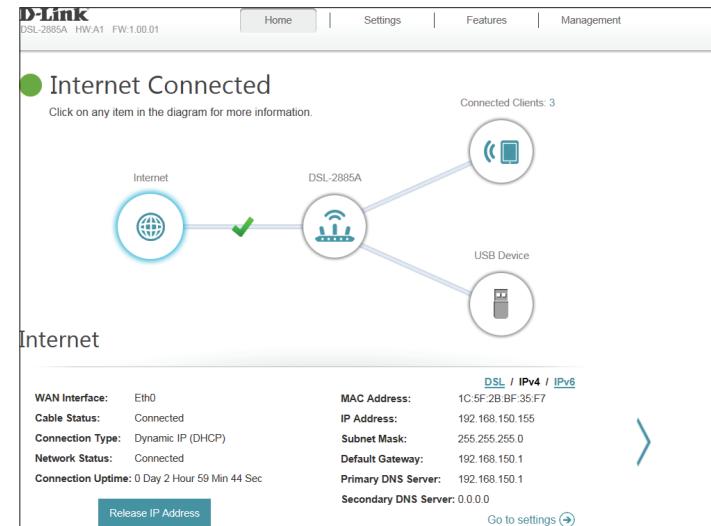

Note: If you cannot remember your password and cannot log in, press the reset button (see page 5) to restore the router to its default settings.

Home

The Home page displays the current status of the router in the form of an interactive diagram. There are four main sections: Internet, DSL-2885A, Connected Clients, and USB Device. You can click each icon to display information about each section at the bottom of the screen. The menu bar at the top of the page will allow you to quickly navigate to the Settings and Management functions. You may quickly jump back Home at any time.

Note: The system will automatically log out after a period of inactivity.

Internet

To bring up more details about your Internet connection, click on the **Internet** icon. You may cycle through the WAN interfaces at the bottom of the page by clicking on the arrows on the left and right sides of the screen. The Internet Connection status at the top of the diagram will reflect the status of the currently selected WAN interface.

If your Internet is disconnected, you can click **Click to repair** to bring up the Setup Wizard.

Note: The Wizard will only configure the VDSL/ADSL and Ethernet WAN connections. Refer to page 14 for more information.

For each of the WAN interfaces, you can see the connection status, IPv4, and IPv6 information. Clicking the DSL button will display DSL port information.

Internet

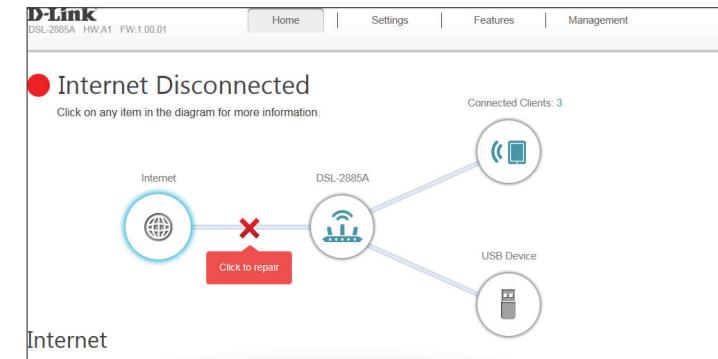

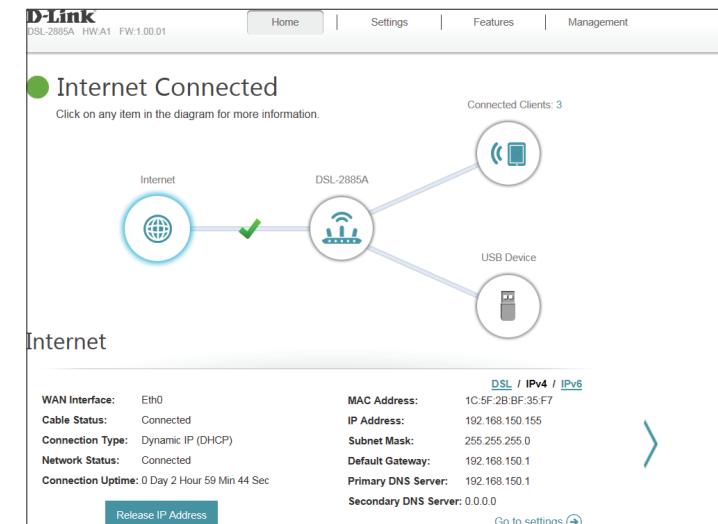

WAN Interface: Displays the currently selected interface: Ethernet, DSL, or USB.

Cable Status: Displays the current cable connection status.

Connection Type: Displays the network protocol used to obtain an IP address.

Network Status: Displays the current network connection status.

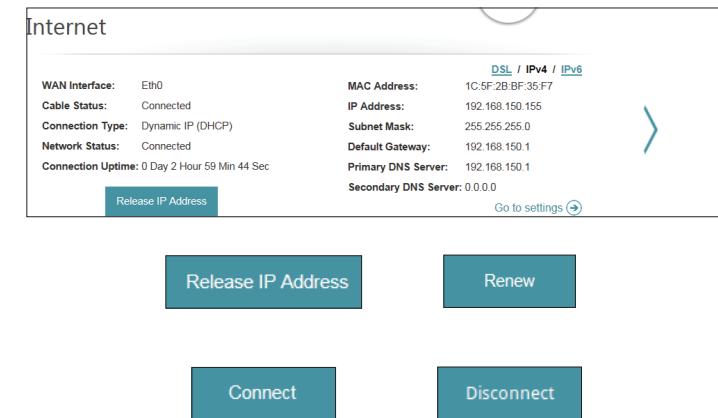

Connection Uptime: Displays the amount of time the connection has been connected.

Internet (continued)

You can manually **Release IP Address** and **Renew** the network addresses associated with each interface by pressing the respective button.

If you have attached a USB mobile broadband adapter or configured your ADSL/VDSL connection to use PPPoE with On-Demand or Manual settings, you can connect to or disconnect from the Internet by pressing the **Connect** or **Disconnect** buttons.

Click the **IPv4** button to see the IPv4 information for the selected interface.

IPv4

MAC Address: Displays the MAC address of this interface.

IP Address: Displays the current WAN IPv4 address.

Subnet Mask: Displays the current subnet mask.

Default Gateway: Displays the current IPv4 default gateway.

Primary DNS Server: Displays the current primary DNS server.

Secondary DNS Server: Displays the current secondary DNS server.

Internet (continued)

Click the **IPv6** button to see the IPv6 information for the selected interface.

IPv6

WAN IPv6 Address: Displays the current WAN IPv6 address.

DSL / IPv4 / IPv6	
WAN IPv6 Address:	Not Available
Default Gateway:	Not Available
Primary DNS Server:	Not Available
Secondary DNS Server:	Not Available
Go to settings 	

Default Gateway: Displays the current IPv6 default gateway.

Primary DNS Server: Displays the current primary DNS server.

Secondary DNS Server: Displays the current secondary DNS server.

Click the **DSL** button to see the DSL port connection information.

DSL

DSL Phy Version: Displays the DSL Phy version.

DSL Phy Version:	v134g113
Cable Status:	Disconnected
DSL Status:	ACTIVATING.
Mode:	0 / 0
Link Power State:	L0

Cable Status: Displays the current cable status.

DSL Status: Displays the current negotiation state of the DSL port.

Mode: Displays the current DSL mode.

Link Power State: Displays the current link power state.

SNR Margin (0.1 db): Displays the current signal to noise ratio.

DSL / IPv4 / IPv6	
UpLink / DownLink	
SNR Margin (0.1 dB):	0 / 0
Attenuation (0.1 dB):	0 / 0

Rate (Kbps):	0 / 0
Go to settings 	

DSL-2885A

Click on the **DSL-2885A** icon to view details about the router and its wireless settings.

Here you can see the router's current wireless networks and passwords, as well as the local area network MAC, IPv4, and IPv6 addresses.

To reconfigure the network settings, click the **Go to settings** link, from the **Settings** menu at the top of the page, select **Network**. Refer to page 51 for more information.

To reconfigure the wireless settings, click the **Go to settings** link, from the **Settings** menu at the top of the page, select **Wireless**. Refer to page 47 for more information.

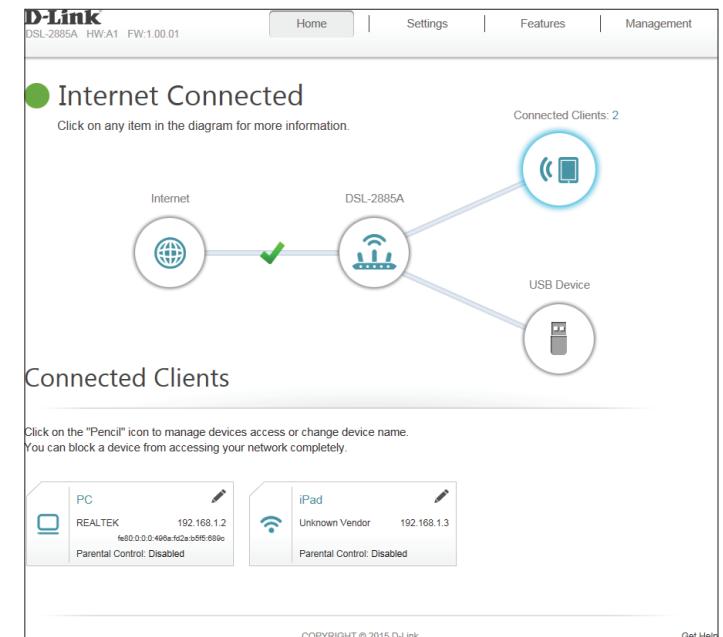

Connected Clients

Click on the **Connected Clients** icon to view details about the router and its wireless settings.

On this page you can see all the clients currently connected to the router, and their IP addresses.

To edit each client's settings, click the pencil icon on the client you want to edit.

Edit Rule

Name: Enter a custom name for this client.

Vendor: Displays the vendor of the device.

MAC Address: Displays the MAC address of the device.

IP Address: Enter a specific IP address for this client if **Reserve IP** is enabled.

Reserve IP: Enable to reserve this IP address for this client.

Parental Control: Allow or Block access to the router.

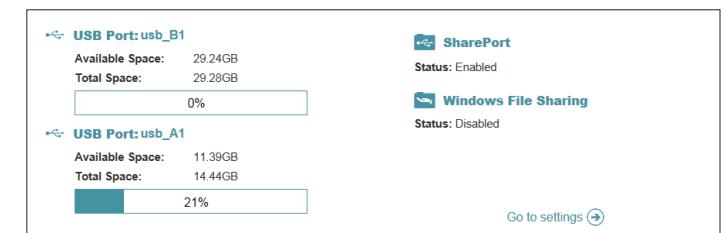

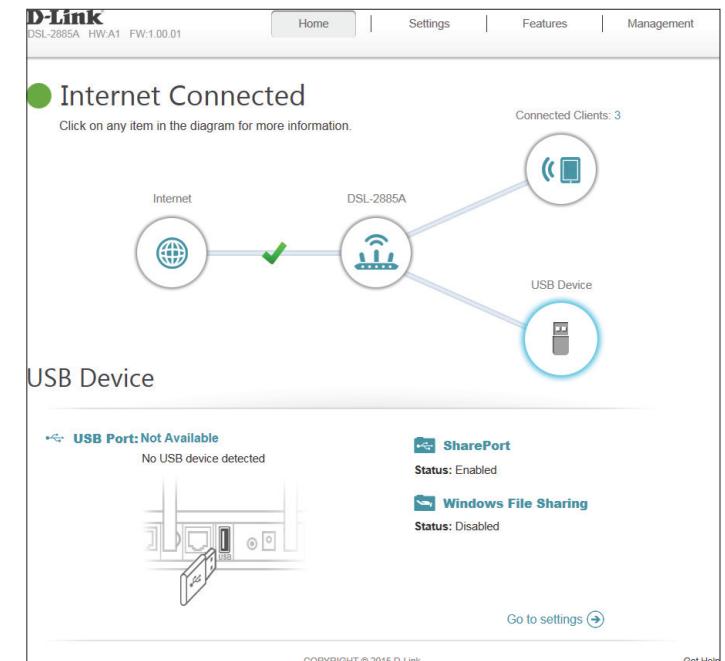

Click **Save** when you are done.

USB Device

Click on the **USB Device** icon to view details about the currently connected USB device, SharePort, and Windows File Sharing.

If you have a USB device connected, you can see its name and how much free space it has.

To configure your SharePort settings, click **Go to settings** and refer to page 54 for more information.

Settings Wizard

In the Settings menu on the bar on the top of the page, click **Wizard** to open the setup wizard. This is the same wizard that appears when you start the router for the first time. Refer to **Setup Wizard on page 14** for more information.

Internet

The following pages will describe how to manually configure how your DSL-2885A connects to the Internet. The DSL-2885A supports multiple WAN connection types and WAN failover. We recommend setting up Internet WAN connections one at a time, **Save** the configuration, and confirm the connection works before returning to this section to add additional WAN connections.

The following configuration pages are divided by WAN Access Type.

WAN Access Type: Select WAN interface to configure. The options are **ADSL**, **VDSL**, **Ethernet**, or **USB**.

Select a WAN interface and refer to its configuration page for setup information.

For ADSL, refer to **ADSL** on page 28.

For VDSL, refer to **VDSL** on page 30.

For Ethernet, refer to **Ethernet** on page 31.

For USB, refer to **USB** on page 32.

ADSL

ADSL is one of the first home broadband technologies introduced. ADSL uses the DSL port on your DSL-2885A to connect to the Internet. In order for your DSL-2885A to use ADSL, you must configure the **ADSL Settings**, your **ISP Settings**, and your **IPv4/IPv6 Settings**.

WAN Access Type: Select **ADSL** to configure ADSL connection settings.

Interface: Select the interface from the drop-down menu. **ATM0-ATM7** are available. The default is **ATM0**. You may enable multiple WAN interfaces to connect to different ADSL WAN networks simultaneously.

Enable Interface: Select whether to enable or disable this interface. Multiple Interfaces may be enabled.

ISP Settings

Country: Select your country.

ISP: Once your country is selected, choose your ISP. A number of ISP configuration settings are pre-programmed into the DSL-2885A for convenience. If your ISP is not listed, or you wish to enter different VPI and VCI values, select **Not Listed**.

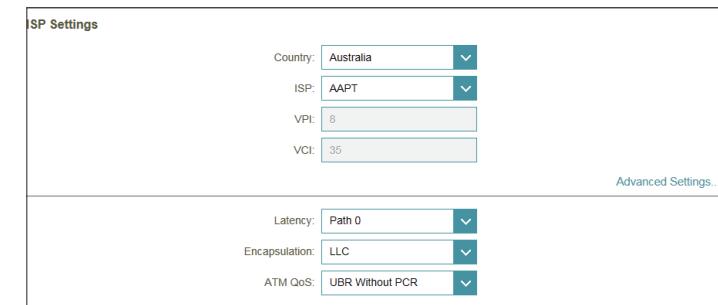

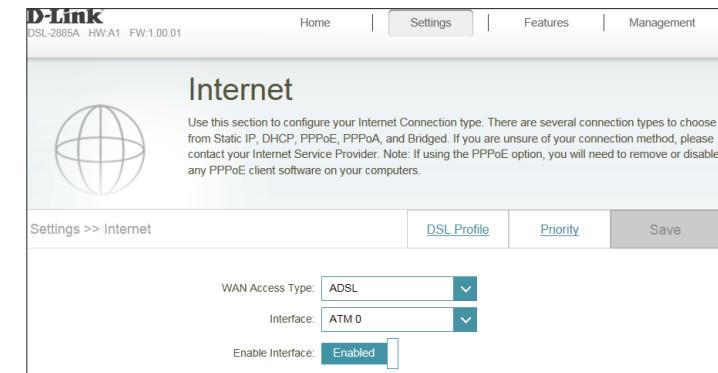

If you selected **Not Listed**, the following options are available:

VPI: Enter the Virtual Path Indicator (0 - 255).

VCI: Enter the Virtual Channel Indicator (32 - 65535).

Advanced Settings

Latency: Select the latency from the drop-down menu.

ADSL (continued)

Encapsulation: Select the method of encapsulation provided by your ISP. You can select **LLC** or **VCMUX**.

ATM QoS: Select the Quality of Service type from the drop-down menu.

Proceed to **IPv4 Settings** on page 33 or **IPv6 Settings** on page 38.

The screenshot shows a configuration interface for ISP settings. It includes fields for Country (Australia), ISP (AAPT), VPI (8), VCI (35), Latency (Path 0), Encapsulation (LLC), and ATM QoS (UBR Without PCR). There is also an 'Advanced Settings...' link.

ISP Settings	
Country:	Australia
ISP:	AAPT
VPI:	8
VCI:	35
Advanced Settings...	
Latency:	Path 0
Encapsulation:	LLC
ATM QoS:	UBR Without PCR

VDSL

VDSL is one of the latest and fastest home broadband technologies. VDSL uses the DSL port on your DSL-2885A to connect to the Internet. In order for your DSL-2885A to use VDSL, you must configure the VDSL Settings, your **ISP Settings**, and your **IPv4/IPv6 Settings**.

WAN Access Type: Select **VDSL** to configure ADSL connection settings.

Interface: Select the interface from the drop-down menu. **PTM0-PTM7** are available. The default is **PTM0**. You may enable multiple WAN interfaces to connect to different VDSL WAN networks simultaneously.

Enable Interface: Select whether to enable or disable this interface. Multiple Interfaces may be enabled.

ISP Settings

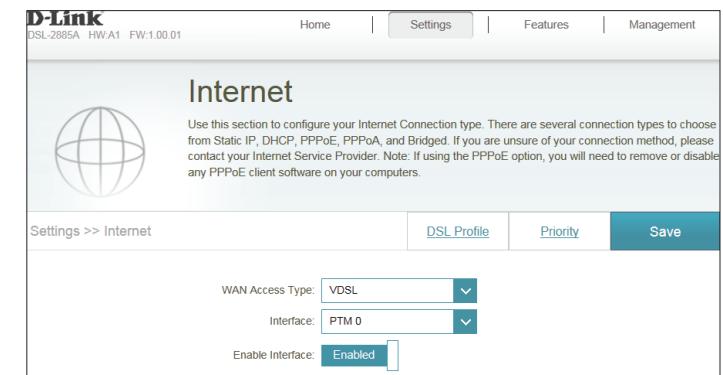

Country: Select your country.

ISP: Once your country is selected, choose your ISP. A number of ISP configuration settings are pre-programmed into the DSL-2885A for convenience. If your ISP is not listed, or you wish to enter different VLAN values, select **Not Listed**.

If you selected **Not Listed**, the following options are available:

VLAN: Enter the VLAN ID. The value should be 0, or 10-4096.

Proceed to **IPv4 Settings** on page 33 or **IPv6 Settings** on page 38.

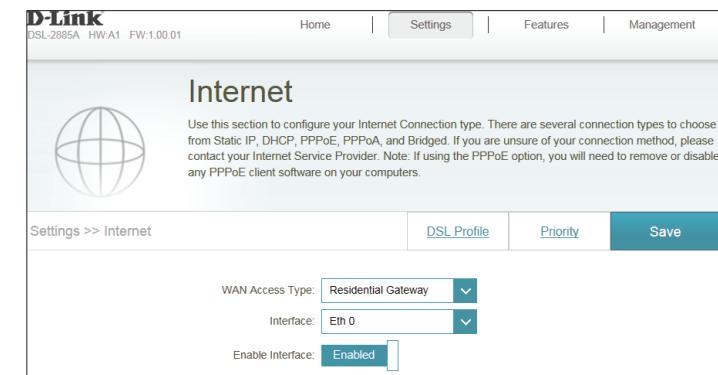

Ethernet

Your DSL-2885A is equipped with a Gigabit Ethernet WAN port to connect to the Internet. This port may be used to connect to other Ethernet based networks. In order for your DSL-2885A to use Ethernet you must configure the Ethernet Settings, **VLAN Settings**, and your **IPv4/IPv6 Settings**.

WAN Access Type: Select **Residential Gateway** to configure ADSL connection settings.

Interface: Select the interface from the drop-down menu. **ETH0-ETH5** are available. The default is **ETH0**. You may enable multiple WAN interfaces to connect to different Ethernet WAN networks simultaneously.

Enable Interface: Select whether to enable or disable this interface.

VLAN Settings

VLAN Tagged: Enable or disable VLAN tagging.

If you enabled **VLAN Tagged**, the following options are available:

VLAN ID: Enter the VLAN ID. The value should be 0, or 10-4096.

VLAN Priority: Enter the VLAN Priority from the default 0 (lowest) to 7 (highest).

The image contains two separate 'VLAN Settings' configuration boxes. The top box has a 'VLAN Tagged' field with a 'Disabled' button. The bottom box has a 'VLAN Tagged' field with an 'Enabled' button, and below it are two input fields: 'VLAN ID' containing '0' and 'VLAN Priority' also containing '0'.

Proceed to **IPv4 Settings** on page 33 or **IPv6 Settings** on page 38.

USB

The DSL-2885A supports USB mobile broadband adapters. You can connect a mobile broadband adapter and share your cellular network connection with your home network. For a list of supported adapters, visit www.dlink.com.

This page provides configuration settings for your USB mobile broadband connection. Refer to your mobile broadband adapter's documentation for setup instructions and ISP for configuration information. In most cases, the process is plug and play and requires no further configuration.

WAN Access Type: Select **USB** to configure USB connection settings.

Interface: Select the interface from the drop-down menu.

Enable Interface: Select whether to enable or disable this interface.

ISP Settings

Country: Select your country.

ISP: Select your ISP. A number of ISP configuration settings are pre-programmed into the DSL-2885A for convenience. If you don't see your ISP or wish to use manual settings, choose **Not Listed**.

PIN Code: Enter your PIN code.

Dial Number: Enter the Dial Number.

APN: Enter the APN.

Username: Enter your username.

Password: Enter your password.

There is no further configuration. Click **Save** when you are done.

The screenshot shows the 'Internet' configuration page of the D-Link DSL-2885A. At the top, there are tabs for Home, Settings (which is selected), Features, and Management. Below the tabs, there is a section titled 'Internet' with a globe icon. A note says: 'Use this section to configure your Internet Connection type. There are several connection types to choose from Static IP, DHCP, PPPoE, PPPoA, and Bridged. If you are unsure of your connection method, please contact your Internet Service Provider. Note: If using the PPPoE option, you will need to remove or disable any PPPoE client software on your computers.' Below this note, there are three buttons: 'DSL Profile', 'Priority' (which is highlighted in blue), and 'Save'. Under the 'Internet' section, there are three dropdown menus: 'WAN Access Type' (set to 'USB'), 'Interface' (set to 'USB 0'), and 'Enable Interface' (set to 'Enabled'). Below these, there is a section for 'ISP Settings' with fields for 'Country' (set to 'New Zealand'), 'ISP' (set to 'Not Listed'), and other fields for PIN Code, Dial Number, APN, Username, and Password, all of which are currently empty.

IPv4 Settings

Dynamic IP (DHCP)

Select **Dynamic IP (DHCP)** to obtain an IP address automatically from your ISP. Select this option if your ISP does not provide you with a specific IP address.

IPv4 Settings:

My Internet Connection is: Select **Dynamic IP (DHCP)**.

The screenshot shows the 'IPv4 Settings' configuration page. At the top, a dropdown menu is set to 'Dynamic IP (DHCP)'. Below it, there are fields for Host Name (set to 'DSL-2885A'), Primary DNS Server (set to '0.0.0.0'), Secondary DNS Server (set to '0.0.0.0'), MTU (set to 'Auto'), Mac Address Clone (with a dropdown arrow), and Enable NAT (set to 'Enabled'). A link 'Advanced Settings...' is visible in the top right corner.

Advanced Settings

Host Name: The host name is optional but may be required by some ISPs. Leave it blank if you are not sure.

Primary DNS Server: Enter the primary DNS server IP address assigned by your ISP. This address is usually obtained automatically from your ISP.

Secondary DNS Server: Enter the secondary DNS server IP address assigned by your ISP. This address is usually obtained automatically from your ISP.

MTU: Maximum Transmission Unit - you may need to change the MTU for optimal performance with your ISP.

MAC Address Clone: The default MAC address is set to the Internet port's physical interface MAC address on the router. You can use the drop-down menu to replace the Internet port's MAC address with the MAC address of a connected client.

Enable NAT: Enable or disable Network Address Translation.

Proceed to **IPv6 Settings** on page 38 or click **Save** when you are done.

Static IP

Select **Static IP** if your ISP provides you with a specific IP address.

IPv4 Settings:

My Internet Connection is: Select **Static IP**.

IP Address: Enter the IP address provided by your ISP.

Subnet Mask: Enter the subnet mask provided by your ISP.

Default Gateway: Enter the default gateway address provided by your ISP.

Primary DNS Server: Enter the primary DNS server IP address assigned by your ISP. This address is usually obtained automatically from your ISP.

Advanced Settings

Secondary DNS Server: Enter the secondary DNS server IP address assigned by your ISP. This address is usually obtained automatically from your ISP.

MTU: Maximum Transmission Unit - you may need to change the MTU for optimal performance with your ISP.

MAC Address Clone: The default MAC address is set to the Internet port's physical interface MAC address on the router. You can use the drop-down menu to replace the Internet port's MAC address with the MAC address of a connected client.

Enable NAT: Enable or disable Network Address Translation.

Proceed to **IPv6 Settings** on page 38 or click **Save** when you are done.

The screenshot displays the 'IPv4 Settings' configuration page. At the top, it says 'My Internet Connection is: Static IP (Static)'. Below are fields for 'IP Address', 'Subnet Mask', 'Default Gateway', and 'Primary DNS Server'. In the middle section, there are fields for 'Secondary DNS Server', 'MTU' (set to 'Auto'), 'Mac Address Clone' (disabled), and 'Enable NAT' (enabled). A 'Advanced Settings' link is located at the bottom right of the main form area.

PPPoE

Select **PPPoE** if your ISP provides and requires you to enter a PPPoE username and password in order to connect to the Internet.

IPv4 Settings:

My Internet Select **PPPoE**.

Connection is:

Username: Enter the username provided by your ISP.

Password: Enter the password provided by your ISP.

Reconnect Mode: Select either **Always-on**, **On-Demand**, or **Manual**.

Advanced Settings

Address Mode: Select **Static IP** if your ISP assigned you an IP address, subnet mask, gateway, and DNS server addresses. In most cases, select **Dynamic IP**.

IP Address: Enter the IP address provided by your ISP. **Static IP** only.

Service Name: Enter the ISP service name (optional).

Primary DNS Server: Enter the primary DNS server IP address assigned by your ISP. This address is usually obtained automatically from your ISP.

Secondary DNS Server: Enter the secondary DNS server IP address assigned by your ISP. This address is usually obtained automatically from your ISP.

MTU: Maximum Transmission Unit - you may need to change the MTU for optimal performance with your ISP.

Enable NAT: Enable or disable Network Address Translation.

The screenshot shows the 'IPv4 Settings' section of a network configuration interface. At the top, 'My Internet Connection Is:' is set to 'PPPoE'. Below it are fields for 'Username' and 'Password', and a dropdown for 'Reconnect Mode' set to 'Always on'. A link to 'Advanced Settings.' is at the bottom right. The lower half of the form is for 'Address Mode', with 'Dynamic IP' selected. It includes fields for 'Service Name', 'Primary DNS Server', 'Secondary DNS Server', 'MTU' (set to 'Auto'), and 'Enable NAT' (set to 'Enabled').

Proceed to **IPv6 Settings** on page **38** or click **Save** when you are done.

PPPoA

Select **PPPoA** if your ISP requires you to enter a PPPoA username and password. PPPoA is not available for VDSL or Residential Gateway WAN types.

IPv4 Settings:

My Internet Connection is: Select **PPPoA**.

Username: Enter the username provided by your ISP.

Password: Enter the password provided by your ISP.

Reconnect Mode: Select either **Always-on**, **On-Demand**, or **Manual**.

Advanced Settings

Primary DNS Server: Enter the primary DNS server IP address assigned by your ISP. This address is usually obtained automatically from your ISP.

Secondary DNS Server: Enter the secondary DNS server IP address assigned by your ISP. This address is usually obtained automatically from your ISP.

Enable NAT: Enable or disable Network Address Translation.

IPv6 Settings

My Internet Connection is: **PPPoA** is displayed here. If PPPoA is selected as the IPv4 Connection type, the IPv4 PPPoA session will be shared in order to provide IPv6 connectivity.

DNS Type: Select either **Obtain DNS server address automatically** or **Use the following DNS address**.

Click **Save** when you are done.

The screenshot shows the PPPoA configuration interface. In the IPv4 Settings section, 'My Internet Connection is' is set to 'PPPoA'. There are fields for 'Username' and 'Password'. 'Reconnect Mode' is set to 'Always on'. Below that are fields for 'Primary DNS Server' and 'Secondary DNS Server', both of which are empty. The 'Enable NAT' checkbox is checked. An 'Advanced Settings...' link is located at the bottom right of this section. In the IPv6 Settings section, 'My Internet Connection is' is set to 'PPPoA'. A dropdown menu for 'DNS Type' is set to 'Obtain a DNS server address'. At the bottom, it says 'PPPoA Session: Share with IPv4'.

Bridged

Select **Bridge** to configure the device as a network bridge.

IPv4 Settings:

My Internet Connection is: Select **Bridged**.

LAN Interface: Choose the interface to bridge.

The screenshot shows the 'IPv4 Settings' section of a network configuration interface. It includes fields for 'My Internet Connection is' (set to 'Bridged'), 'LAN Interface' (set to 'LAN 1'), and 'MTU' (set to 'Auto'). There is also a link to 'Advanced Settings...' and a field for 'MTU' with a dropdown set to 'Manual' and a value of '1500'.

Advanced Settings

MTU Maximum Transmission Unit - you may need to change the MTU for optimal performance with your ISP. Select either **Auto** or **Manual**.

Secondary DNS Server: Enter the secondary DNS server IP address assigned by your ISP. This address is usually obtained automatically from your ISP.

Enable NAT: Enable or disable Network Address Translation.

Bridged Mode does not support IPv6 configuration. Click **Save** when you are done.

IPv6 Settings Auto Detection

Select **Auto Detection** to automatically detect the IPv6 connection method used by your Internet Service Provider (ISP). If Auto Detection fails, you may manually select another IPv6 connection type.

IPv6 Settings:

My Internet Connection is: Select **Auto Detection**.

DNS Type: Select either **Obtain DNS server address automatically** or **Use the following DNS address**.

If you selected **Use the following DNS address**, the following options are available:

Primary DNS Server: Enter the primary DNS server address.

Secondary DNS Server: Enter the secondary DNS server address.

Click **Save** when you are done.

The screenshot shows the 'IPv6 Settings' page. Under 'My Internet Connection is:', the dropdown menu is set to 'Auto Detection'. Under 'DNS Type:', the dropdown menu is set to 'Obtain a DNS server address'.

The screenshot shows the 'IPv6 Settings' page. Under 'My Internet Connection is:', the dropdown menu is set to 'Auto Detection'. Under 'DNS Type:', the dropdown menu is set to 'Use the following DNS'. Below this, there are two input fields: 'Primary DNS Server:' containing '0:0:0:0:0:0:0:0' and 'Secondary DNS Server:' containing '0:0:0:0:0:0:0:0'.

Static IPv6

Select **Static IP** if your IPv6 information is provided by your Internet Service Provider (ISP).

IPv6 Settings:

My Internet Connection is: Select **Static IP**.

If you enable **Use Link-Local Address**, the following options are available:

Default Gateway: Enter the default gateway for your IPv6 connection.

Primary DNS Server: Enter the primary DNS server address.

Secondary DNS Server: Enter the secondary DNS server address.

If you disable **Use Link-Local Address**, the following options are available:

IPv6 Address: Enter the address supplied by your ISP.

Subnet Prefix Length: Enter the subnet prefix length supplied by your ISP.

Default Gateway: Enter the default gateway for your IPv6 connection.

Primary DNS Server: Enter the primary DNS server address.

Secondary DNS Server: Enter the secondary DNS server address.

Click **Save** when you are done.

The image contains two side-by-side screenshots of a web-based configuration interface for 'IPv6 Settings'. Both screenshots show the same basic structure with different values for the 'Use Link-Local Address' setting.
Top Screenshot (Enabled):
- My Internet Connection is: Static IPv6
- Use Link-Local Address: Enabled (highlighted)
- Default Gateway: [empty field]
- Primary DNS Server: [empty field]
- Secondary DNS Server: [empty field]
Bottom Screenshot (Disabled):
- My Internet Connection is: Static IPv6
- Use Link-Local Address: Disabled (highlighted)
- IPv6 Address: [empty field]
- Subnet Prefix Length: [empty field]
- Default Gateway: [empty field]
- Primary DNS Server: [empty field]
- Secondary DNS Server: [empty field]

Auto Configuration (SLAAC/DHCPv6)

Select **Auto Configuration** if your ISP assigns your IPv6 address when your router requests one from the ISP's server. Some ISPs require you to adjust settings on your side before your router can connect to the IPv6 Internet.

IPv6 Settings:

My Internet Connection is: Select **Auto Configuration**.

DNS Type: Select either **Obtain DNS server address automatically** or **Use the following DNS address**.

If you selected **Use the following DNS address**, the following options are available:

Primary DNS Server: Enter the primary DNS server address.

Secondary DNS Server: Enter the secondary DNS server address.

Click **Save** when you are done.

The screenshot shows the 'IPv6 Settings' section. Under 'My Internet Connection is:', the dropdown menu is set to 'Auto Configuration'. Under 'DNS Type:', the dropdown menu is set to 'Obtain a DNS server address'.

The screenshot shows the 'IPv6 Settings' section. Under 'My Internet Connection is:', the dropdown menu is set to 'Auto Configuration'. Under 'DNS Type:', the dropdown menu is set to 'Use the following DNS'. Below this, there are two input fields: 'Primary DNS Server:' and 'Secondary DNS Server:'.

PPPoE

Select **PPPoE** if your ISP provides and requires you to enter a PPPoE username and password in order to connect to the Internet.

IPv6 Settings:

My Internet Connection is: Select **PPPoE**.

DNS Type: Select either **Obtain DNS server address automatically** or **Use the following DNS address**.

If you selected **Use the following DNS address**, the following options are available:

Primary DNS Server: Enter the primary DNS server address.

Secondary DNS Server: Enter the secondary DNS server address.

IPv6 Settings

My Internet Connection is: **PPPoE**

DNS Type: **Use the following DNS**

Primary DNS Server:

Secondary DNS Server:

My Internet Connection is: **PPPoE**

DNS Type: **Obtain a DNS server address**

PPPoE Session: Choose **Share with IPv4** to re-use your IPv4 PPPoE username and password, or **Create a new session**.

If you selected **Create a new session**, the following options are available:

Username: Enter the username provided by your ISP.

Password: Enter the password provided by your ISP.

PPPoE Session: **Share with IPv4**

PPPoE Session: **Create a new session**

Username:

Password:

PPPoE (continued)

Address Mode: Select **Static IP** if your ISP assigned you an IP address. In most cases, select **Dynamic IP**.

If you selected **Static IP**, the following options are available:

IP Address: Enter the IP address provided by your ISP. (Static IP only)

Service Name: Enter the ISP service name (optional).

Reconnect Mode: Select either **Always-on** or **Manual**.

MTU: Maximum Transmission Unit - you may need to change the MTU for optimal performance with your ISP.

If you selected **Dynamic IP**, the following options are available:

Service Name: Enter the ISP service name (optional).

Reconnect Mode: Select either **Always-on** or **Manual**.

MTU: Maximum Transmission Unit - you may need to change the MTU for optimal performance with your ISP.

Click **Save** when you are done.

A screenshot of a configuration interface for PPPoE settings. The 'Address Mode' dropdown is set to 'Dynamic IP'. The 'Service Name' field is empty. The 'Reconnect Mode' dropdown is set to 'Always on'. The 'MTU' field shows '1492 bytes'.

A screenshot of a configuration interface for PPPoE settings. The 'Address Mode' dropdown is set to 'Dynamic IP'. The 'MTU' field shows '1492 bytes'.

6rd

Select **6rd** if your ISP uses 6rd to connect devices to the Internet.

IPv6 Settings:

My Internet Connection is: Select **6rd**.

Assign IPv6 Prefix: Enter the IPv6 prefix if available.

Primary DNS Server: Enter the primary DNS server address.

Secondary DNS Server: Enter the secondary DNS server address.

Enable Hub and Spoke Mode: Enable if you want to minimize the number of routes to the destination by using a hub and spoke method of networking.

6rd Configuration: Choose the **6rd DHCPv4 Option** to automatically populate the data values, or **Manual Configuration** to enter the settings yourself.

If you selected **Manual Configuration**, the following options are available:

6rd IPv6 Prefix: Enter the 6rd IPv6 prefix and mask length supplied by your ISP.

6rd IPv6 Prefix: Enter the 6rd border relay IPv4 address settings supplied by your ISP .

WLAN IPv4 Address: The WAN IPv4 address is displayed here.

6rd Border Relay IPv4 Address: Enter the 6rd Border Relay IPv4 Address.

Click **Save** when you are done.

Local Connectivity Only

Select **Local Connectivity Only** if you do not need IPv6 to access the Internet.

IPv6 Settings:

My Internet Connection is: Select **Local Connectivity Only**. No further configuration is available.

Click **Save** when you are done.

Profile

On this page you can configure your DSL settings. If you are unsure, you can obtain these settings from your ISP.

DSL Modulation

DSL Modulation Options: Select whether to enable or disable each DSL modulation option. Usually it is best to leave these at their defaults, unless otherwise instructed by your ISP.

If you enabled **VDSL Modulation**, choose the VDSL Profile Options:

VDSL Profile

VDSL Profile Options: Select the VDSL Profiles to enable. It is best to leave these at their defaults, unless otherwise instructed by your ISP.

Advanced Settings

Bitswap: Select whether to enable Bitswap.

SRA: Select whether to enable SRA.

AnnexL Upstream PSD: Select **M1 and M2**, **Only M1**, or **Only M2**. The default is **M1 and M2**.

Click **Save** when you are done.

DSL Modulation	Status
G.dmt	Enabled
T1.413	Enabled
AnnexL	Enabled
AnnexM	Disabled
VDSL Profile	Status
Profile 8A	Enabled
Profile 8C	Enabled
Profile 12A	Enabled
Profile 17A	Enabled
Profile 8B	Enabled
Profile 8D	Enabled
Profile 12B	Enabled
Profile 30A	Enabled
Bitswap	Enabled
SRA	Enabled
AnnexL Upstream PSD	M1 and M2

Priority

From this page you may configure your Internet failover priority. In the event that your primary Internet connection method fails, this device can automatically fall back to using a secondary or tertiary connection in order to maintain Internet connectivity.

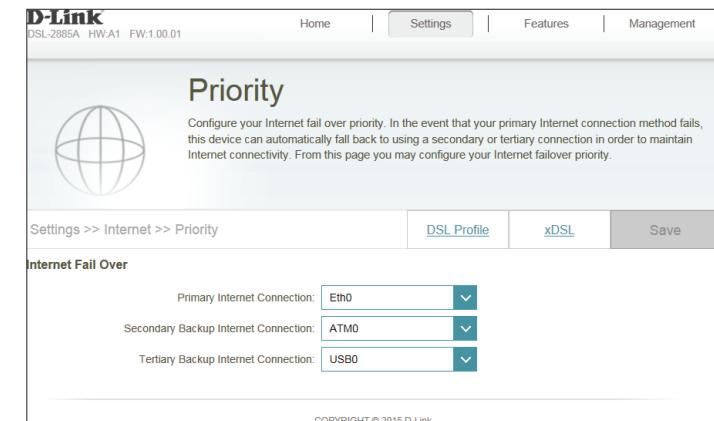

Internet Fail Over

First Priority: Select the primary Internet connection to use. The options are ATM0, which is the DSL connection; Eth0 and Eth1-Eth5 if enabled, which are the Ethernet WAN interfaces provided by Residential Gateway mode; and USB0, which is a USB connected modem.

Second Priority: Select the secondary back up, Internet connection to use in the event the primary Internet connection fails.

Third Priority: Select the third back up, Internet connection to use in the event the primary and secondary Internet connection fails.

Click **Save** when you are done.

Wireless

From this page you can configure your wireless network settings.

2.4 GHz

Status: Enable or disable the 2.4 GHz wireless network.

Wi-Fi Name (SSID): Create a name for your wireless network using up to 32 characters.

Password: Create a password to use for wireless security.

Advanced Settings

Security Mode: Choose **None**, **WEP**, or **WPA/WPA2-(Personal)** (recommended).

802.11 Mode : Select the desired wireless networking standards to use. The available options are **Mixed 802.11b/g/n**, **Mixed 802.11g/n**, **802.11n only**.

Wi-Fi Channel: Select the desired channel for your wireless network to use. The default and recommended setting is **Auto**.

Transmission Power: Select the desired wireless transmission power. The available options are **High**, **Medium**, and **Low**. The default is **High**.

Channel Width: Select **Auto 20/40** if you are using both 802.11n and non-802.11n devices, or select **20 MHz** if you want to disable 40 MHz bandwidth communication. The recommended setting is **Auto 20/40**.

Coexistence: Click the button to enable or disable HT20/40 coexistence.

Visibility Status: The default setting is **Visible**. Select **Invisible** if you do not want to broadcast the SSID of your wireless network.

Note: Making a network **Invisible** is not a form of security alone.

The screenshot displays the 'Wireless' configuration page for a D-Link DSL-2885A router. The top navigation bar includes links for Home, Settings (which is selected), Features, and Management. The main title 'Wireless' is centered above a sub-section titled '2.4GHz'. Below this, there are fields for 'Status' (Enabled), 'Wi-Fi Name (SSID)' (dlink-2885A-z), and 'Password' (wordpass). A large blue button labeled 'Save' is located on the right. Under the '2.4GHz' section, there are dropdown menus for 'Security Mode' (WPAWPA2-Personal), '802.11 Mode' (Mixed 802.11b/g/n), 'Wi-Fi Channel' (Auto), 'Transmission Power' (High), 'Channel Width' (Auto 20/40 MHz), 'coexistence' (Enabled), 'Visibility Status' (Visible), and 'Schedule' (Always Enable). An 'Advanced Settings...' link is at the bottom. The '5GHz' section follows, with similar configuration fields. At the bottom of the page is a 'WI-FI PROTECTED SETUP' section containing 'PBC' (Trigger PBC) and 'PIN' (91964427) fields, along with a 'Save' button. The page footer includes the copyright notice 'COPRIGHT © 2015 D-Link'.

Wireless (continued)

Schedule: Use the drop-down menu to select the time schedule that the rule will be enabled on. The schedule may be set to **Always Enable**, or you can create your own schedules in the **Schedules** section. Refer to page 71 for more information.

5 GHz

Status: Enable or disable the 5 GHz wireless network.

Wi-Fi Name (SSID): Create a name for your wireless network using up to 32 characters.

Password: Create a password to use for wireless security.

Advanced Settings

Security Mode: Choose **None**, **WEP**, or **WPA/WPA2-(Personal)** (recommended).

802.11 Mode: Select the desired wireless networking standards to use. The available options for the 5 GHz wireless network are **Mixed 802.11a/n/ac**, **Mixed 802.11n/ac**, **802.11ac only**, **Mixed 802.11a/n**, **Mixed 802.11n only**, or **802.11a only**.

Wi-Fi Channel: Select the desired channel for your wireless network to use. The default and recommended setting is **Auto**.

Transmission Power: Select the desired wireless transmission power. The available options are **High**, **Medium**, and **Low**. The default is **High**.

Channel Width (5 GHz): Select **Auto 20/40/80 MHz** if you are using 802.11ac, 802.11n, and 802.11a devices, or select **Auto 20/40 MHz** if you want to disable 80 MHz bandwidth communication. The recommended setting is **Auto 20/40/80 MHz**.

Wireless (continued)

Visibility Status: The default setting is **Visible**. Select **Invisible** if you do not want to broadcast the SSID of your wireless network.

Note: Making a network **Invisible** is not a form of security alone.

Schedule: Use the drop-down menu to select the time schedule that the rule will be enabled on. The schedule may be set to **Always Enable**, or you can create your own schedules in the **Schedules** section. Refer to page 71 for more information.

Wi-Fi Protected Setup

PBC: Press the button to trigger WPS-PBC mode. This virtual WPS button replicates the physical WPS button functionality.

Click **Save** when you are done.

The screenshot displays the 'Wireless' configuration page of the D-Link DSL-2885A router. The top navigation bar shows 'Home', 'Settings' (which is selected), 'Features', and 'Management'. The main title 'Wireless' is centered above a brief description: 'Use this section to configure the wireless settings for your D-Link Router. Please make sure that any changes made in this section will need to be updated on your wireless device.' Below the title is a large Wi-Fi signal icon.

The '2.4GHz' section contains the following fields:

- Status: Enabled (selected)
- Wi-Fi Name (SSID): dlink-2885A-z
- Password: wordpass
- Security Mode: WPAWPA2-Personal
- 802.11 Mode: Mixed 802.11b/g/n
- Wi-Fi Channel: Auto
- Transmission Power: High
- Channel Width: Auto 20/40 MHz
- coexistence: Enabled
- Visibility Status: Visible
- Schedule: Always Enable

The '5GHz' section contains similar fields:

- Status: Enabled (selected)
- Wi-Fi Name (SSID): dlink-2885A5G-z
- Password: wordpass
- Security Mode: WPAWPA2-Personal
- 802.11 Mode: Mixed 802.11a/n/ac
- Wi-Fi Channel: Auto
- Transmission Power: High
- Channel Width: Auto 20/40/80 MHz
- Visibility Status: Visible
- Schedule: Always Enable

At the bottom of the page is a 'WI-FI PROTECTED SETUP' section with two buttons:

- PBC: Trigger PBC (selected)
- PIN: 91964427

At the very bottom right, there is a small 'COPYRIGHT © 2015 D-Link' notice.

Multiple SSID

The multiple SSID feature will allow you to create temporary zones that can be used by guests to access the Internet. These zones will be separate from your main wireless network. You may configure different zones for the 2.4 GHz and 5 GHz wireless bands.

In the Settings menu on the bar on the top of the page, click **Wireless**, then click the **Multiple SSID** link.

2.4 GHz / 5 GHz

Wlan Interface: Select the SSID.

Status: Enable or disable the selected SSID.

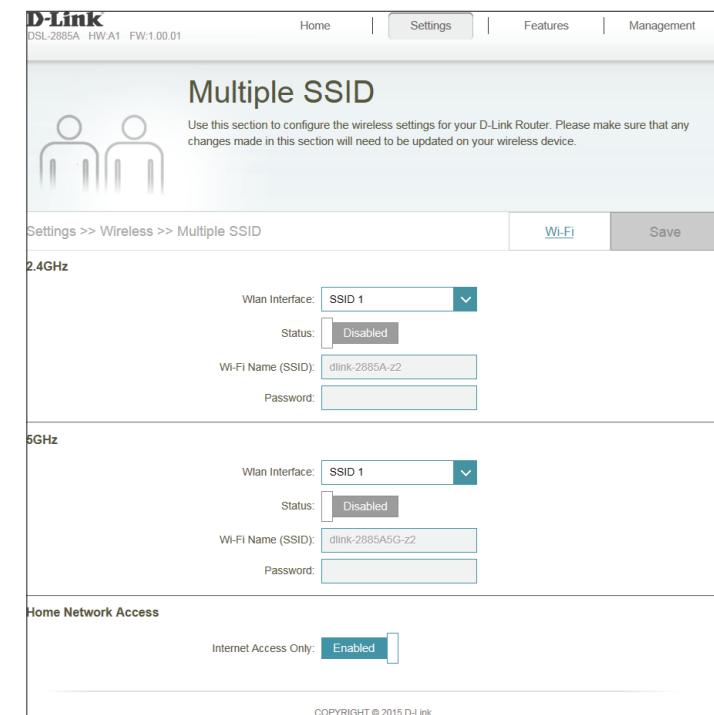

Wi-Fi Name (SSID): Create a password to use for wireless security. Wireless clients will need to enter this password to successfully connect to the SSID.

Password: Enabling this option will confine connectivity to the Internet, disallowing guests from accessing other local network devices.

Home Network Access

Internet Access Only: Prevent clients from accessing LAN resources.

Click **Save** when you are done.

Network

This section will allow you to change the local network settings of the router and to configure the DHCP settings. In the Settings menu on the bar on the top of the page, click **Network**. Click **Advanced Settings...** to expand the list and see all of the options.

Interface

Interface: The DSL-2885A supports multiple LAN interfaces or multiple internal networks. Select the LAN interface to configure. Refer to **LAN Composition** on page **68** for more information.

Network Settings

LAN IP Address: Enter the IP address of the router for this interface. The default IP address is **192.168.1.1**.

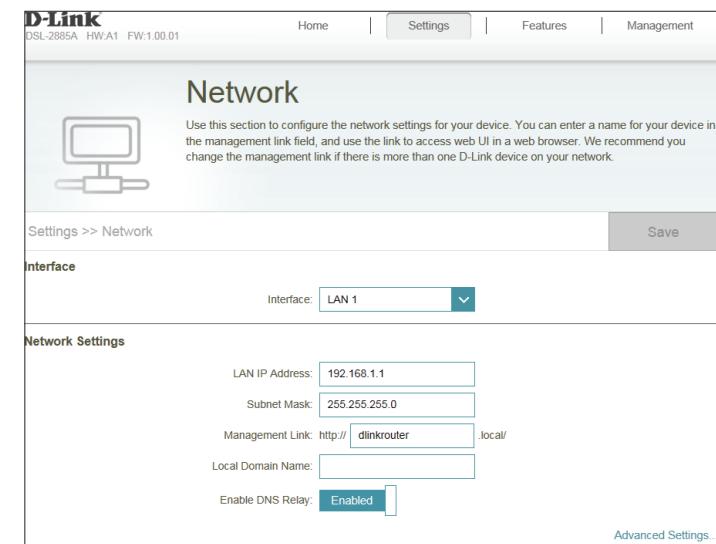

If you change the IP address, once you click **Save**, you will need to enter the new IP address in your browser to get back into the configuration utility.

Subnet Mask: Enter the subnet mask of this interface. The default subnet mask is **255.255.255.0**.

Management Link: The default address to access the router's configuration is **http://dlinkrouter.local./** Here, you can replace **dlinkrouter** with a name of your choice.

Local Domain Name: Enter the domain name (optional).

Enable DNS Relay: Disable to transfer the DNS server information from your ISP to your computers. If enabled, your computers will use the router for a DNS server.

Network (continued)

Advanced Settings - DHCP Server

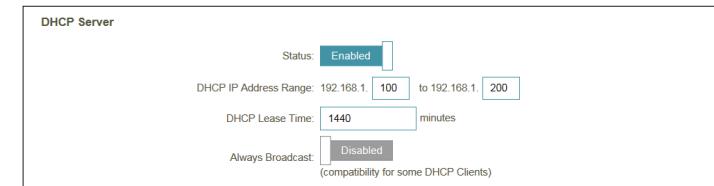

Status: Enable or disable the DHCP server.

DHCP IP Address Range: Enter the starting and ending IP addresses for the DHCP server's IP assignment.
Range:

Note: If you statically (manually) assign IP addresses to your computers or devices, make sure the IP addresses are outside of this range or you may have an IP conflict.

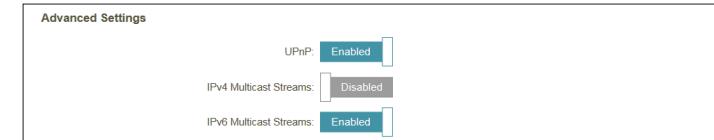

DHCP Lease Time: Enter the length of time for the IP address lease in minutes.

Always Broadcast: Enable this feature to broadcast your networks DHCP server to LAN/WLAN clients.

Advanced Settings

UPnP: Enable or disable Universal Plug and Play (UPnP). UPnP provides compatibility with networking equipment, software and peripherals.

IPv4 Multicast Stream: Enable to allow IPv4 multicast traffic to pass through the router from the Internet.

IPv6 Multicast Stream: Enable to allow IPv6 multicast traffic to pass through the router from the Internet.

IPv6 Settings

WAN Interface: Select the WAN interface to configure the local network IPv6 settings.

My Internet Connection is: Your Internet's IPv6 connection type (Auto Detection, Static IPv6, Auto Configuration(SLAAC/DHCPv6), PPPoE, 6rd, or Local connectivity)

Network (continued)

LAN IPv6 Address Settings

LAN IPv6 Address: Enter the LAN (local) IPv6 address for the router.

LAN IPv6 ADDRESS SETTINGS

Enable DHCP-PD: Enabled

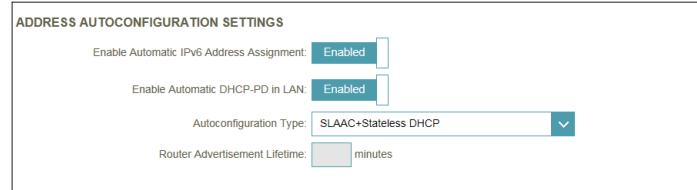

LAN IPv6 Link-Local Address: fe80::0:218:e7ff:fe95:9317

Advanced Settings...

LAN IPv6 Link- Local Address: Displays the router's LAN link-local address.

Advanced Settings - Address Autoconfiguration Settings

Enable Automatic IPv6 Address Assignment: Enable or disable the Automatic IPv6 Address Assignment feature.

ADDRESS AUTOCONFIGURATION SETTINGS

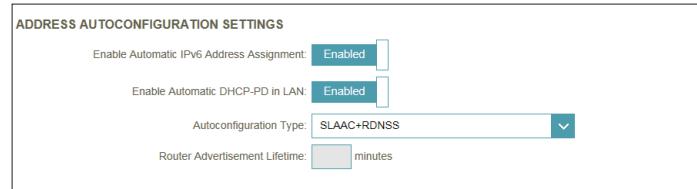

Enable Automatic IPv6 Address Assignment: Enabled

Enable Automatic DHCP-PD in LAN: Enabled

Autoconfiguration Type: SLAAC+Stateless DHCP

Router Advertisement Lifetime: minutes

Enable Automatic DHCP-PD in LAN: Enable or disable DHCP-PD for other IPv6 routers connected to the LAN interface. **Note:** This feature requires a smaller subnet prefix than /64 (i.e. allowing for a larger address allocation), such as /63. Contact your ISP for more information.

ADDRESS AUTOCONFIGURATION SETTINGS

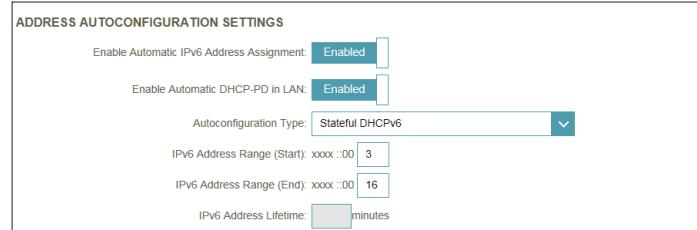

Enable Automatic IPv6 Address Assignment: Enabled

Enable Automatic DHCP-PD in LAN: Enabled

Autoconfiguration Type: SLAAC+RDNSS

Router Advertisement Lifetime: minutes

Autoconfiguration Type: Select **SLAAC+RDNSS**, **SLAAC+Stateless DHCP**, or **Stateful DHCPv6**.

ADDRESS AUTOCONFIGURATION SETTINGS

Enable Automatic IPv6 Address Assignment: Enabled

Enable Automatic DHCP-PD in LAN: Enabled

Autoconfiguration Type: Stateful DHCPv6

IPv6 Address Range (Start): xxxx : 00 3

IPv6 Address Range (End): xxxx : 00 16

IPv6 Address Lifetime: minutes

If you selected **Stateful DHCPv6** as the Autoconfiguration Type:

IPv6 Address Range (Start): Enter the starting IPv6 address for the DHCP server's IPv6 assignment.

IPv6 Address Range (End): Enter the ending IPv6 address for the DHCP server's IPv6 assignment.

IPv6 Address Lifetime: Enter the IPv6 address lifetime (in minutes).

Click **Save** when you are done.

SharePort

This page will allow you to set up access to files on an external USB device plugged into the router. You can do this through the local network or from the Internet using either a web browser or an app on your smartphone or tablet. In the Settings menu on the bar on the top of the page, click **SharePort**.

Windows File Sharing (SAMBA)

Status: Check to enable the media server functions, allowing connected clients access to media files over the network.

Windows File Sharing (SAMBA): Choose either **Allow all users to access (no password)** or **Require router's admin password** to specify whether the router's password will be required for access.

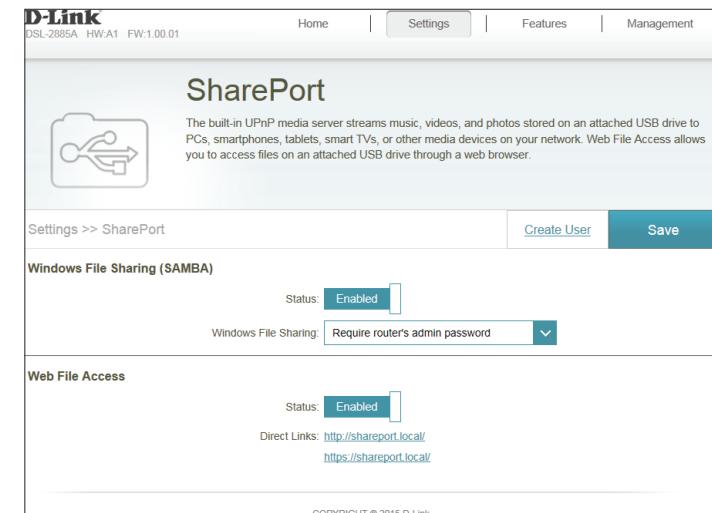

Web File Access

Web File Access: Enable remote access to files stored on a USB device plugged into the router through a web browser.

Direct Links: This area will display the HTTP and HTTPS links to connect to your SharePort drive through a web browser from a device on your network.

Click **Save** when you are done.

To manage user accounts for SharePort access, click **Create User** and refer to the next page for details.

Create User

The Create User page allows you to manage your SharePort user accounts. The current list of user accounts will be displayed, along with their current permissions and access path. If they do not have an account set up, users will be restricted to guest access; only having access to the **Guest** folder on the media server. The router can store a maximum of ten accounts (including the **Admin** account).

If you wish to remove an account, click on its trash can icon in the Delete column. If you wish to edit an account, click on its pencil icon in the Edit column. If you wish to create a new account, click the **Create User** button. If you edit or create a user, the following options will appear:

User Name: Enter the desired user name for the new account.

Password: Enter the password which the user will need to enter when logging in.

Permission: Select either **Read Only** or **Read/Write** to control whether the user can edit, add, or delete files on the device.

Folder: Choose the parent folder that the user will be able to access. Files and folders on a higher level will be unavailable. **Root** refers to the top level folder on the device. To change the selected folder, click **Browse** and browse to the desired folder.

Click **OK** when you are done. The new user should be added to the list of user accounts. To save the new list, click **Save**. To return to the SharePort page, click **SharePort**.

User Name	Access Path	Permission	Edit	Delete
Admin	root	Read/Write	--	--

Features

Firewall

The router's firewall protects your network from malicious attacks over the Internet. In the Features menu on the bar on the top of the page, click **Firewall Settings**. Click **Advanced Settings...** to expand the list and see all of the options.

- Enable DMZ:** Enable or disable Demilitarized Zone (DMZ). This completely exposes the client to threats over the Internet, and is not recommended in ordinary situations.
- DMZ IP Address:** If you enabled DMZ, enter the IP address of the client you wish to expose, or use the drop-down menu to quickly select it.
- Enable SPI IPv4:** Enabling Stateful Packet Inspection (SPI) helps to prevent cyber attacks by validating that the traffic passing through the session conforms to the protocol.
- Enable Anti-Spoof Checking:** Enable this feature to protect your network from certain kinds of spoofing attacks.
- IPv6 Simple Security:** Enable or disable IPv6 simple security.
- IPv6 Ingress Filtering:** Enable or disable IPv6 ingress filtering.

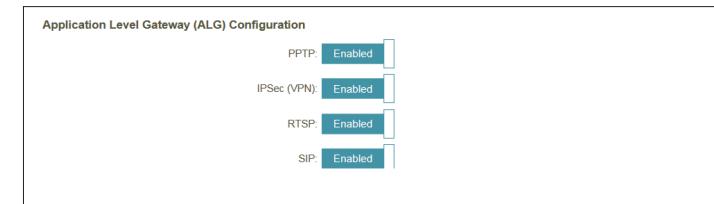

Firewall (Continued)

Advanced Settings - Application Level Gateway (ALG) Configuration

- PPTP:** Allows multiple machines on the LAN to connect to their corporate network using the PPTP protocol.
- IPSec (VPN):** Allows multiple VPN clients to connect to their corporate network using IPSec. Some VPN clients support traversal of IPSec through NAT. This Application Level Gateway (ALG) may interfere with the operation of such VPN clients. If you are having trouble connecting with your corporate network, try turning this ALG off. Please check with the system administrator of your corporate network whether your VPN client supports NAT traversal.
- RTSP:** Allows applications that uses Real Time Streaming Protocol (RTSP)to receive streaming media from the Internet.
- SIP:** Allows devices and applications using VoIP (Voice over IP) to communicate across NAT. Some VoIP applications and devices have the ability to discover NAT devices and work around them. This ALG may interfere with the operation of such devices. If you are having trouble making VoIP calls, try turning this ALG off.

Click **Save** when you are done.

IPv4/IPv6 Rules

The IPv4/IPv6 Rules section is an advanced option that lets you configure what kind of traffic is allowed to pass through the network. To configure the IPv4 rules, from the Firewall Settings page click **IPv4 Rules**. To configure IPv6 rules, from the Firewall Settings page click **IPv6 Rules**. To return to the main Firewall Settings page, click **Security Check**.

To begin, use the drop-down menu to select whether you want to **ALLOW** or **DENY** the rules you create. You can also choose to turn filtering **OFF**.

If you wish to remove a rule, click on its trash can icon in the Delete column. If you wish to edit a rule, click on its pencil icon in the Edit column. If you wish to create a new rule, click the **Add Rules** button. Click **Save** when you are done. If you edit or create a rule, the following options will appear:

Name: Enter a name for the rule.

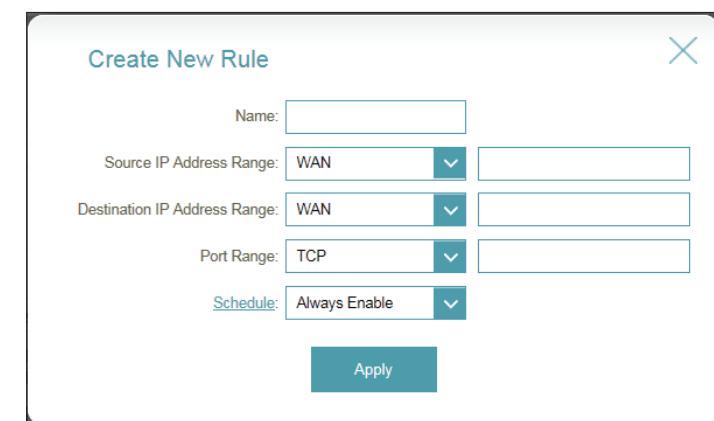

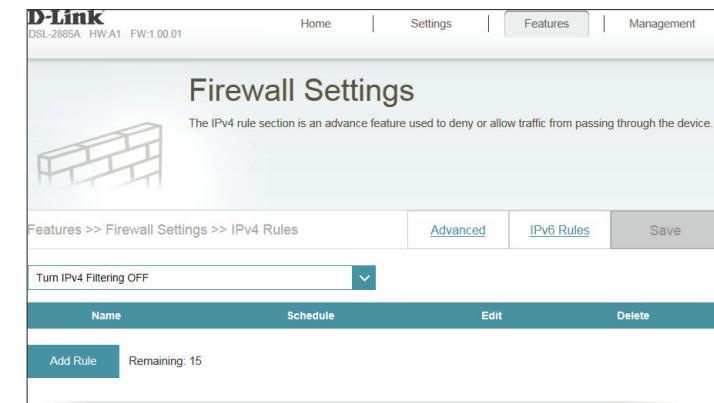

Source IP Address Range: Enter the source IP address range that the rule will apply to, and using the drop-down menu, specify whether it is a **WAN** or **LAN** IP address.

Destination IP Address Range: Enter the destination IP address range that the rule will apply to, and using the drop-down menu, specify whether it is a **WAN** or **LAN** IP address.

Port Range: Select the protocol of the traffic to allow or deny (**Any**, **TCP**, or **UDP**) and then enter the range of ports that the rule will apply to.

Schedule: Use the drop-down menu to select the time schedule that the rule will be enabled on. The schedule may be set to **Always Enable**, or you can create your own schedules in the **Schedules** section. Refer to 71 for more information.

Click **Apply** when you are done.

Port Forwarding

Port forwarding allows you to specify a port or range of ports to open for specific devices on the network. This might be necessary for certain applications to connect through the router. In the Features menu on the bar on the top of the page, click **Port Forwarding**.

If you wish to remove a rule, click on its trash can icon in the Delete column. If you wish to edit a rule, click on its pencil icon in the Edit column. If you wish to create a new rule, click the **Add Rules** button. Click **Save** when you are done. If you edit or create a rule, the following options will appear:

Name: Enter a name for the rule.

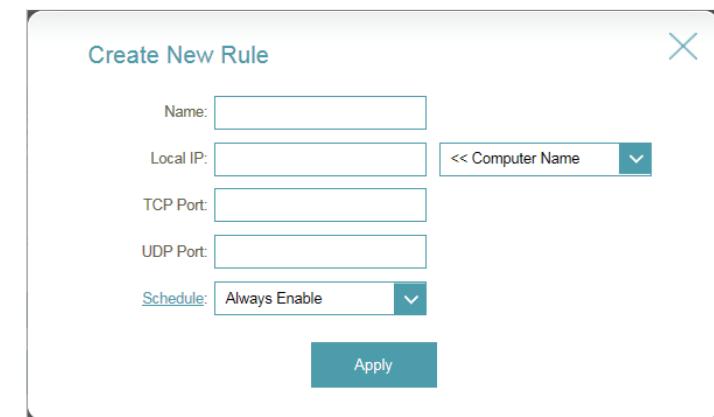

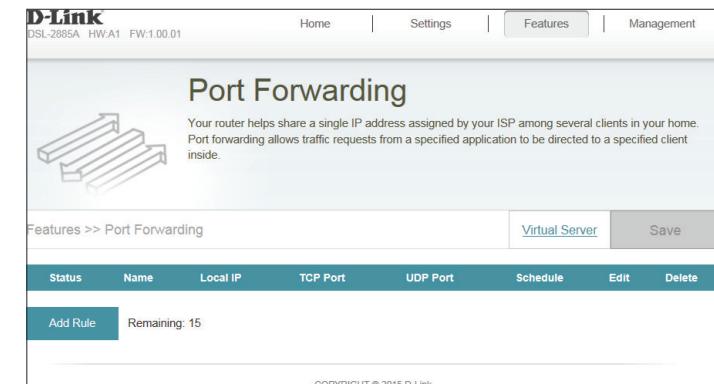

Local IP: Enter the IP address of the computer on your local network that you want to allow the incoming service to. Alternatively, select the device from the drop-down menu.

TCP Port: Enter the TCP ports that you want to open. You can enter a single port or a range of ports. Separate ports with a comma (for example: 24,1009,3000-4000).

UDP Port: Enter the UDP ports that you want to open. You can enter a single port or a range of ports. Separate ports with a comma (for example: 24,1009,3000-4000).

Schedule: Use the drop-down menu to select the time schedule that the rule will be enabled on. The schedule may be set to **Always Enable**, or you can create your own schedules in the **Schedules** section. Refer to 71 for more information.

Click **Apply** when you are done.

Virtual Server

The virtual server allows you to specify a single public port on your router for redirection to an internal LAN IP Address and Private LAN port. To configure the virtual server, from the Port Forwarding page click **Virtual Server**. To return to the main Port Forwarding page, click **Port Forwarding**.

If you wish to remove a rule, click on its trashcan icon in the Delete column. If you wish to edit a rule, click on its pencil icon in the Edit column. If you wish to create a new rule, click the **Add Rules** button. Click **Save** when you are done. If you edit or create a rule, the following options will appear:

Name: Enter a name for the rule. Alternatively, select the protocol/Application from the drop-down menu.

Local IP: Enter the IP address of the computer on your local network that you want to allow the incoming service to. Alternatively, select the device from the drop-down menu.

Protocol: Select the protocol of the traffic to allow or deny (**TCP**, **UDP**, **Both**, or **Other**).

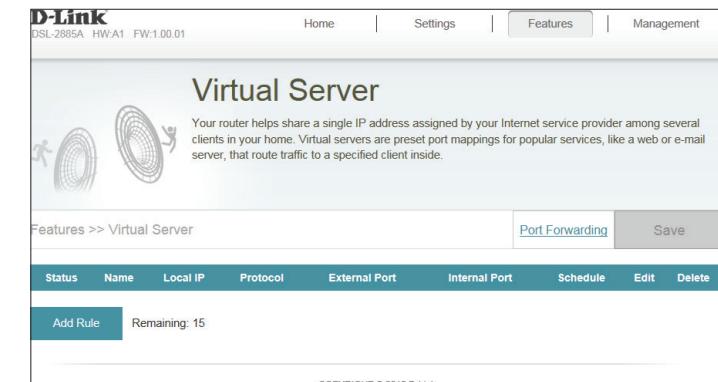

Protocol Number: If you entered **Other** above, enter the protocol number.

External Port: Enter the public port you want to open.

Internal Port: Enter the private port you want to open.

Schedule: Use the drop-down menu to select the time schedule that the rule will be enabled on. The schedule may be set to **Always Enable**, or you can create your own schedules in the **Schedules** section. Refer to 71 for more information.

Click **Apply** when you are done.

Create New Rule

Name:	<input type="text"/>	<< Application Name	<input type="button" value="▼"/>
Local IP:	<input type="text"/>	<< Computer Name	<input type="button" value="▼"/>

Website Filter

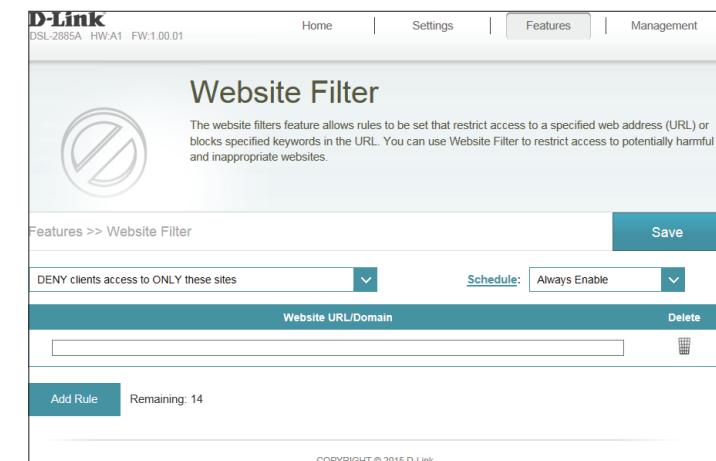

The website filter settings allow you to block access to certain web sites. You can either create a list of sites to block, or create a list of sites to allow (with all other sites being blocked).

In the Features menu on the bar on the top of the page, click **Website Filter**.

If you want to create a list of sites to block, select **DENY computers access to ONLY these sites** from the drop-down menu. All other sites will be accessible. If you want to specify a list of sites to allow, select **ALLOW computers access to ONLY these sites** from the drop-down menu. All other sites will be blocked.

You may specify a maximum of fifteen web sites. To add a new site to the list, click **Create New Rule**. Next, under Website URL/Domain enter the URL or domain. If you wish to remove a rule, click on its trashcan icon in the Delete column. If you wish to edit a rule, simply replace the URL or domain.

Click **Save** when you are done.

Static Routes

The Static Routes section allows you to define custom routes to control how data traffic is moved around your network.

In the Features menu on the bar on the top of the page, click **Static Routes**. To configure IPv6 rules, click **IPv6** and refer to 63. To return to the main IPv4 static routes page, click **IPv4**.

If you wish to remove a rule, click on its trash can icon in the Delete column. If you wish to edit a rule, click on its pencil icon in the Edit column. If you wish to create a new rule, click the **Add Rules** button. Click **Save** when you are done. If you edit or create a rule, the following options will appear:

Name: Enter a name for the rule.

Destination Network: Enter the IP address of packets that will take this route.

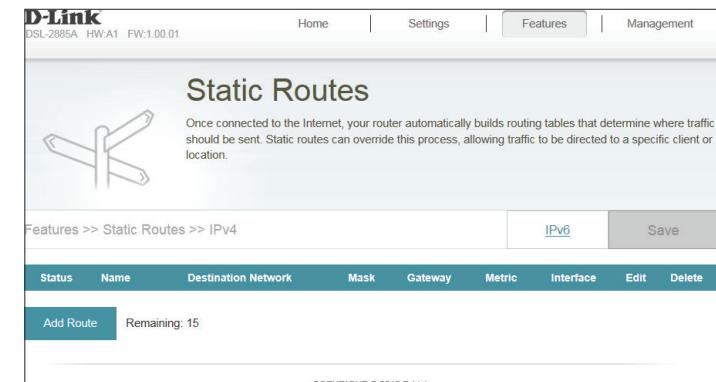

Mask: Enter the netmask of the route.

Gateway: Enter your next hop gateway to be taken if this route is used.

Metric: The route metric is a value from 1 to 16 that indicates the cost of using this route. A value 1 is the lowest cost and 15 is the highest cost.

Interface: Select the interface that the IP packet must use to transit out of the router when this route is used.

Click **Apply** when you are done.

Create New Route

Name:	
Destination Network:	
Mask:

Apply

IPv6

To configure IPv6 rules, on the Static Routes page click **IPv6**. To return to the main IPv4 static routes page, click **IPv4**.

If you wish to remove a rule, click on its trash can icon in the Delete column. If you wish to edit a rule, click on its pencil icon in the Edit column. If you wish to create a new rule, click the **Add Rules** button. Click **Save** when you are done. If you edit or create a rule, the following options will appear:

Name: Enter a name for the rule.

DestNetwork: This is the IP address of the router used to reach the specified destination.

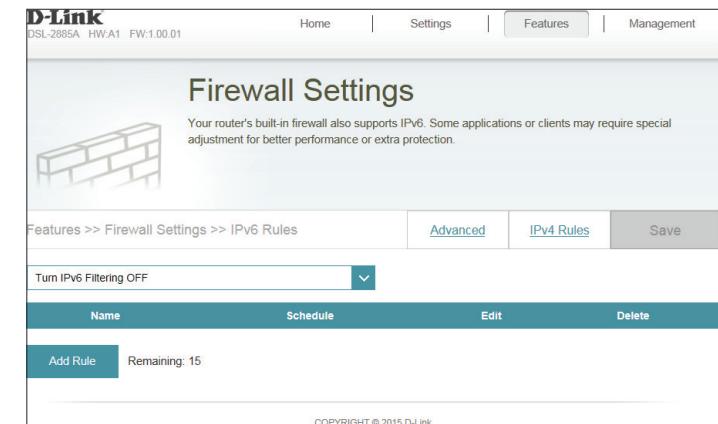

PrefixLen: Enter the IPv6 address prefix length of the packets that will take this route.

Gateway: Enter your next hop gateway to be taken if this route is used.

Metric: Enter the metric value for this rule here.

Interface: Select the interface that the IP packet must use to transit out of the router when this route is used.

Click **Apply** when you are done.

Dynamic DNS

Most Internet Service Providers (ISPs) assign dynamic (changing) IP addresses. Using a dynamic DNS service provider, people can enter your domain name in their web browser to connect to your server no matter what your IP address is.

In the Features menu on the bar on the top of the page, click **Dynamic DNS**.

Enable Dynamic DNS: Enabling dynamic DNS will reveal further configuration options.

Status: Displays the current dynamic DNS connection status.

Server Address: Enter the address of your dynamic DNS server, or select one from the drop-down menu.

Host Name: Enter the host name that you registered with your dynamic DNS service provider.

User Name: Enter your dynamic DNS username.

Password: Enter your dynamic DNS password.

Time Out: Enter a timeout time (in hours).

Click **Save** when you are done.

At the bottom of the page are the IPv6 host settings. To configure an IPv6 dynamic DNS host, refer to 65.

The screenshot shows the 'Dynamic DNS' configuration page for a D-Link DSL-2885A router. At the top, there's a header with the router model (DSL-2885A HW-A1 FW-1.00.01) and links for Home, Settings, Features (which is selected), and Management. Below the header, the title 'Dynamic DNS' is displayed with a sub-instruction: 'Dynamic Domain Name Service allows your router to associate an easy-to-remember domain name such as [YourDomainName].com with the regularly changing IP address assigned by your Internet Service provider. This feature is helpful when running a virtual server.' The main form area has a 'Save' button at the top right. It contains fields for 'Enable Dynamic DNS' (set to 'Enabled'), 'Status' (set to 'Disconnected'), 'Server Address' (set to 'dyndns.com'), 'Host Name' (empty), 'User Name' (empty), 'Password' (empty), and 'Time Out' (set to '576 hours'). At the bottom, there's a table with columns for Status, Host Name, IPv6 Address, Edit, and Delete. A 'Remaining: 10' message is shown above the table, and an 'Add Record' button is located to its left. The page footer includes a copyright notice: 'COPYRIGHT © 2015 D-Link'.

IPv6 Host

The IPv6 host settings are found at the bottom of the Dynamic DNS page.

If you wish to remove a rule, click on its trash can icon in the Delete column. If you wish to edit a rule, click on its pencil icon in the Edit column. If you wish to create a new rule, click the **Add Rules** button. Click **Save** when you are done. If you edit or create a rule, the following options will appear:

Host Name: Enter the host name that you registered with your dynamic DNS service provider.

IPv6 Address: Enter the IPv6 address of the dynamic DNS server. Alternatively, select the server device in the drop-down menu.

Click **Apply** when you are done.

Port Mapping

The DSL-2885A supports Port Mapping, which allows advanced users to control WAN access, improve security, and simplify administration. Port Mapping is divided into two sections: WAN Availability and LAN Composition.

Note: **LAN 1 - 4** refer to LAN Interfaces. **ETH 0 - ETH 4** refer to Ethernet WAN interfaces provided by the Residential Gateway mode which uses the Ethernet WAN Port. These names do not refer to the Physical LAN ports of the DSL-2885A.

- For more information on how to configure **LAN Interfaces**, or multiple internal networks, refer to **Network** on page **51**.
- For more information on how to configure the Residential Gateway Ethernet WAN port interface, or for information on how to configure the DSL-2885A to connect to different Ethernet WAN networks, refer to **Ethernet** on page **31**.
- For more information on how to configure the DSL WAN port interface to connect to different ADSL or VDSL WAN networks, refer to **ADSL** on page **28** or **VDSL** on page **30**.
- For more information on how to configure a USB broadband dongle, refer to **USB** on page **32**.

For an example implementation of Port Mapping, refer to **Example Configuration** on page **69**.

WAN Availability

From this page, you can configure WAN interface access for each LAN interface. **ETH 0** refers to the WAN Ethernet interface, **ATM 0** refers to the DSL port, and **USB 0** refers to the USB mobile broadband adapter. By default, all LAN interfaces have access to the ETH 0, ATM 0, and USB 0 WAN interfaces.

Note: In order for a LAN interface to use a WAN interface, it must be properly configured.

- WAN interfaces are used in order of preference according to their failover priority for more information, refer to **Priority** on page **46**.

Access to LAN interfaces must be manually assigned, if additional Ethernet WAN interfaces (**ETH1-4**), ADSL ATM WAN interfaces (**ATM1-7**), or VDSL PTM WAN interfaces (**PTM1-7**) are enabled.

Click **Save** when you are done.

	ETH 0	ATM 0	USB 0	N/A	N/A	N/A	N/A	N/A
LAN 1	✓	✓	✓					
LAN 2	✓	✓	✓					
LAN 3	✓	✓	✓					
LAN 4	✓	✓	✓					

	ETH 0	ETH 1	ATM 0	USB 0
LAN 1	✓		✓	✓
LAN 2	✓		✓	✓
LAN 3	✓		✓	✓
LAN 4	✓		✓	✓

LAN Composition

From this page, you can configure LAN interface composition. LAN composition may be determined by the physical LAN Ethernet ports, 2.4 GHz Wi-Fi SSIDs, and 5 GHz Wi-Fi SSIDs. By default, all physical LAN Ethernet ports and Wi-Fi SSIDs are set as members of LAN 1 (192.168.1.1-254).

The Wi-Fi radio buttons are set as follows:

- Wi-Fi 2.4 GHz 1 and Wi-Fi 5 GHz 1 correspond to the primary SSID.
- Wi-Fi 2.4 GHz 2 and Wi-Fi 5 GHz 2 correspond to Multiple SSID 1.
- Wi-Fi 2.4 GHz 3 and Wi-Fi 5 GHz 3 correspond to Multiple SSID 2.
- Wi-Fi 2.4 GHz 4 and Wi-Fi 5 GHz 4 correspond to Multiple SSID 3.

Note: In order to use the additional Wi-Fi SSIDs, you must configure Multiple SSIDs.

- For more information on configuring your primary SSID and Multiple SSID, refer to **Multiple SSID** on page **50** and **Wireless** on page **47**.
- To configure which LANs have access to WAN interfaces, refer to **WAN Availability** on page **67**.

Click **Save** when you are done.

LAN 4			✓					

Name	Interface	IP Address Range	WAN Availability	LAN Composition	Devices on this Network
Family	LAN 1	192.168.1.1-254	ETH 0, PTM 0	Physical LAN Port 1 Physical LAN Port 2 2.4 GHz Primary SSID 5 GHz Primary SSID	
Surveillance	LAN 2	192.168.2.1-254	ETH 0, PTM 0, USB 0	Physical LAN Port 3 2.4 GHz SSID 1 5 GHz SSID 1	
Guest	LAN 3	192.168.3.1-254	PTM 0	2.4 GHz SSID 2 5 GHz SSID 2	
IPTV	LAN 4	192.168.4.1-254	PTM 1	Physical LAN Port 4 2.4 GHz SSID 1 5 GHz SSID 1	

In this example, traffic from each network is isolated. The **Family** network provides Internet access and sharing between commonly used devices. The **Surveillance** network keeps IP Cameras and Network Video Recorder video separated from normal traffic to make it more secure. Additionally, in the event of VDSL or Ethernet WAN failure, the **Surveillance** network will maintain Internet connectivity via a USB mobile broadband adapter. The **Guest** network provides only Internet connectivity for visitors, protecting your other devices. The **IPTV** network isolates ISP broadcast video set top boxes to their own network and connects to the ISP's video WAN VDSL network.

Management

Time & Schedule

Time

The Time page allows you to configure, update, and maintain the correct time on the internal system clock. From here you can set the time zone, the Network Time Protocol (NTP) server, and enable or disable daylight saving time.

In the Management menu on the bar on the top of the page, click **Time & Schedule**.

Time Configuration

Time Zone: Select your time zone from the drop-down menu.

Time: Displays the current date and time of the router.

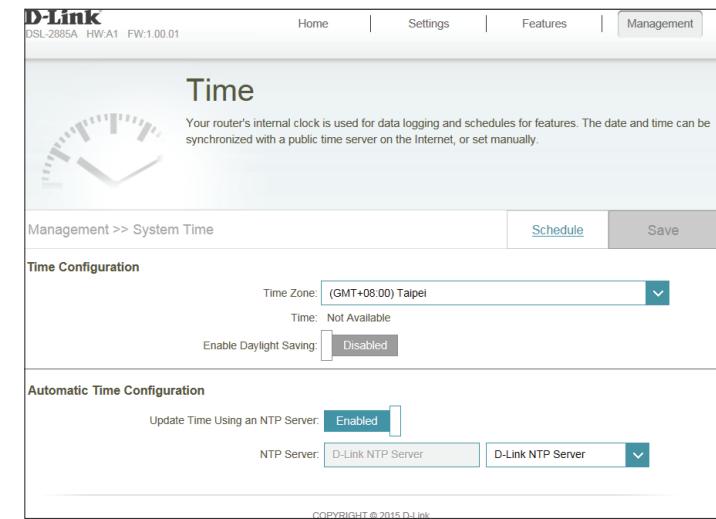

Daylight Saving: Enable or disable daylight saving time.

Automatic Time Configuration

Update Time Using an NTP Server: Enable or disable to allow an NTP server on the Internet to synchronize the time and date with your router. If you enable this option, select an NTP server from the drop-down menu. To configure the router's time and date manually, disable this option and use the drop-down menus that appear to input the time and date.

Click **Save** when you are done.

To configure and manage your schedules, click **Schedule** and refer to 71.

Schedule

Some configuration rules can be set according to a pre-configured schedule. To create, edit, or delete schedules, from the Time page click **Schedule**. To return to the Time page, click **Time**.

If you wish to remove a rule, click on its trash can icon in the Delete column. If you wish to edit a rule, click on its pencil icon in the Edit column. If you wish to create a new rule, click the **Add Rules** button. Click **Save** when you are done. If you edit or create a rule, the following screen will appear:

First, enter the name of your schedule in the **Name** field.

Each box represents one hour, with the time at the top of each column. To add a time period to the schedule, simply click on the start hour and drag to the end hour. You can add multiple days to the schedule, but only one period per day.

To remove a time period from the schedule, click on the cross icon.

Click **Apply** when you are done.

The screenshot shows the 'Schedule' section of the D-Link management interface. At the top, there's a header with the D-Link logo and model information (DSL-2885A HW-A1 FW-1.00.01). Below the header, a sub-header reads 'Management >> Schedule'. The main area has a title 'Schedule' with a grid icon. A tooltip below the grid states: 'Some features, such as the firewall and website filters, can be turned on or off based on a schedule. One common use of schedules is to control access to the Internet by a specified device during specified time periods.' There are tabs for 'Time' and 'Save'. A table at the bottom shows columns for 'Name', 'Schedule', 'Edit', and 'Delete'. Buttons for 'Add Rule' and 'Remaining: 10' are visible. The footer includes a copyright notice: 'COPYRIGHT © 2015 D-Link'.

This screenshot shows the 'Add Rule' dialog box. It has a 'Name' input field containing 'Work'. Below it is a 7x24 grid representing days of the week and hours of the day. Yellow boxes highlight specific time periods: from hour 8 to hour 19 for Monday through Friday, and from hour 8 to hour 18 for Saturday. Red 'X' icons are placed in the grid cells for Friday, hour 18, and hour 19, indicating that this specific period is being removed or is not selected. An 'Apply' button is at the bottom right.

This screenshot shows the 'Add Rule' dialog box after changes have been applied. The yellow highlight on Saturday has been removed, leaving only the period from hour 8 to hour 18 for Friday. The red 'X' icon is still present in the cell for Friday, hour 18, hour 19. An 'Apply' button is at the bottom right.

System Log

The router keeps a running log of events. This log can be sent to a Syslog server, and sent to your email address. In the Management menu on the bar on the top of the page, click **System Log**.

SysLog Settings

Enable Logging to Syslog Server: Check this box to send the router logs to a SysLog Server.

If Logging to the Syslog Server is **Enabled**:

Syslog Server IP Address: Enter the IP address for the Syslog server. If the Syslog server is connected to the extender, select it from the drop-down menu to automatically populate the field.

Email Settings

Enable Email Notification: If you want the logs to be automatically sent to an email address, enable this option.

If Email notification is **Enabled**:

From E-mail Address: Enter the email address your SysLog messages will be sent from.

To E-mail Address: Enter the email address your SysLog messages will be sent to.

SMTP Server Address: Enter your SMTP server address.

SMTP Server Port: Enter your SMTP server port.

Enable Authentication: Check this box if your SMTP server requires authentication.

System Log (continued)

Account Name: Enter your SMTP account name.

Password: Enter your SMTP account name's password.

E-mail Log When Full or On Schedule	
Send When Log Full:	<input checked="" type="checkbox"/>
Send on Schedule:	<input checked="" type="checkbox"/>
Schedule:	Always Enable

E-mail Log When Full or On Schedule

Send On Schedule: If email notification is enabled, this option will set the router to send the log by email when the log is full.

Schedule: This option can be enabled to send an email according to a preconfigured schedule. See below.

If you enable **On Schedule** is enabled, use the drop-down menu to select the time schedule that the rule will be enabled on. The schedule may be set to **Always Enable**, or you can create your own schedules in the **Schedules** section. Refer to 75 for more information.

Click **Save** when you are done.

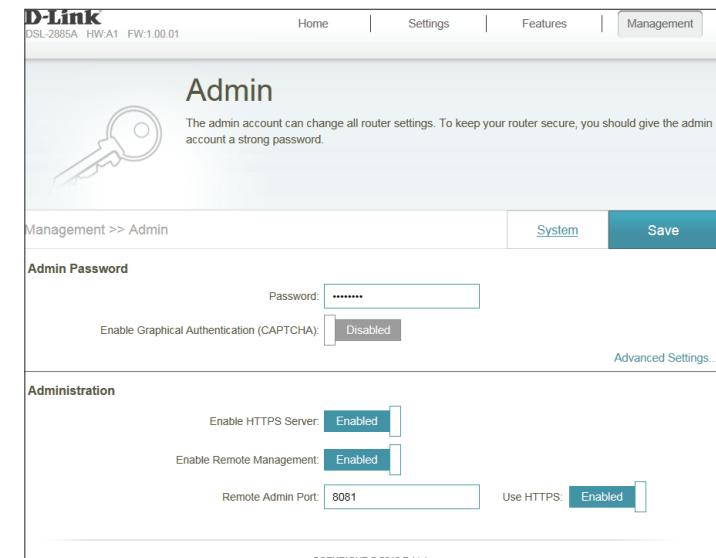

Admin

This page will allow you to change the administrator (Admin) password and enable remote management. In the Management menu on the bar on the top of the page, click **Admin**. To load, save, reset settings, or reboot the router, click **System** and refer to 75.

Admin Password

Password: Enter a new password for the administrator account. You will need to enter this password whenever you configure the router using a web browser.

Enable Graphical Authentication (CAPTCHA): Enables a challenge-response test to require users to type letters or numbers from a distorted image displayed on the screen to prevent online hackers and unauthorized users from gaining access to your router's network settings.

Advanced Settings - Administration

Enable HTTPS Server: Check to enable HTTPS to connect to the router securely. Instead of using **http://dlinkrouter.local./**, you must use **https://dlinkrouter.local./** in order to connect to the router.

Enable Remote Management: Remote management allows the DSL-2885A to be configured from the Internet by a web browser. A password is still required to access the web management interface.

Remote Admin Port: The port number used to access the DSL-2885A is used in the URL. Example: **http://x.x.x.x:8080** where x.x.x.x is the Internet IP address of the DSL-2885A and 8080 is the port used for the web management interface. **Note:** If you enabled **HTTPS Server** and wish to access the router remotely and securely, you must enter **https://** at the beginning of the address.

Click **Save** when you are done.

System

This page allows you to save the router's current configuration, load a previously saved configuration, reset the router to its factory default settings, or reboot the router.

From the Admin page, click **System**. To return to the Admin page, click **Admin**.

System

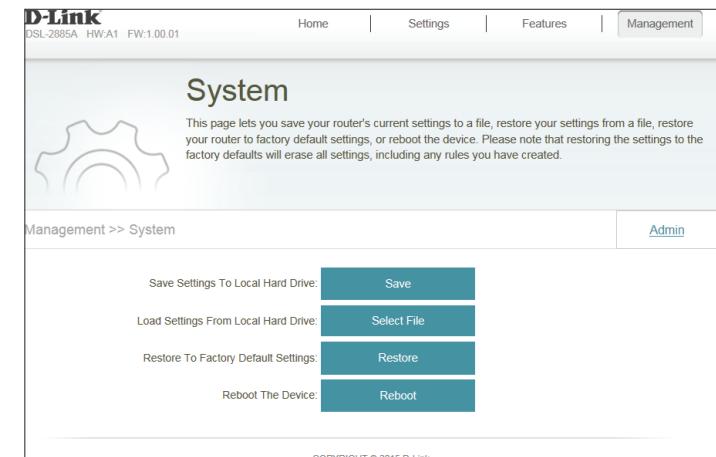

Save Settings To Local Hard Drive: This option will save the current router configuration settings to a file on your computer.

Load Settings From Local Hard Drive: This option will load a previously saved router configuration file. This will overwrite the router's current configuration.

Restore To Factory Default Settings: This option will restore all configuration settings back to the settings that were in effect at the time the router was shipped from the factory. Any settings that have not been saved will be lost, including any rules that you have created. If you want to save the current router configuration settings, use the **Save Settings To Local Hard Drive** button above.

Reboot The Device: Click to reboot the router immediately.

Click **Save** when you are done.

Upgrade

This page will allow you to upgrade the router's firmware or language pack, either automatically or manually. To manually upgrade the firmware or language pack, you must first download the relevant file from <http://support.dlink.com>.

In the Management menu on the bar on the top of the page, click **Upgrade**.

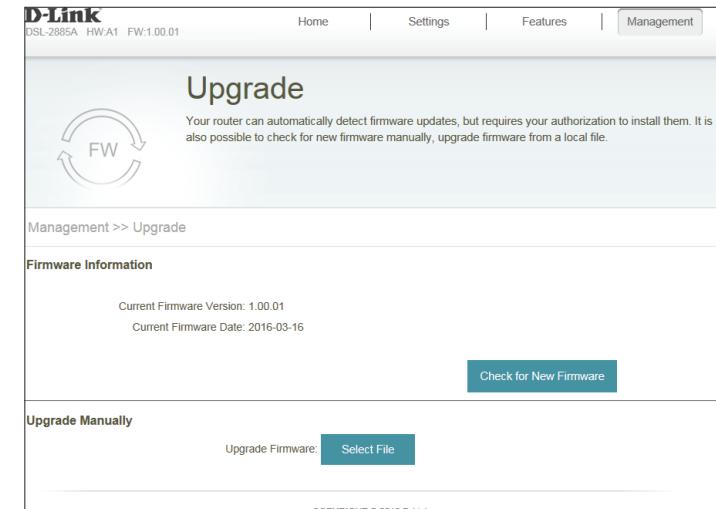

Firmware

Firmware Information: The current firmware's version and date will be displayed.

Check for New Firmware: Click this button to prompt the router to automatically check for a new firmware version. If a newer version is found, it will prompt you to install it.

Upgrade Manually

Upgrade Firmware: If you wish to upgrade manually, first download the firmware file you wish to upgrade to. Next, click the **Upgrade Firmware** button and browse to the file to install the new firmware. You can also browse to a language pack file to install a new language pack.

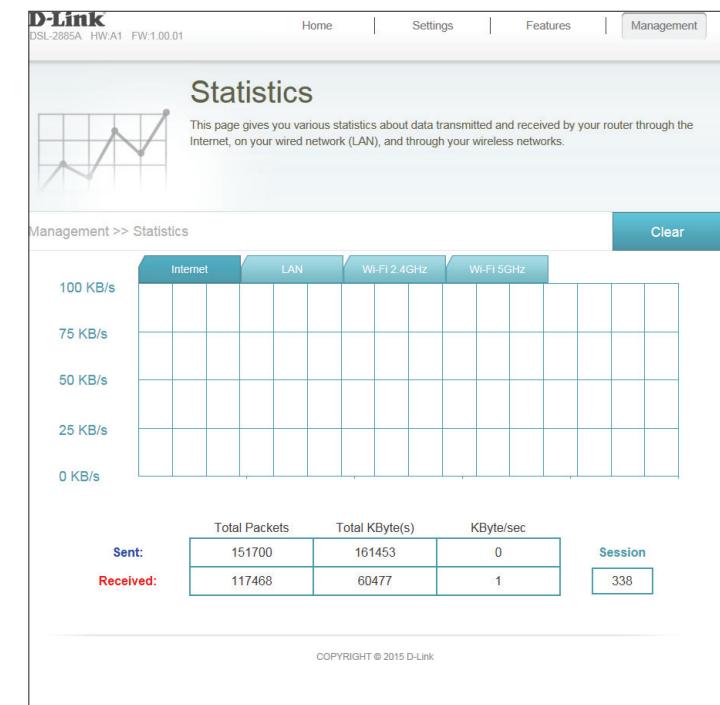

Statistics

This page gives you various statistics about data transmitted and received by your router through the Internet, on your wired network (LAN), and through your wireless networks. To access this page, click **Statistics** from the **Management** menu on the bar on the top of the page.

You can view the statistics of the **Internet**, **LAN**, **Wi-Fi 2.4 GHz**, or **Wi-Fi 5 GHz** by clicking on their respective tabs at the top of the graph. The graph will update in real time. The table at the bottom of the page displays the total number of packets and data sent and received since the DSL-2885A was booted. The current amount of traffic being sent and received, measured in KByte/sec is displayed, along with the current number of sessions.

To clear the information on the graph, click **Clear**.

The traffic counter will reset if the device is rebooted.

Connect a Wireless Client to your Router

WPS Button

The easiest and most secure way to connect your wireless devices to the router is with WPS (Wi-Fi Protected Setup). Most wireless devices such as wireless adapters, media players, Blu-ray DVD players, wireless printers and cameras will have a WPS button (or a software utility with WPS) that you can press to connect to the DSL-2885A router. Please refer to your user manual for the wireless device you want to connect to make sure you understand how to enable WPS. Once you know, follow the steps below:

Step 1 - Press the WPS button on the DSL-2885A for about 1 second. The WPS LED on the front will start to blink.

Step 2 - Within 2 minutes, press the WPS button on your wireless device (or launch the software utility and start the WPS process).

Step 3 - Allow up to 1 minute for your connection to be configured. Once the WPS LED stops blinking, you will be connected and your wireless connection will be secure with WPA2.

Windows® 10

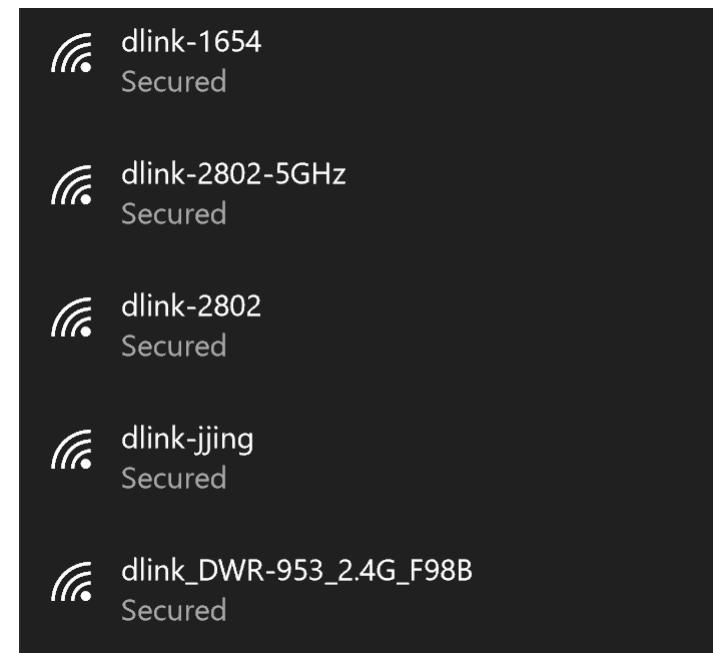

When connecting to the DSL-2885A wirelessly for the first time, you will need to input the wireless network name (SSID) and Wi-Fi password (security key) of the device you are connecting to. If your product has a Wi-Fi configuration card, you can find the default network name and Wi-Fi password here. Otherwise refer to the product label for the default Wi-Fi network SSID and password, or enter the Wi-Fi credentials set during the product configuration.

To join an existing network, locate the wireless network icon in the taskbar, next to the time display and click on it.

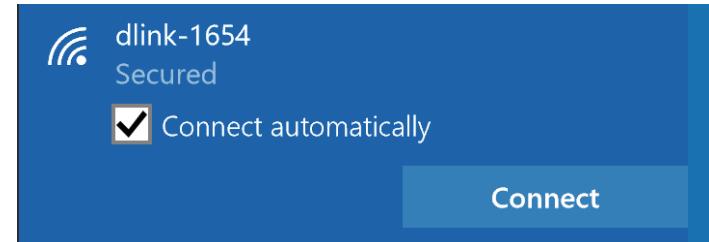

Wireless Icon

Clicking on this icon will display a list of wireless networks which are within range of your computer. Select the desired network by clicking on the SSID.

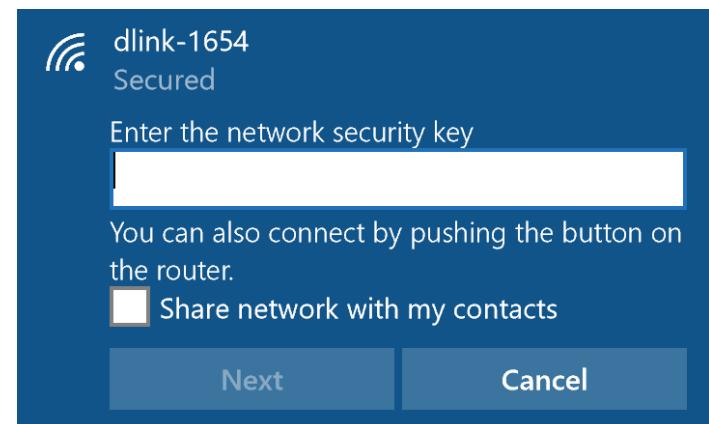

To connect to the SSID, click **Connect**.

To automatically connect with the router when your device next detects the SSID, click the **Connect Automatically** check box.

You will then be prompted to enter the Wi-Fi password (network security key) for the wireless network. Enter the password into the box and click **Next** to connect to the network. Your computer will now automatically connect to this wireless network when it is detected.

You can also use Wi-Fi Protected Setup (WPS) to connect to the router. Press the WPS button on your D-Link device and you will be automatically connected.

Windows® 8

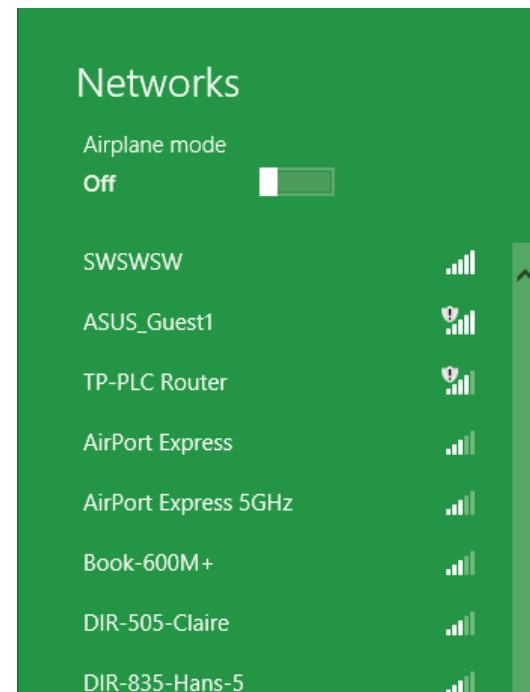

WPA/WPA2

It is recommended that you enable wireless security (WPA/WPA2) on your wireless router or access point before configuring your wireless adapter. If you are joining an existing network, you will need to know the security key (Wi-Fi password) being used.

To join an existing network, locate the wireless network icon in the taskbar next to the time display.

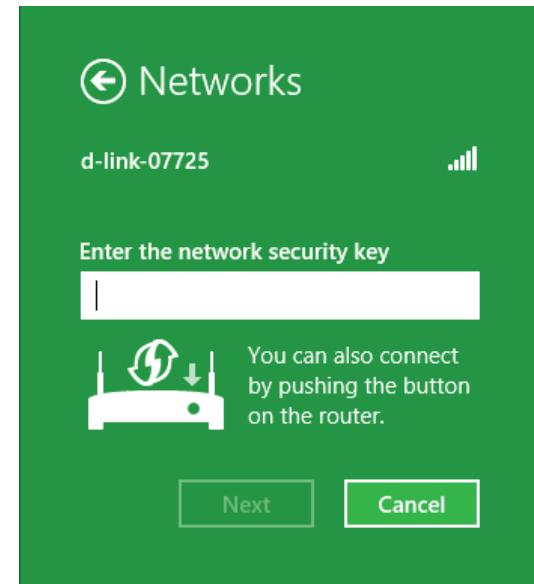

Clicking on this icon will display a list of wireless networks that are within connecting proximity of your computer. Select the desired network by clicking on the network name.

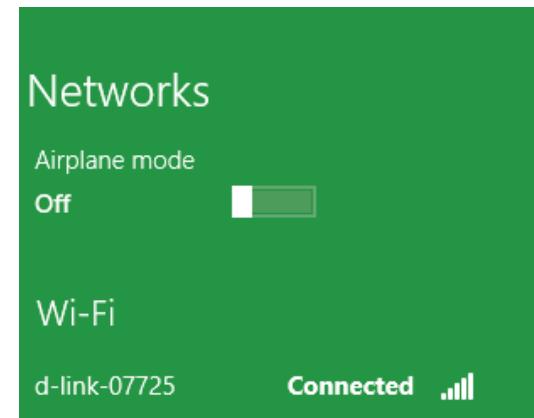

You will then be prompted to enter the network security key (Wi-Fi password) for the wireless network. Enter the password into the box and click **Next**.

If you wish to use Wi-Fi Protected Setup (WPS) to connect to the router, you can also press the WPS button on your router during this step to enable the WPS function.

When you have established a successful connection to a wireless network, the word **Connected** will appear next to the name of the network to which you are connected to.

Windows® 7

WPA/WPA2

It is recommended that you enable wireless security (WPA/WPA2) on your wireless router or access point before configuring your wireless adapter. If you are joining an existing network, you will need to know the security key or passphrase being used.

1. Click on the wireless icon in your system tray (lower-right corner).

2. The utility will display any available wireless networks in your area.

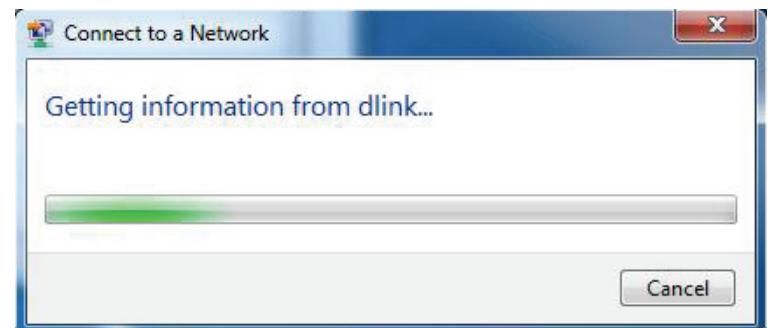

3. Highlight the wireless connection with Wi-Fi name (SSID) you would like to connect to and click the **Connect** button.

If you get a good signal but cannot access the Internet, check your TCP/IP settings for your wireless adapter. Refer to the Networking Basics section in this manual for more information.

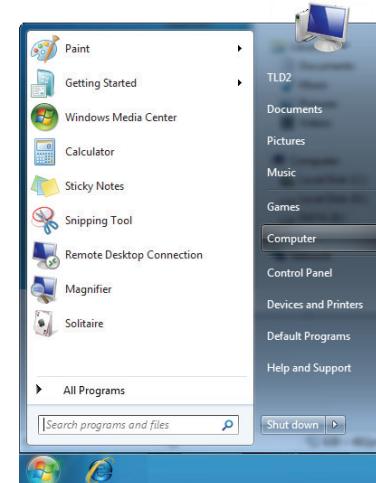

4. The following window appears while your computer tries to connect to the router.

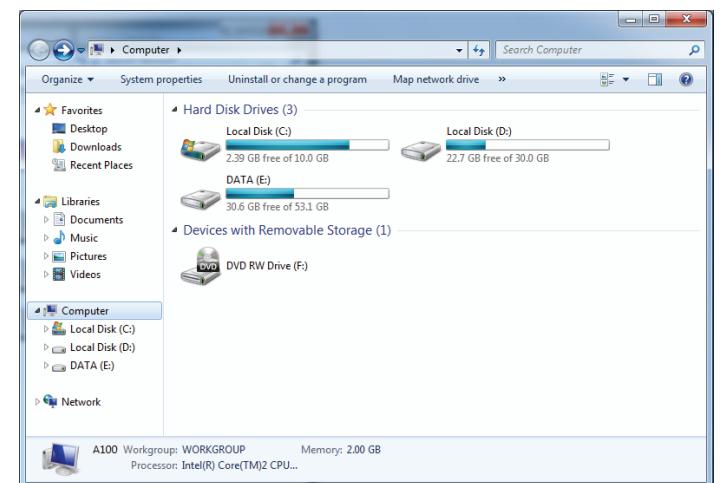

WPS

The WPS feature of the DSL-2885A can be configured using Windows® 7. Carry out the following steps to use Windows® 7 to configure the WPS feature:

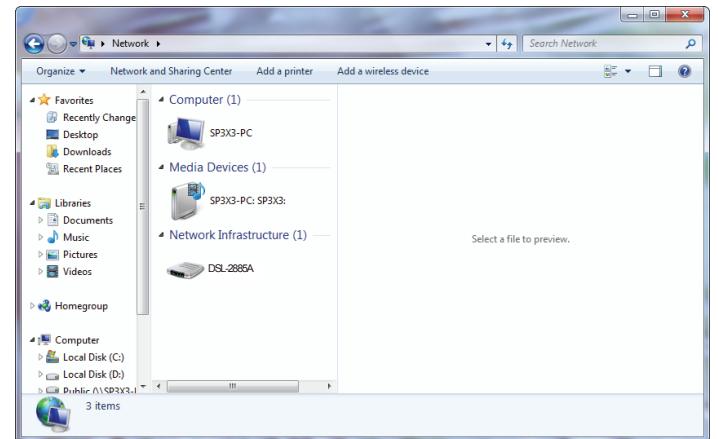

1. Click the **Start** button and select **Computer** from the Start menu.

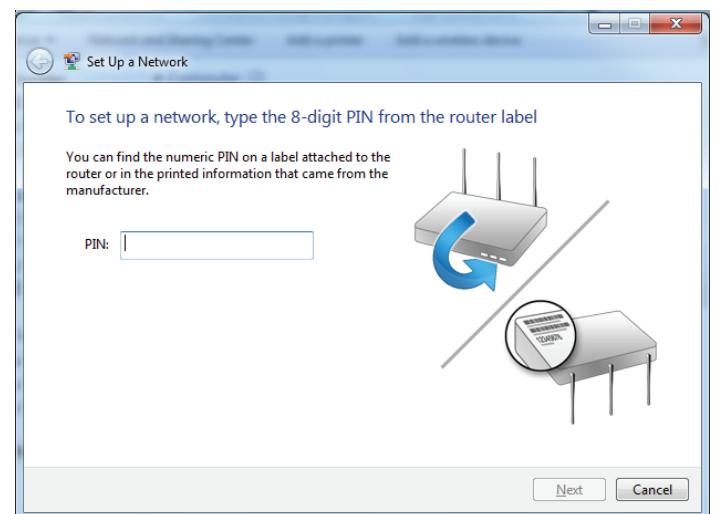

2. Click **Network** on the left side.

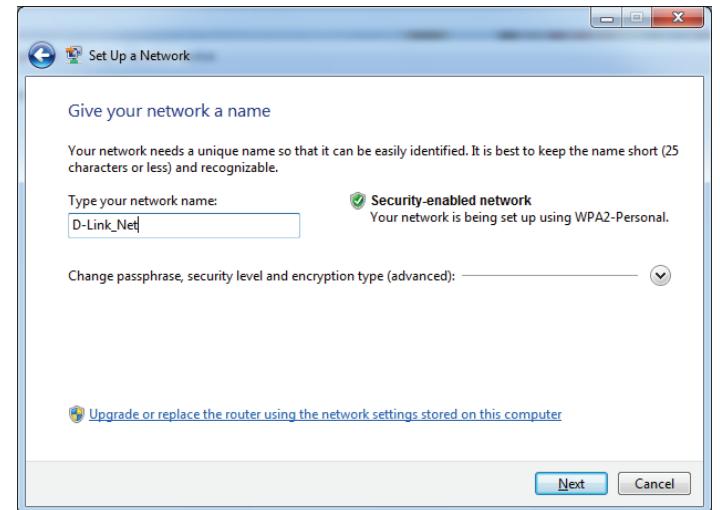

3. Double-click the DSL-2885A.

4. Input the WPS PIN number (on the router label) in the **Setup > Wireless Setup** menu in the Router's Web UI and click **Next**.

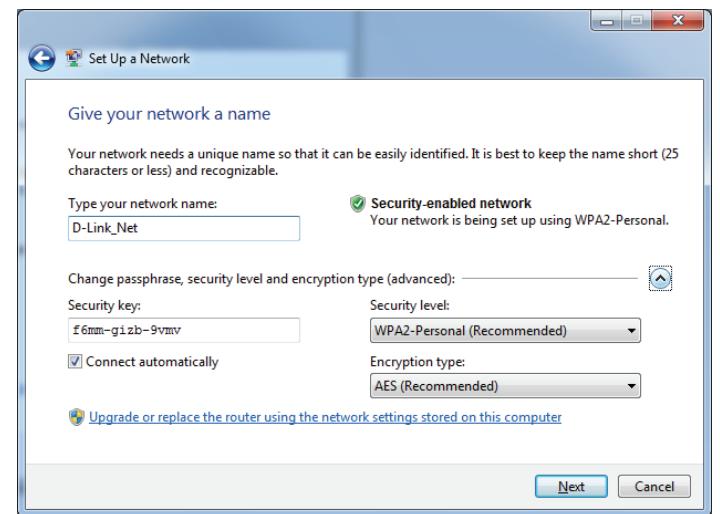

5. Type a name to identify the network.

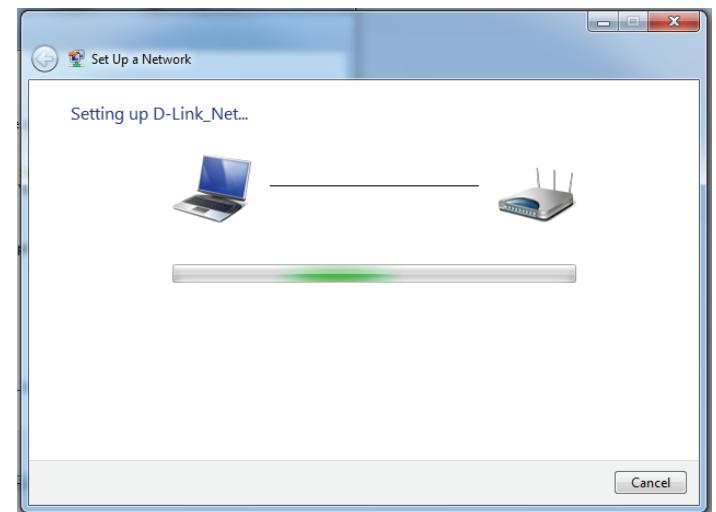

6. To configure advanced settings, click the icon.

Click **Next** to continue.

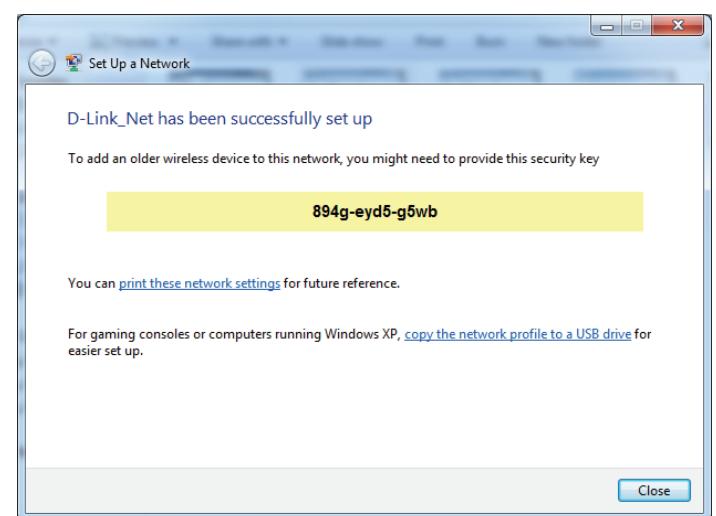

7. The following window appears while the DSL-2885A is being configured.

Wait for the configuration to complete.

8. The following window informs you that WPS on the DSL-2885A has been set up successfully.

Make a note of the security key as you may need to provide this security key if adding an older wireless device to the network in the future.

9. Click **Close** to complete WPS setup.

Windows Vista®

Windows Vista® users may use the built-in wireless utility. If you are using another company's wireless utility, please refer to the user manual of your wireless adapter for help connecting to a wireless network. Most wireless utilities will have a "site survey" option similar to the Windows Vista® utility as seen below.

If you receive the **Wireless Networks Detected** bubble, click on the center of the bubble to access the utility.

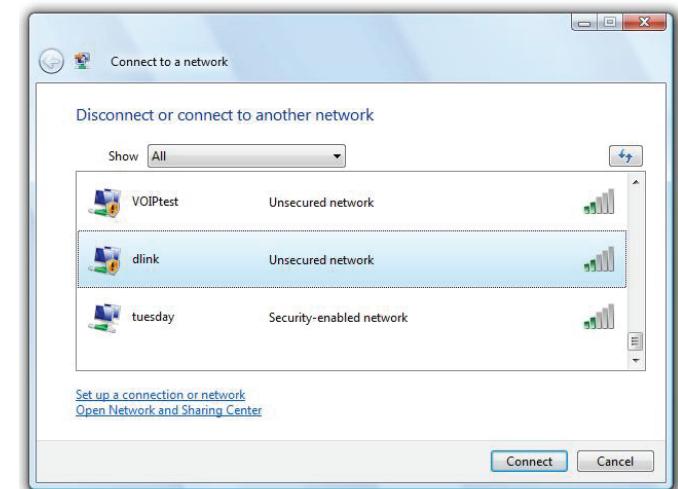

or

Right-click on the wireless computer icon in your system tray (lower-right corner next to the time). Select **Connect to a network**.

The utility will display any available wireless networks in your area. Click on a network (displayed using the SSID) and click the **Connect** button.

If you get a good signal but cannot access the Internet, check your TCP/IP settings for your wireless adapter. Refer to the **Networking Basics** section in this manual for more information.

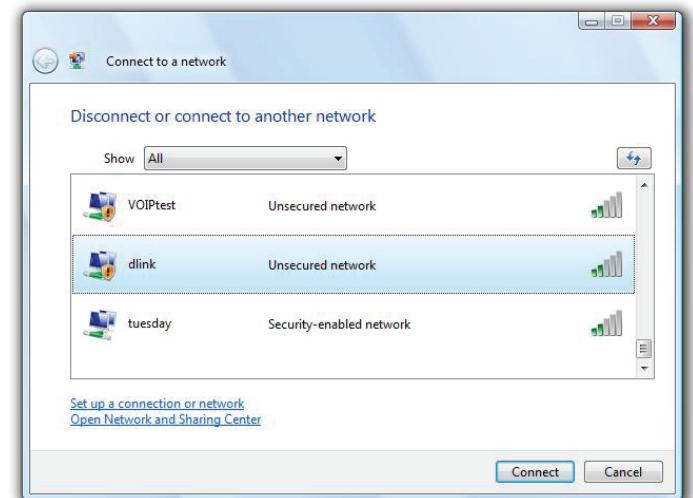

WPA/WPA2

It is recommended that you enable wireless security (WPA/WPA2) on your wireless router or access point before configuring your wireless adapter. If you are joining an existing network, you will need to know the security key or passphrase being used.

1. Open the Windows Vista® Wireless Utility by right-clicking on the wireless computer icon in your system tray (lower right corner of screen). Select **Connect to a network**.

2. Highlight the Wi-Fi name (SSID) you would like to connect to and click **Connect**.

3. Enter the same security key or passphrase (Wi-Fi password) that is on your router and click **Connect**.

It may take 20-30 seconds to connect to the wireless network. If the connection fails, please verify that the security settings are correct. The key or passphrase must be exactly the same as the one on the wireless router.

Troubleshooting

This chapter provides solutions to problems that can occur during the installation and operation of the DSL-2885A. Read the following descriptions if you are having problems. The examples below are illustrated in Windows® XP. If you have a different operating system, the screenshots on your computer will look similar to these examples.

1. Why can't I access the web-based configuration utility?

When entering the IP address of the D-Link router (**192.168.0.1** for example), you are not connecting to a website, nor do you have to be connected to the Internet. The device has the utility built-in to a ROM chip in the device itself. Your computer must be on the same IP subnet to connect to the web-based utility.

- Make sure you have an updated Java-enabled web browser. We recommend the following:
 - Microsoft Internet Explorer® 10 or higher
 - Microsoft EDGE Browser 20 or higher
 - Mozilla Firefox 11 or higher
 - Google™ Chrome 17 or higher
 - Apple Safari 5 or higher
- Verify physical connectivity by checking for solid link lights on the device. If you do not get a solid link light, try using a different cable, or connect to a different port on the device if possible. If the computer is turned off, the link light may not be on.
- Disable any Internet security software running on the computer. Software firewalls such as ZoneAlarm, BlackICE, Sygate, Norton Personal Firewall, and Windows® XP firewall may block access to the configuration pages. Check the help files included with your firewall software for more information on disabling or configuring it.

- Configure your Internet settings:
 - Go to **Start > Settings > Control Panel**. Double-click the **Internet Options** Icon. From the **Security** tab, click the button to restore the settings to their defaults.
 - Click the **Connection** tab and set the dial-up option to Never Dial a Connection. Click the LAN Settings button. Make sure nothing is checked. Click **OK**.
 - Go to the **Advanced** tab and click the button to restore these settings to their defaults. Click **OK** three times.
 - Close your web browser (if open) and open it.
- Access the web management. Open your web browser and enter the IP address of your D-Link router in the address bar. This should open the login page for your web management.
- If you still cannot access the configuration, unplug the power to the router for 10 seconds and plug back in. Wait about 30 seconds and try accessing the configuration. If you have multiple computers, try connecting using a different computer.

2. What can I do if I forgot my password?

If you forgot your password, you must reset your router. This process will change all your settings back to the factory defaults.

To reset the router, locate the reset button (hole) on the rear panel of the unit. With the router powered on, use a paperclip to hold the button down for 10 seconds. Release the button and the router will go through its reboot process. Wait about 30 seconds to access the router. The default IP address is **192.168.0.1**. When logging in, leave the password box empty.

3. Why can't I connect to certain sites or send and receive emails when connecting through my router?

If you are having a problem sending or receiving email, or connecting to secure sites such as eBay, banking sites, and Hotmail, we suggest lowering the MTU in increments of ten (Ex. 1492, 1482, 1472, etc).

To find the proper MTU Size, you'll have to do a special ping of the destination you're trying to go to. A destination could be another computer, or a URL.

- Click on **Start** and then click **Run**.
- Windows® 95, 98, and Me users type in **command** (Windows® NT, 2000, XP, Vista®, and 7 users type in **cmd**) and press **Enter** (or click **OK**).
- Once the window opens, you'll need to do a special ping. Use the following syntax:

ping [url] [-f] [-l] [MTU value]

Example: **ping yahoo.com -f -l 1472**

```
C:\>ping yahoo.com -f -l 1482
Pinging yahoo.com [66.94.234.13] with 1482 bytes of data:
Packet needs to be fragmented but DF set.

Ping statistics for 66.94.234.13:
    Packets: Sent = 4, Received = 0, Lost = 4 (100% loss),
Approximate round trip times in milli-seconds:
    Minimum = 0ms, Maximum = 0ms, Average = 0ms

C:\>ping yahoo.com -f -l 1472
Pinging yahoo.com [66.94.234.13] with 1472 bytes of data:
Reply from 66.94.234.13: bytes=1472 time=93ms TTL=52
Reply from 66.94.234.13: bytes=1472 time=109ms TTL=52
Reply from 66.94.234.13: bytes=1472 time=125ms TTL=52
Reply from 66.94.234.13: bytes=1472 time=203ms TTL=52

Ping statistics for 66.94.234.13:
    Packets: Sent = 4, Received = 4, Lost = 0 (0% loss),
Approximate round trip times in milli-seconds:
    Minimum = 93ms, Maximum = 203ms, Average = 132ms

C:\>
```

You should start at 1472 and work your way down by 10 each time. Once you get a reply, go up by 2 until you get a fragmented packet. Take that value and add 28 to the value to account for the various TCP/IP headers. For example, lets say that 1452 was the proper value, the actual MTU size would be 1480, which is the optimum for the network we're working with ($1452+28=1480$).

Once you find your MTU, you can now configure your router with the proper MTU size.

To change the MTU rate on your router follow the steps below:

- Open your browser, enter the IP address of your router (192.168.0.1) and click **OK**.
- Enter your username (admin) and password (blank by default). Click **OK** to enter the web configuration page for the device.
- Click on **Setup** and then click **Manual Configure**.
- To change the MTU, enter the number in the MTU field and click **Save Settings** to save your settings.
- Test your email. If changing the MTU does not resolve the problem, continue changing the MTU in increments of ten.

Wireless Basics

D-Link wireless products are based on industry standards to provide easy-to-use and compatible high-speed wireless connectivity within your home, business, or public access wireless networks. Strictly adhering to the IEEE standard, the D-Link wireless family of products will allow you to securely access the data you want, when, and where you want it. You will be able to enjoy the freedom that wireless networking delivers.

A wireless local area network (WLAN) is a cellular computer network that transmits and receives data with radio signals instead of wires. Wireless LANs are used increasingly in both home and office environments, and public areas such as airports, coffee shops and universities. Innovative ways to utilize WLAN technology are helping people work, and communicate more efficiently. Increased mobility and the absence of cabling and other fixed infrastructure have proven to be beneficial for many users.

Wireless users can use the same applications they use on a wired network. Wireless adapter cards used on laptop and desktop systems support the same protocols as Ethernet adapter cards.

Under many circumstances, it may be desirable for mobile network devices to link to a conventional Ethernet LAN in order to use servers, printers or an Internet connection supplied through the wired LAN. A wireless router is a device used to provide this link.

What is Wireless?

Wireless or Wi-Fi technology is another way of connecting your computer to the network without using wires. Wi-Fi uses radio frequency to connect wirelessly so you have the freedom to connect computers anywhere in your home or office network.

Why D-Link Wireless?

D-Link is the worldwide leader and award winning designer, developer, and manufacturer of networking products. D-Link delivers the performance you need at a price you can afford. D-Link has all the products you need to build your network.

How does wireless work?

Wireless works similarly to how cordless phones work, through radio signals that transmit data from one point A to point B. But wireless technology has restrictions as to how you can access the network. You must be within the wireless network range area to be able to connect your computer. There are two different types of wireless networks: Wireless Local Area Network (WLAN), and Wireless Personal Area Network (WPAN).

Wireless Local Area Network (WLAN)

In a wireless local area network, a device called an Access Point (AP) connects computers to the network. The access point has a small antenna attached to it, which allows it to transmit data back and forth over radio signals. With an indoor access point the signal can travel up to 300 feet. With an outdoor access point the signal can reach out up to 30 miles to serve places like manufacturing plants, industrial locations, university and high school campuses, airports, golf courses, and many other outdoor venues.

Wireless Personal Area Network (WPAN)

Bluetooth is the industry standard wireless technology used for WPAN. Bluetooth devices in WPAN operate in a range up to 30 feet away.

Compared to WLAN the speed and wireless operation range are both less than WLAN, but in return it doesn't use nearly as much power. This makes it ideal for personal devices, such as mobile phones, PDAs, headphones, laptops, speakers, and other devices that operate on batteries.

Who uses wireless?

Wireless technology has become so popular in recent years that almost everyone is using it, whether it's for home, office, business, D-Link has a wireless solution for it.

Home Uses/Benefits

- Gives everyone at home broadband access
- Surf the web, check email, instant message, etc.
- Gets rid of the cables around the house
- Simple and easy to use

Small Office and Home Office Uses/Benefits

- Stay on top of everything at home as you would at office
- Remotely access your office network from home
- Share Internet connection and printer with multiple computers
- No need to dedicate office space

Where is wireless used?

Wireless technology is expanding everywhere, not just at home or office. People like the freedom of mobility and it's becoming so popular that more and more public facilities now provide wireless access to attract people. The wireless connection in public places is usually called "hotspots".

Using a D-Link USB adapter with your laptop, you can access the hotspot to connect to the Internet from remote locations like: airports, hotels, coffee shops, libraries, restaurants, and convention centers.

Wireless network is easy to setup, but if you're installing it for the first time it could be quite a task not knowing where to start. That's why we've put together a few setup steps and tips to help you through the process of setting up a wireless network.

Tips

Here are a few things to keep in mind, when you install a wireless network.

Centralize your router or access point

Make sure you place the router/access point in a centralized location within your network for the best performance. Try to place the router/access point as high as possible in the room, so the signal gets dispersed throughout your home. If you have a two-story home, you may need a repeater to boost the signal to extend the range.

Eliminate Interference

Place home appliances such as cordless telephones, microwaves, and televisions as far away as possible from the router/access point. This would significantly reduce any interference that the appliances might cause since they operate on same frequency.

Security

Don't let your next-door neighbors or intruders connect to your wireless network. Secure your wireless network by turning on the WPA or WEP security feature on the router. Refer to the product manual for detail information on how to set it up.

Wireless Modes

There are basically two modes of networking:

- **Infrastructure** – All wireless clients will connect to an access point or wireless router.
- **Ad-hoc** – Directly connecting to another computer for peer-to-peer communication using wireless network adapters on each computer, such as two or more DSL-2885A wireless network USB adapters.

An Infrastructure network contains an access point or wireless router. All the wireless devices, or clients, will connect to the wireless router or access point.

An Ad-hoc network contains only clients, such as laptops with wireless USB adapters. All the adapters must be in Ad-hoc mode to communicate.

Networking Basics

Check your IP address

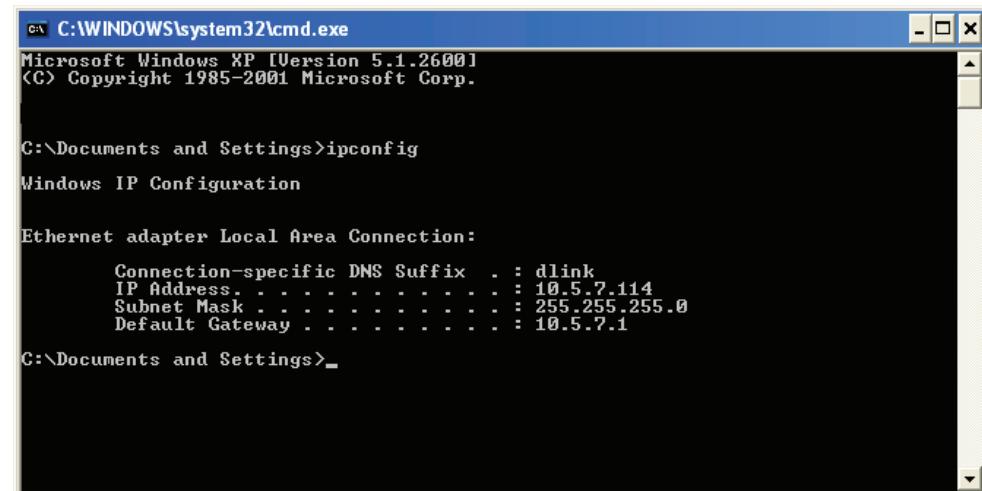

After you install your new D-Link adapter, by default, the TCP/IP settings should be set to obtain an IP address from a DHCP server (i.e. wireless router) automatically. To verify your IP address, please follow the steps below.

Click on **Start > Run**. In the run box type **cmd** and click **OK**. (Windows® 7/Vista® users type **cmd** in the **Start Search** box.)

At the prompt, type **ipconfig** and press **Enter**.

This will display the IP address, subnet mask, and the default gateway of your adapter.

If the address is 0.0.0.0, check your adapter installation, security settings, and the settings on your router. Some firewall software programs may block a DHCP request on newly installed adapters.

The screenshot shows a Microsoft Windows XP Command Prompt window titled 'C:\WINDOWS\system32\cmd.exe'. The window displays the following text:

```
Microsoft Windows XP [Version 5.1.2600]
(C) Copyright 1985-2001 Microsoft Corp.

C:\Documents and Settings>ipconfig
Windows IP Configuration

Ethernet adapter Local Area Connection:
      Connection-specific DNS Suffix . : dlink
      IP Address . . . . . : 10.5.7.114
      Subnet Mask . . . . . : 255.255.255.0
      Default Gateway . . . . . : 10.5.7.1

C:\Documents and Settings>
```

Statically Assign an IP address

If you are not using a DHCP capable gateway/router, or you need to assign a static IP address, please follow the steps below:

Step 1

Windows® 7 - Click on **Start > Control Panel > Network and Internet > Network and Sharing Center**.

Windows Vista® - Click on **Start > Control Panel > Network and Internet > Network and Sharing Center > Manage Network**

Connections.

Windows® XP - Click on **Start > Control Panel > Network Connections**.

Windows® 2000 - From the desktop, right-click **My Network Places > Properties**.

Step 2

Right-click on the **Local Area Connection** which represents your network adapter and select **Properties**.

Step 3

Highlight **Internet Protocol (TCP/IP)** and click **Properties**.

Step 4

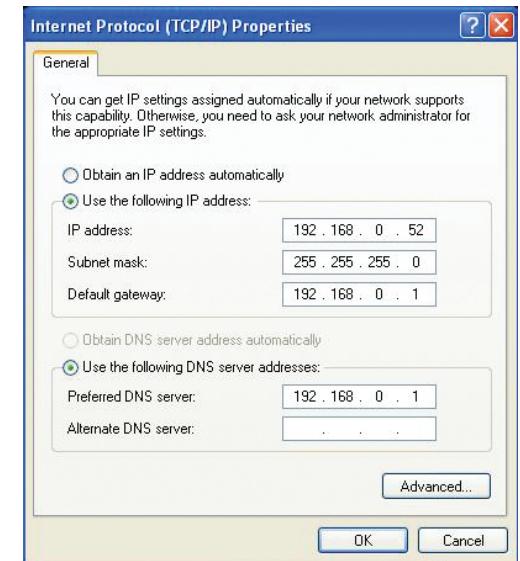

Click **Use the following IP address** and enter an IP address that is on the same subnet as your network or the LAN IP address on your router.

Example: If the router's LAN IP address is 192.168.0.1, make your IP address 192.168.0.X where X is a number between 2 and 99. Make sure that the number you choose is not in use on the network. Set the Default Gateway the same as the LAN IP address of your router (I.E. 192.168.0.1).

Set Primary DNS the same as the LAN IP address of your router (192.168.0.1). The Secondary DNS is not needed or you may enter a DNS server from your ISP.

Step 5

Click **OK** twice to save your settings.

Wireless Security

This section will show you the different levels of security you can use to protect your data from intruders. The DSL-2885A offers the following types of security:

- WPA2 (Wi-Fi Protected Access 2)
- WPA (Wi-Fi Protected Access)
- WPA2-PSK (Pre-Shared Key)
- WPA-PSK (Pre-Shared Key)

What is WPA?

WPA (Wi-Fi Protected Access), is a Wi-Fi standard that was designed to improve the security features of WEP (Wired Equivalent Privacy).

The 2 major improvements over WEP:

- Improved data encryption through the Temporal Key Integrity Protocol (TKIP). TKIP scrambles the keys using a hashing algorithm and by adding an integrity-checking feature, ensures that the keys haven't been tampered with. WPA2 is based on 802.11i and uses Advanced Encryption Standard (AES) instead of TKIP.
- User authentication, which is generally missing in WEP, through the extensible authentication protocol (EAP). WEP regulates access to a wireless network based on a computer's hardware-specific MAC address, which is relatively simple to be sniffed out and stolen. EAP is built on a more secure public-key encryption system to ensure that only authorized network users can access the network.

WPA-PSK/WPA2-PSK uses a passphrase or key to authenticate your wireless connection. The key is an alpha-numeric password between 8 and 63 characters long. The password can include symbols (!?*&_) and spaces. This key must be the exact same key entered on your wireless router or access point.

WPA/WPA2 incorporates user authentication through the Extensible Authentication Protocol (EAP). EAP is built on a more secure public key encryption system to ensure that only authorized network users can access the network.

Technical Specifications

Device Interfaces

- One RJ-11 xDSL port
- 802.11 ac/n/g/b Wireless LAN
- One 10/100/1000 Gigabit WAN port
- Four 10/100/1000 Gigabit LAN ports
- Two USB 2.0 ports

Antenna Types

- Three external removable MIMO antennas

Standards

- IEEE 802.11ac
- IEEE 802.11n
- IEEE 802.11g
- IEEE 802.11b
- IEEE 802.11a
- IEEE 802.3
- IEEE 802.3u
- IEEE 802.3ab
- IEEE 802.3az
- IEEE 802.3x

Security

- WPA™ - Personal/Enterprise
- WPA2™ - Personal/Enterprise
- Wi-Fi Protected Setup (WPS) PIN/PBC

Note:

- Maximum wireless signal rate derived from IEEE Standard 802.11g, 802.11n, and 802.11ac specifications. Actual data throughput will vary. Network conditions and environmental factors, including volume of network traffic, building materials and construction, and network overhead, lower actual data throughput rate. Environmental factors will adversely affect wireless signal range.
- Frequency Range varies depending on country's regulation.

Power

- Input: 100 to 240 V AC, 50/60 Hz
- Output: 12 V DC, 2 A

Operating Temperature

- 0 to 45 °C (32 to 113 °F)

Storage Temperature

- -20 to 70 °C (-4 to 158 °F)

Operating Humidity

- 10% to 95% maximum (non-condensing)

Certifications

- CE
- FCC
- LVD
- RCM

Dimensions

- 230 mm (9.05 inches)
- 155 mm (6.10 inches)
- 37 mm (1.45 inches)

Weight

- 523 grams (1.15 pounds)

Regulatory Statements

Federal Communication Commission Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Non-modifications Statement:

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

Caution:

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This device and its antenna(s) must not be co-located or operating in conjunction with any other antenna or transmitter except in accordance with FCC multi-transmitter product procedures. For product available in the USA/Canada market, only channel 1~11 can be operated. Selection of other channels is not possible.

Note

The country code selection is for non-USA models only and is not available to all USA models. Per FCC regulations, all WiFi product marketed in the USA must be fixed to USA operational channels only.

RF Frequency Requirements

This device is for indoor use only when using all channels in the 5.150 GHz-5.250 GHz, 5.250 GHz-5.350 GHz, 5.470 GHz-5.725 GHz, and 5.725 GHz-5.850 GHz frequency range. High power radars are allocated as primary users of the 5.150 GHz-5.250 GHz, 5.250 GHz-5.350 GHz, 5.470 GHz-5.725 GHz, and 5.725 GHz-5.850 GHz bands. These radar stations can cause interference with and/or damage this device. This device will not operate on channels which overlap the 5600-5650 MHz band.

It is restricted to indoor environments only.

IMPORTANT NOTICE:

FCC Radiation Exposure Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 25 cm between the radiator and your body.

Customer Information:

- (1) This equipment complies with Part 68 of the FCC rules and the requirements adopted by the ACTA. On bottom of this equipment is a label that contains, among other information, a product identifier of TBC If requested, this number must be provided to the telephone company.
- (2) If this equipment Wireless AC1200 Dual-Band Gigabit ADSL2+/VDSL2 Modem Router causes harm to the telephone network, the telephone company will notify you in advance that temporary discontinuance of service may be required. But if advance notice isn't practical, the telephone company will notify the customer as soon as possible. Also you will be advised of your right to file a complaint with the FCC if you believe it is necessary.
- (3) The telephone company may make changes in its facilities, equipment, operations or procedures that could affect the operation of the equipment. If this happens, the telephone company will provide advance notice in order for you to make necessary modification to maintain uninterrupted service.
- (4) If you experience trouble with this equipment, disconnect it from the network until the problem has been corrected or until you are sure that the equipment is not malfunctioning.
- (5) Please follow instructions for repairing, if any (e.g. battery replacement section); otherwise do not alternate or repair any parts of device except specified.
- (6) Connection to party line service is subject to state tariffs. Contact the state public utility commission, public service commission or corporation commission for information.
- (7) If the telephone company requests information on what equipment is connected to their lines, inform them of:
 - (a) The telephone number that this unit is connected to,
 - (b) The ringer equivalence number 0,

- (c) The USOC jack required 0, and
- (d) The FCC Registration Number TBC

Items (b) and (d) are indicated on the label. The ringer equivalence number (REN) is used to determine how many devices can be connected to your telephone line. In most areas, the sum of the RENs of all devices on any one line should not exceed five (5.0). If too many devices are attached, they may not ring properly.

(8) If your home has specially wired alarm equipment connected to the telephone line, ensure the installation of this equipment does not disable alarm equipment, consult your telephone company or a qualified installer.

	Frequency Band(s) Frequenzband Fréquence bande(s) Bandas de Frecuencia Frequenza/e Frequentie(s)	Max. Output Power (EIRP) Max. Output Power Consommation d'énergie max. Potencia máxima de Salida Potenza max. Output Max. Output Power

European Community Declaration of Conformity:

Česky [Czech]	Tímto D-Link Corporation prohlašuje, že tento produkt, jeho příslušenství a software jsou v souladu se směrnicí 2014/53/EU. Celý text ES prohlášení o shodě vydaného EU a o firmwaru produktu lze stáhnout na stránkách k produktu www.dlink.com .
Dansk [Danish]	D-Link Corporation erklærer herved, at dette produkt, tilbehør og software er i overensstemmelse med direktiv 2014/53/EU. Den fulde tekst i EU-overensstemmelseserklæringen og produktfirmware kan wnloades fra produktsiden hos www.dlink.com .
Deutsch [German]	Hiermit erklärt die D-Link Corporation, dass dieses Produkt, das Zubehör und die Software der Richtlinie 2014/53/EU entsprechen. Der vollständige Text der Konformitätserklärung der Europäischen Gemeinschaft sowie die Firmware zum Produkt stehen Ihnen zum Herunterladen von der Produktseite im Internet auf www.dlink.com zur Verfügung.
Eesti [Estonian]	Käesolevaga kinnitab D-Link Corporation, et see toode, tarvikud ja tarkvara on kooskõlas direktiiviga 2014/53/EL. Euroopa Liidu vastavusdeklaratsiooni täistekst ja toote püsivara on allalaadimiseks saadaval tootelehel www.dlink.com .
English	Hereby, D-Link Corporation, declares that this product, accessories, and software are in compliance with directive 2014/53/EU. The full text of the EU Declaration of Conformity and product firmware are available for download from the product page at www.dlink.com
Español [Spanish]	Por la presente, D-Link Corporation declara que este producto, accesorios y software cumplen con las directivas 2014/53/UE. El texto completo de la declaración de conformidad de la UE y el firmware del producto están disponibles y se pueden descargar desde la página del producto en www.dlink.com .
Ελληνική [Greek]	Με την παρούσα, η D-Link Corporation δηλώνει ότι αυτό το προϊόν, τα αξεσουάρ και το λογισμικό συμμορφώνονται με την Οδηγία 2014/53/ΕΕ. Το πλήρες κείμενο της δήλωσης συμμόρφωσης της ΕΕ και το υλικολογισμικό του προϊόντος είναι διαθέσιμα για λήψη από τη σελίδα του προϊόντος στην τοποθεσία www.dlink.com .
Français [French]	Par les présentes, D-Link Corporation déclare que ce produit, ces accessoires et ce logiciel sont conformes aux directives 2014/53/UE. Le texte complet de la déclaration de conformité de l'UE et le programme du produit sont disponibles au téléchargement sur la page des produits à www.dlink.com .
Italiano [Italian]	Con la presente, D-Link Corporation dichiara che questo prodotto, i relativi accessori e il software sono conformi alla direttiva 2014/53/UE. Il testo completo della dichiarazione di conformità UE e il firmware del prodotto sono disponibili per il download dalla pagina del prodotto su www.dlink.com .

Latviski [Latvian]	Ar šo uzņēmums D-Link Corporation apliecina, ka šis produkts, piederumi un programmatūra atbilst direktīvai 2014/53/ES. ES atbilstības deklarācijas pilno tekstu un produkta aparātprogrammatūru var lejupielādēt attiecīgā produkta lapā vietnē www.dlink.com .
Lietuvių [Lithuanian]	Šiuo dokumentu „D-Link Corporation“ pareiškia, kad šis gaminys, priedai ir programinė įranga atitinka direktyvą 2014/53/ES. Visą ES atitikties deklaracijos tekstą ir gaminio programinę aparatinę įrangą galima atsiųsti iš gaminio puslapio adresu www.dlink.com .
Nederlands [Dutch]	Hierbij verklaart D-Link Corporation dat dit product, accessoires en software voldoen aan de richtlijnen 2014/53/EU. De volledige tekst van de EU conformiteitsverklaring en productfirmware is beschikbaar voor download van de productpagina op www.dlink.com .
Malti [Maltese]	Bil-preżenti, D-Link Corporation tiddikkjara li dan il-prodott, l-accessorji, u s-software huma konformi mad-Direttiva 2014/53/UE. Tista' tniżżeż it-test shiħ tad-dikjarazzjoni ta' konformità tal-UE u l-firmware tal-prodott mill-paġna tal-prodott fuq www.dlink.com .
Magyar [Hungarian]	Ezennel a D-Link Corporation kijelenti, hogy a jelen termék, annak tartozéka és szoftvere megfelelnek a 2014/53/EU sz. rendeletek rendelkezéseinek. Az EU Megfelelőségi nyilatkozat teljes szövege és a termék firmware a termék oldaláról töltethető le a www.dlink.com címen.
Polski [Polish]	D-Link Corporation niniejszym oświadcza, że ten produkt, akcesoria oraz oprogramowanie są zgodne z dyrektywami 2014/53/EU. Pełen tekst deklaracji zgodności UE oraz oprogramowanie sprzętowe do produktu można pobrać na stronie produktu w witrynie www.dlink.com .
Português [Portuguese]	Desta forma, a D-Link Corporation declara que este produto, os acessórios e o software estão em conformidade com a diretiva 2014/53/UE. O texto completo da declaração de conformidade da UE e do firmware
Slovensko[Slovenian]	Podjetje D-Link Corporation s tem izjavlja, da so ta izdelek, dodatna oprema in programska oprema skladni z direktivami 2014/53/EU. Celotno besedilo izjave o skladnosti EU in vdelana programska oprema sta na voljo za prenos na strani izdelka na www.dlink.com .
Slovensky [Slovak]	Spoločnosť D-Link týmto vyhlasuje, že tento produkt, príslušenstvo a softvér sú v súlade so smernicou 2014/53/EÚ. Úplné znenie vyhlásenia EÚ o zhode a firmvéri produktu sú k dispozícii na prevzatie zo stránky produktu www.dlink.com .
Suomi [Finnish]	D-Link Corporation täten vakuuttaa, että tämä tuote, lisävarusteet ja ohjelmisto ovat direktiivin 2014/53/EU vaatimusten mukaisia. Täydellinen EU-vaatimustenmukaisuusvakuutus samoin kuin tuotteen laiteohjelmisto ovat ladattavissa osoitteesta www.dlink.com .
Svenska[Swedish]	D-Link Corporation försäkrar härmed att denna produkt, tillbehör och programvara överensstämmer med direktiv 2014/53/EU. Hela texten med EU-försäkran om överensstämmelse och produkt-firmware kan hämtas från produktsidan på www.dlink.com .

Íslenska [Icelandic]	Hér með lýsir D-Link Corporation því yfir að þessi vara, fylgihlutir og hugbúnaður eru í samræmi við tilskipun 2014/53/EB. Sækja má ESB-samræmisyfirlýsinguna í heild sinni og fastbúnað vörunnar af vefsíðu vörunnar á www.dlink.com.
Norsk [Norwegian]	Herved erklærer D-Link Corporation at dette produktet, tilbehøret og programvaren er i samsvar med direktivet 2014/53/EU. Den fullstendige teksten i EU-erklæring om samsvar og produktets fastvare er tilgjengelig for nedlasting fra produktsiden på www.dlink.com.

Warning Statement:

The power outlet should be near the device and easily accessible.

NOTICE OF WIRELESS RADIO LAN USAGE IN THE EUROPEAN COMMUNITY (FOR WIRELESS PRODUCT ONLY):

- This device is restricted to indoor use when operated in the European Community using channels in the 5.15-5.35 GHz band to reduce the potential for interference.
- This device is a 2.4 GHz wideband transmission system (transceiver), intended for use in all EU member states and EFTA countries. This equipment may be operated in AL, AD, BE, BG, DK, DE, FI, FR, GR, GW, IS, IT, HR, LI, LU, MT, MK, MD, MC, NL, NO, AT, PL, PT, RO, SM, SE, RS, SK, ES, CI, HU, and CY.

Usage Notes:

- To remain in conformance with European National spectrum usage regulations, frequency and channel limitations will be applied on the products according to the country where the equipment will be deployed.
- This device is restricted from functioning in Ad-hoc mode while operating in 5 GHz. Ad-hoc mode is direct peer-to-peer communication between two client devices without an Access Point.
- Access points will support DFS (Dynamic Frequency Selection) and TPC (Transmit Power Control) functionality as required when operating in 5 GHz band within the EU.
- Please refer to the product manual or datasheet to check whether your product uses 2.4 GHz and/or 5 GHz wireless.

HINWEIS ZUR VERWENDUNG VON DRAHTLOS-NETZWERK (WLAN) IN DER EUROPÄISCHEN GEMEINSCHAFT (NUR FÜR EIN DRAHTLOSES PRODUKT)

- Der Betrieb dieses Geräts in der Europäischen Gemeinschaft bei Nutzung von Kanälen im 5,15-5,35 GHz Frequenzband ist ausschließlich auf Innenräume beschränkt, um das Interferenzpotential zu reduzieren.
- Bei diesem Gerät handelt es sich um einen Einsatz in allen EU-Mitgliedsstaaten und in EFTA-Ländern - ausgenommen Frankreich. Der Betrieb dieses Geräts ist in den folgenden Ländern erlaubt: AL, AD, BE, BG, DK, DE, FI, FR, GR, GW, IS, IT, HR, LI, LU, MT, MK, MD, MC, NL, NO, AT, PL, PT, RO, SM, SE, RS, SK, ES, CI, HU, CY

Gebrauchshinweise:

- Um den in Europa geltenden nationalen Vorschriften zum Nutzen des Funkspektrums weiterhin zu entsprechen, werden Frequenz und Kanalbeschränkungen, dem jeweiligen Land, in dem das Gerät zum Einsatz kommt, entsprechend, auf die Produkte angewandt.
- Die Funktionalität im Ad-hoc-Modus bei Betrieb auf 5 GHz ist für dieses Gerät eingeschränkt. Bei dem Ad-hoc-Modus handelt es sich um eine Peer-to-Peer-Kommunikation zwischen zwei Client-Geräten ohne einen Access Point.
- Access Points unterstützen die Funktionen DFS (Dynamic Frequency Selection) und TPC (Transmit Power Control) wie erforderlich bei Betrieb auf 5 GHz innerhalb der EU.
- Bitte schlagen Sie im Handbuch oder Datenblatt nach, ob Ihr Gerät eine 2,4 GHz und / oder 5 GHz Verbindung nutzt.

AVIS CONCERNANT L'UTILISATION DE LA RADIO SANS FIL LAN DANS LA COMMUNAUTÉ EUROPÉENNE (UNIQUEMENT POUR LES PRODUITS SANS FIL)

- Cet appareil est limité à un usage intérieur lorsqu'il est utilisé dans la Communauté européenne sur les canaux de la bande de 5,15 à 5,35 GHz afin de réduire les risques d'interférences.
- Cet appareil est un système de transmission à large bande (émetteur-récepteur) de 2,4 GHz, destiné à être utilisé dans tous les États-membres de l'UE et les pays de l'AELE. Cet équipement peut être utilisé dans les pays suivants : AL, AD, BE, BG, DK, DE, FI, FR, GR, GW, IS, IT, HR, LI, LU, MT, MK, MD, MC, NL, NO, AT, PL, PT, RO, SM, SE, RS, SK, ES, CI, HU, CY

Notes d'utilisation:

- Pour rester en conformité avec la réglementation nationale européenne en matière d'utilisation du spectre, des limites de fréquence et de canal seront appliquées aux produits selon le pays où l'équipement sera déployé.
- Cet appareil ne peut pas utiliser le mode Ad-hoc lorsqu'il fonctionne dans la bande de 5 GHz. Le mode Adhoc fournit une communication directe pair à pair entre deux périphériques clients sans point d'accès.
- Les points d'accès prendront en charge les fonctionnalités DFS (Dynamic Frequency Selection) et TPC (Transmit Power Control) au besoin lors du fonctionnement dans la bande de 5 GHz au sein de l'UE.
- Merci de vous référer au guide d'utilisation ou de la fiche technique afin de vérifier si votre produit utilise 2.4 GHz et/ou 5 GHz sans fil.

AVISO DE USO DE LA LAN DE RADIO INALÁMBRICA EN LA COMUNIDAD EUROPEA (SOLO PARA EL PRODUCTO INALÁMBRICO)

- El uso de este dispositivo está restringido a interiores cuando funciona en la Comunidad Europea utilizando canales en la banda de 5,15-5,35 GHz, para reducir la posibilidad de interferencias.
- Este dispositivo es un sistema de transmisión (transceptor) de banda ancha de 2,4 GHz, pensado para su uso en todos los estados miembros de la UE y en los países de la AELC. Este equipo se puede utilizar en AL, AD, BE, BG, DK, DE, FI, FR, GR, GW, IS, IT, HR, LI, LU, MT, MK, MD, MC, NL, NO, AT, PL, PT, RO, SM, SE, RS, SK, ES, CI, HU, CY

Notas de uso:

- Para seguir cumpliendo las normas europeas de uso del espectro nacional, se aplicarán limitaciones de frecuencia y canal en los productos en función del país en el que se pondrá en funcionamiento el equipo.
- Este dispositivo tiene restringido el funcionamiento en modo Ad-hoc mientras funcione a 5 GHz. El modo Ad-hoc es la comunicación directa de igual a igual entre dos dispositivos cliente sin un punto de acceso.
- Los puntos de acceso admitirán la funcionalidad DFS (Selección de frecuencia dinámica) y TPC (Control de la potencia de transmisión) si es necesario cuando funcionan a 5 GHz dentro de la UE.
- Por favor compruebe el manual o la ficha de producto para comprobar si el producto utiliza las bandas inalámbricas de 2.4 GHz y/o la de 5 GHz.

AVVISO PER L'USO DI LAN RADIO WIRELESS NELLA COMUNITÀ EUROPEA (SOLO PER PRODOTTI WIRELESS)

- Nella Comunità europea, l'uso di questo dispositivo è limitato esclusivamente agli ambienti interni sui canali compresi nella banda da 5,15 a 5,35 GHz al fine di ridurre potenziali interferenze. Questo dispositivo è un sistema di trasmissione a banda larga a 2,4 GHz (ricetrasmettente), destinato all'uso in tutti gli stati membri dell'Unione europea e nei paesi EFTA.
- Questo dispositivo può essere utilizzato in AL, AD, BE, BG, DK, DE, FI, FR, GR, GW, IS, IT, HR, LI, LU, MT, MK, MD, MC, NL, NO, AT, PL, PT, RO, SM, SE, RS, SK, ES, CI, HU, CY

Note per l'uso

- Al fine di mantenere la conformità alle normative nazionali europee per l'uso dello spettro di frequenze, saranno applicate limitazioni sulle frequenze e sui canali per il prodotto in conformità alle normative del paese in cui il dispositivo viene utilizzato.
- Questo dispositivo non può essere attivato in modalità Ad-hoc durante il funzionamento a 5 GHz. La modalità Ad-hoc è una comunicazione diretta peer-to-peer fra due dispositivi client senza un punto di accesso.
- I punti di accesso supportano le funzionalità DFS (Dynamic Frequency Selection) e TPC (Transmit Power Control) richieste per operare a 5 GHz nell'Unione europea.
- Ti invitiamo a fare riferimento al manuale del prodotto o alla scheda tecnica per verificare se il tuo prodotto utilizza le frequenze 2,4 GHz e/o 5 GHz.

KENNISGEVING VAN DRAADLOOS RADIO LAN-GEBRUIK IN DE EUROPESE GEMEENSCHAP (ALLEEN VOOR DRAADLOOS PRODUCT)

- Dit toestel is beperkt tot gebruik binnenshuis wanneer het wordt gebruikt in de Europese Gemeenschap gebruik makend van kanalen in de 5.15-5.35 GHz band om de kans op interferentie te beperken.
- Dit toestel is een 2.4 GHz breedband transmissiesysteem (transceiver) dat bedoeld is voor gebruik in alle EU lidstaten en EFTA landen. Deze uitrusting mag gebruikt worden in AL, AD, BE, BG, DK, DE, FI, FR, GR, GW, IS, IT, HR, LI, LU, MT, MK, MD, MC, NL, NO, AT, PL, PT, RO, SM, SE, RS, SK, ES, CI, HU, CY

Gebruiksaanwijzingen:

- Om de gebruiksvoorschriften van het Europese Nationale spectrum na te leven, zullen frequentie- en kanaalbeperkingen worden toegepast op de producten volgens het land waar de uitrusting gebruikt zal worden.
- Dit toestel kan niet functioneren in Ad-hoc mode wanneer het gebruikt wordt in 5 GHz. Ad-hoc mode is directe peer-to-peer communicatie tussen twee klantenapparaten zonder een toegangspunt.
- Toegangspunten ondersteunen DFS (Dynamic Frequency Selection) en TPC (Transmit Power Control) functionaliteit zoals vereist bij gebruik in 5 GHz binnen de EU.
- Raadpleeg de handleiding of de datasheet om te controleren of uw product gebruik maakt van 2.4 GHz en/of 5 GHz.

SAFETY INSTRUCTIONS

The following general safety guidelines are provided to help ensure your own personal safety and protect your product from potential damage. Remember to consult the product user instructions for more details.

- Static electricity can be harmful to electronic components. Discharge static electricity from your body (i.e. touching grounded bare metal) before touching the product.
- Do not attempt to service the product and never disassemble the product. For some products with a user replaceable battery, please read and follow the instructions in the user manual.
- Do not spill food or liquid on your product and never push any objects into the openings of your product.
- Do not use this product near water, areas with high humidity, or condensation unless the product is specifically rated for outdoor application.
- Keep the product away from radiators and other heat sources.
- Always unplug the product from mains power before cleaning and use a dry lint free cloth only.

SICHERHEITSVORSCHRIFTEN

Die folgenden allgemeinen Sicherheitsvorschriften dienen als Hilfe zur Gewährleistung Ihrer eigenen Sicherheit und zum Schutz Ihres Produkts. Weitere Details finden Sie in den Benutzeranleitungen zum Produkt.

- Statische Elektrizität kann elektronischen Komponenten schaden. Um Schäden durch statische Aufladung zu vermeiden, leiten Sie elektrostatische Ladungen von Ihrem Körper ab, (z. B. durch Berühren eines geerdeten blanken Metallteils), bevor Sie das Produkt berühren.
- Unterlassen Sie jeden Versuch, das Produkt zu warten, und versuchen Sie nicht, es in seine Bestandteile zu zerlegen. Für einige Produkte mit austauschbaren Akkus lesen Sie bitte das Benutzerhandbuch und befolgen Sie die dort beschriebenen Anleitungen.
- Vermeiden Sie, dass Speisen oder Flüssigkeiten auf Ihr Produkt gelangen, und stecken Sie keine Gegenstände in die Gehäuseschlitzte oder -öffnungen Ihres Produkts.
- Verwenden Sie dieses Produkt nicht in unmittelbarer Nähe von Wasser und nicht in Bereichen mit hoher Luftfeuchtigkeit oder Kondensation, es sei denn, es ist speziell zur Nutzung in Außenbereichen vorgesehen und eingestuft.
- Halten Sie das Produkt von Heizkörpern und anderen Quellen fern, die Wärme erzeugen.
- Trennen Sie das Produkt immer von der Stromzufuhr, bevor Sie es reinigen und verwenden Sie dazu ausschließlich ein trockenes fusselfreies Tuch.

CONSIGNES DE SÉCURITÉ

Les consignes générales de sécurité ci-après sont fournies afin d'assurer votre sécurité personnelle et de protéger le produit d'éventuels dommages. Veuillez consulter les consignes d'utilisation du produit pour plus de détails.

- L'électricité statique peut endommager les composants électroniques. Déchargez l'électricité statique de votre corps (en touchant un objet en métal relié à la terre par exemple) avant de toucher le produit.
- N'essayez pas d'intervenir sur le produit et ne le démontez jamais. Pour certains produits contenant une batterie remplaçable par l'utilisateur, veuillez lire et suivre les consignes contenues dans le manuel d'utilisation.
- Ne renversez pas d'aliments ou de liquide sur le produit et n'insérez jamais d'objets dans les orifices.
- N'utilisez pas ce produit à proximité d'un point d'eau, de zones très humides ou de condensation sauf si le produit a été spécifiquement conçu pour une application extérieure.
- Eloignez le produit des radiateurs et autres sources de chaleur.
- Débranchez toujours le produit de l'alimentation avant de le nettoyer et utilisez uniquement un chiffon sec non pelucheux.

INSTRUCCIONES DE SEGURIDAD

Las siguientes directrices de seguridad general se facilitan para ayudarle a garantizar su propia seguridad personal y para proteger el producto frente a posibles daños. No olvide consultar las instrucciones del usuario del producto para obtener más información.

- La electricidad estática puede resultar nociva para los componentes electrónicos. Descargue la electricidad estática de su cuerpo (p. ej., tocando algún metal sin revestimiento conectado a tierra) antes de tocar el producto.
- No intente realizar el mantenimiento del producto ni lo desmonte nunca. Para algunos productos con batería reemplazable por el usuario, lea y siga las instrucciones del manual de usuario.
- No derrame comida o líquidos sobre el producto y nunca deje que caigan objetos en las aberturas del mismo.
- No utilice este producto cerca del agua, en zonas con humedad o condensación elevadas a menos que el producto esté clasificado específicamente para aplicación en exteriores.
- Mantenga el producto alejado de los radiadores y de otras fuentes de calor.
- Desenchufe siempre el producto de la alimentación de red antes de limpiarlo y utilice solo un paño seco sin pelusa

ISTRUZIONI PER LA SICUREZZA

Le seguenti linee guida sulla sicurezza sono fornite per contribuire a garantire la sicurezza personale degli utenti e a proteggere il prodotto da potenziali danni. Per maggiori dettagli, consultare le istruzioni per l'utente del prodotto.

- L'elettricità statica può essere pericolosa per i componenti elettronici. Scaricare l'elettricità statica dal corpo (ad esempio toccando una parte metallica collegata a terra) prima di toccare il prodotto.
- Non cercare di riparare il prodotto e non smontarlo mai. Per alcuni prodotti dotati di batteria sostituibile dall'utente, leggere e seguire le istruzioni riportate nel manuale dell'utente.
- Non versare cibi o liquidi sul prodotto e non spingere mai alcun oggetto nelle aperture del prodotto.
- Non usare questo prodotto vicino all'acqua, in aree con elevato grado di umidità o soggette a condensa a meno che il prodotto non sia specificatamente approvato per uso in ambienti esterni.
- Tenere il prodotto lontano da caloriferi e altre fonti di calore.
- Scollegare sempre il prodotto dalla presa elettrica prima di pulirlo e usare solo un panno asciutto che non lasci filacce.

VEILIGHEIDSINFORMATIE

De volgende algemene veiligheidsinformatie werd verstrekt om uw eigen persoonlijke veiligheid te waarborgen en uw product te beschermen tegen mogelijke schade. Denk eraan om de gebruikersinstructies van het product te raadplegen voor meer informatie.

- Statische elektriciteit kan schadelijk zijn voor elektronische componenten. Ontlaad de statische elektriciteit van uw lichaam (d.w.z. het aanraken van geaard bloot metaal) voordat u het product aanraakt.
- U mag nooit proberen het product te onderhouden en u mag het product nooit demonteren. Voor sommige producten moet door de gebruiker te vervangen batterij, dient u de instructies in de gebruikershandleiding te lezen en te volgen.
- Mors geen voedsel of vloeistof op uw product en u mag nooit voorwerpen in de openingen van uw product duwen.
- Gebruik dit product niet in de buurt van water, gebieden met hoge vochtigheid of condensatie, tenzij het product specifiek geklassificeerd is voor gebruik buitenhuis.
- Houd het product uit de buurt van radiatoren en andere warmtebronnen.
- U dient het product steeds los te koppelen van de stroom voordat u het reinigt en gebruik uitsluitend een droge pluisvrije doek

Disposing and Recycling Your Product

ENGLISH

This symbol on the product or packaging means that according to local laws and regulations this product should be not be disposed of in household waste but sent for recycling. Please take it to a collection point designated by your local authorities once it has reached the end of its life, some will accept products for free. By recycling the product and its packaging in this manner you help to conserve the environment and protect human health.

D-Link and the Environment

At D-Link, we understand and are committed to reducing any impact our operations and products may have on the environment. To minimise this impact D-Link designs and builds its products to be as environmentally friendly as possible, by using recyclable, low toxic materials in both products and packaging.

D-Link recommends that you always switch off or unplug your D-Link products when they are not in use. By doing so you will help to save energy and reduce CO₂ emissions.

To learn more about our environmentally responsible products and packaging please visit www.dlinkgreen.com.

EN

Dieses Symbol auf dem Produkt oder der Verpackung weist darauf hin, dass dieses Produkt gemäß bestehender örtlicher Gesetze und Vorschriften nicht über den normalen Hausmüll entsorgt werden sollte, sondern einer Wiederverwertung zuzuführen ist. Bringen Sie es bitte zu einer von Ihrer Kommunalbehörde entsprechend amtlich ausgewiesenen Sammelstelle, sobald das Produkt das Ende seiner Nutzungsdauer erreicht hat. Für die Annahme solcher Produkte erheben einige dieser Stellen keine Gebühren. Durch ein auf diese Weise durchgeführtes Recycling des Produkts und seiner Verpackung helfen Sie, die Umwelt zu schonen und die menschliche Gesundheit zu schützen.

D-Link und die Umwelt

D-Link ist sich den möglichen Auswirkungen seiner Geschäftstätigkeiten und seiner Produkte auf die Umwelt bewusst und fühlt sich verpflichtet, diese entsprechend zu mindern. Zu diesem Zweck entwickelt und stellt D-Link seine Produkte mit dem Ziel größtmöglicher Umweltfreundlichkeit her und verwendet wiederverwertbare, schadstoffarme Materialien bei Produktherstellung und Verpackung.

D-Link empfiehlt, Ihre Produkte von D-Link, wenn nicht in Gebrauch, immer auszuschalten oder vom Netz zu nehmen. Auf diese Weise helfen Sie, Energie zu sparen und CO₂-Emissionen zu reduzieren.

Wenn Sie mehr über unsere umweltgerechten Produkte und Verpackungen wissen möchten, finden Sie entsprechende Informationen im Internet unter www.dlinkgreen.com.

DE

FRANÇAIS**FR**

Ce symbole apposé sur le produit ou son emballage signifie que, conformément aux lois et réglementations locales, ce produit ne doit pas être éliminé avec les déchets domestiques mais recyclé. Veuillez le rapporter à un point de collecte prévu à cet effet par les autorités locales; certains accepteront vos produits gratuitement. En recyclant le produit et son emballage de cette manière, vous aidez à préserver l'environnement et à protéger la santé de l'homme.

D-Link et l'environnement

Chez D-Link, nous sommes conscients de l'impact de nos opérations et produits sur l'environnement et nous engageons à le réduire. Pour limiter cet impact, D-Link conçoit et fabrique ses produits de manière aussi écologique que possible, en utilisant des matériaux recyclables et faiblement toxiques, tant dans ses produits que ses emballages.

D-Link recommande de toujours éteindre ou débrancher vos produits D-Link lorsque vous ne les utilisez pas. Vous réaliserez ainsi des économies d'énergie et réduirez vos émissions de CO₂.

Pour en savoir plus sur les produits et emballages respectueux de l'environnement, veuillez consulter le www.dlinkgreen.com.

ESPAÑOL**ES**

Este símbolo en el producto o el embalaje significa que, de acuerdo con la legislación y la normativa local, este producto no se debe desechar en la basura doméstica sino que se debe reciclar. Llévelo a un punto de recogida designado por las autoridades locales una vez que ha llegado al fin de su vida útil; algunos de ellos aceptan recogerlos de forma gratuita. Al reciclar el producto y su embalaje de esta forma, contribuye a preservar el medio ambiente y a proteger la salud de los seres humanos.

D-Link y el medio ambiente

En D-Link, comprendemos y estamos comprometidos con la reducción del impacto que puedan tener nuestras actividades y nuestros productos en el medio ambiente. Para reducir este impacto, D-Link diseña y fabrica sus productos para que sean lo más ecológicos posible, utilizando materiales reciclables y de baja toxicidad tanto en los productos como en el embalaje.

D-Link recomienda apagar o desenchufar los productos D-Link cuando no se estén utilizando. Al hacerlo, contribuirá a ahorrar energía y a reducir las emisiones de CO₂.

Para obtener más información acerca de nuestros productos y embalajes ecológicos, visite el sitio www.dlinkgreen.com.

ITALIANO**IT**

La presenza di questo simbolo sul prodotto o sulla confezione del prodotto indica che, in conformità alle leggi e alle normative locali, questo prodotto non deve essere smaltito nei rifiuti domestici, ma avviato al riciclo. Una volta terminato il ciclo di vita utile, portare il prodotto presso un punto di raccolta indicato dalle autorità locali. Alcuni questi punti di raccolta accettano gratuitamente i prodotti da riciclare. Scegliendo di riciclare il prodotto e il relativo imballaggio, si contribuirà a preservare l'ambiente e a salvaguardare la salute umana.

D-Link e l'ambiente

D-Link cerca da sempre di ridurre l'impatto ambientale dei propri stabilimenti e dei propri prodotti. Allo scopo di ridurre al minimo tale impatto, D-Link progetta e realizza i propri prodotti in modo che rispettino il più possibile l'ambiente, utilizzando materiali riciclabili a basso tasso di tossicità sia per i prodotti che per gli imballaggi.

D-Link raccomanda di spegnere sempre i prodotti D-Link o di scollarne la spina quando non vengono utilizzati. In questo modo si contribuirà a risparmiare energia e a ridurre le emissioni di anidride carbonica.

Per ulteriori informazioni sui prodotti e sugli imballaggi D-Link a ridotto impatto ambientale, visitate il sito all'indirizzo www.dlinkgreen.com.

NEDERLANDS**NL**

Dit symbool op het product of de verpakking betekent dat dit product volgens de plaatselijke wetgeving niet mag worden weggegooid met het huishoudelijk afval, maar voor recyclage moeten worden ingeleverd. Zodra het product het einde van de levensduur heeft bereikt, dient u het naar een inzamelpunt te brengen dat hiertoe werd aangeduid door uw plaatselijke autoriteiten, sommige autoriteiten accepteren producten zonder dat u hiervoor dient te betalen. Door het product en de verpakking op deze manier te recycelen helpt u het milieu en de gezondheid van de mens te beschermen.

D-Link en het milieu

Bij D-Link spannen we ons in om de impact van onze handelingen en producten op het milieu te beperken. Om deze impact te beperken, ontwerpt en bouwt D-Link zijn producten zo milieuvriendelijk mogelijk, door het gebruik van recycleerbare producten met lage toxiciteit in product en verpakking.

D-Link raadt aan om steeds uw D-Link producten uit te schakelen of uit de stekker te halen wanneer u ze niet gebruikt. Door dit te doen bespaart u energie en beperkt u de CO₂-emissies.

Breng een bezoek aan www.dlinkgreen.com voor meer informatie over onze milieouverantwoorde producten en verpakkingen.

POLSKI

Ten symbol umieszczony na produkcie lub opakowaniu oznacza, że zgodnie z miejscowym prawem i lokalnymi przepisami niniejszego produktu nie wolno wyrzucać jak odpady czy śmieci z gospodarstwa domowego, lecz należy go poddać procesowi recyklingu. Po zakończeniu użytkowania produktu, niektóre odpowiednie do tego celu podmioty przyjmą takie produkty nieodpłatnie, dlatego prosimy dostarczyć go do punktu zbiórki wskazanego przez lokalne władze. Poprzez proces recyklingu i dzięki takiemu postępowaniu z produktem oraz jego opakowaniem, pomogą Państwo chronić środowisko naturalne i dbać o ludzkie zdrowie.

D-Link i środowisko

D-Link podchodzimy w sposób świadomy do ochrony otoczenia oraz jesteśmy zaangażowani w zmniejszanie wpływu naszych działań i produktów na środowisko naturalne. W celu zminimalizowania takiego wpływu firma D-Link konstruuje i wytwarza swoje produkty w taki sposób, aby były one jak najbardziej przyjazne środowisku, stosując do tych celów materiały nadające się do powtórnego wykorzystania, charakteryzujące się małą toksycznością zarówno w przypadku samych produktów jak i opakowań.

Firma D-Link zaleca, aby Państwo zawsze prawidłowo wyłączali z użytku swoje produkty D-Link, gdy nie są one wykorzystywane. Postępując w ten sposób pozwalają Państwo oszczędzać energię i zmniejszać emisje CO₂.

Aby dowiedzieć się więcej na temat produktów i opakowań mających wpływ na środowisko prosimy zapoznać się ze stroną Internetową www.dlinkgreen.com.

ČESKY

Tento symbol na výrobku nebo jeho obalu znamená, že podle místně platných předpisů se výrobek nesmí vyhazovat do komunálního odpadu, ale odeslat k recyklaci. Až výrobek doslouží, odneste jej prosím na sběrné místo určené místními úřady k tomuto účelu. Některá sběrná místa přijímají výrobky zdarma. Recyklací výrobku i obalu pomáháte chránit životní prostředí i lidské zdraví.

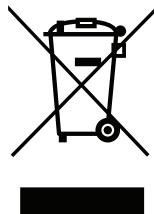

D-Link a životní prostředí

Ve společnosti D-Link jsme si vědomi vlivu našich provozů a výrobků na životní prostředí a snažíme se o minimalizaci těchto vlivů. Proto své výrobky navrhujeme a vyrábíme tak, aby byly co nejekologičtější, a ve výrobcích i obalech používáme recyklovatelné a nízkotoxické materiály.

Společnost D-Link doporučuje, abyste své výrobky značky D-Link vypnuli nebo vytáhli ze zásuvky vždy, když je nepoužíváte. Pomůžete tak šetřit energii a snížit emise CO₂.

Více informací o našich ekologických výrobcích a obalech najdete na adrese www.dlinkgreen.com.

PL

MAGYAR

Ez a szimbólum a terméken vagy a csomagoláson azt jelenti, hogy a helyi törvényeknek és szabályoknak megfelelően ez a termék nem semmisíthető meg a háztartási hulladékkal együtt, hanem újrahasznosításra kell küldeni. Kérjük, hogy a termék élettartamának elteltét követően vigye azt a helyi hatóság által kijelölt gyűjtőhelyre. A termékek egyes helyeken ingyen elhelyezhetők. A termék és a csomagolás újrahasznosításával segíti védeni a környezetet és az emberek egészségét.

A D-Link és a környezet

A D-Linknél megértjük és elkötelezettek vagyunk a műveleteink és termékeink környezetre gyakorolt hatásainak csökkentésére. Az ezen hatás csökkentése érdekében a D-Link a lehető leginkább környezetbarát termékeket tervez és gyárt azáltal, hogy újrahasznosítható, alacsony károsanyagtartalmú termékeket gyárt és csomagolásokat alkalmaz.

A D-Link azt javasolja, hogy minden kapcsolja ki vagy húzza ki a D-Link termékeket a tápforrásból, ha nem használja azokat. Ezzel segít az energia megtakarításában és a széndioxid kibocsátásának csökkentésében.

Környezetbarát termékeinkről és csomagolásainkról további információkat a www.dlinkgreen.com weboldalon tudhat meg.

NORSK

Dette symbolet på produktet eller forpakningen betyr at dette produktet ifølge lokale lover og forskrifter ikke skal kastes sammen med husholdningsavfall, men leveres inn til gjenvinning. Vennligst ta det til et innsamlingssted anviset av lokale myndigheter når det er kommet til slutten av levetiden. Noen steder aksepteres produkter uten avgift. Ved på denne måten å gjenvinne produktet og forpakningen hjelper du å verne miljøet og beskytte folks helse.

D-Link og miljøet

Hos D-Link forstår vi oss på og er forpliktet til å minske innvirkningen som vår drift og våre produkter kan ha på miljøet. For å minimalisere denne innvirkningen designet og lager D-Link produkter som er så miljøvennlig som mulig, ved å bruke resirkulerbare, lav-toksiske materialer både i produktene og forpakningen.

D-Link anbefaler at du alltid slår av eller frakobler D-Link-produkter når de ikke er i bruk. Ved å gjøre dette hjelper du å spare energi og å redusere CO₂-utslip.

For mer informasjon angående våre miljøansvarlige produkter og forpakninger kan du gå til www.dlinkgreen.com.

SUOMI**FI**

Tämä symboli tuotteen pakkaussessa tarkoittaa, että paikallisten lakiens ja säännösten mukaisesti tästä tuotetta ei pidä hävittää yleisen kotitalousjätteen seassa vaan se tulee toimittaa kierrätettäväksi. Kun tuote on elinkaarensa päässä, toimita se lähipääni viranomaisten hyväksymään kierrätyspisteesseen. Kierrättämällä käytetyn tuotteen ja sen pakkausen autat tukemaan sekä ympäristön että ihmisten terveyttä ja hyvinvointia.

D-Link ja ympäristö

D-Link ymmärtää ympäristönsuojelun tärkeyden ja on sitoutunut vähentämään tuotteistaan ja niiden valmistuksesta ympäristölle mahdollisesti aiheutuvia haittavaikutuksia. Nämä negatiiviset vaikutukset minimoidakseen D-Link suunnittelee ja valmistaa tuotteensa mahdollisimman ympäristöystävällisiksi käyttämällä kierrätettäviä, alhaisia pitoisuuksia haitallisia aineita sisältäviä materiaaleja sekä tuotteissaan että niiden pakauksissa.

Suositemme, että irrotat D-Link-tuotteesi virtalähteestä tai sammutat ne aina, kun ne eivät ole käytössä. Toimimalla näin autat säästämään energiaa ja vähentämään hiilidioksidipäästöjä.

Lue lisää ympäristöystävällisistä D-Link-tuotteista ja pakauksistamme osoitteesta www.dlinkgreen.com.

SVENSKA**SE**

Den här symbolen på produkten eller förpackningen betyder att produkten enligt lokala lagar och föreskrifter inte skall kastas i hushållssoporna utan i stället återvinnas. Ta den vid slutet av dess livslängd till en av din lokala myndighet utsedd uppsamlingsplats, vissa accepterar produkter utan kostnad. Genom att på detta sätt återvinna produkten och förpackningen hjälper du till att bevara miljön och skydda mänskors hälsa.

D-Link och miljön

På D-Link förstår vi och är fast beslutna att minska den påverkan våra verksamheter och produkter kan ha på miljön. För att minska denna påverkan utformar och bygger D-Link sina produkter för att de ska vara så miljövänliga som möjligt, genom att använda återvinningsbara material med låg gifthalt i både produkter och förpackningar.

D-Link rekommenderar att du alltid stänger av eller kopplar ur dina D-Link produkter när du inte använder dem. Genom att göra detta hjälper du till att spara energi och minska utsläpp av koldioxid.

För mer information om våra miljöansvariga produkter och förpackningar www.dlinkgreen.com.

PORTUGUÊS**PT**

Este símbolo no produto ou embalagem significa que, de acordo com as leis e regulamentações locais, este produto não deverá ser eliminado juntamente com o lixo doméstico mas enviado para a reciclagem. Transporte-o para um ponto de recolha designado pelas suas autoridades locais quando este tiver atingido o fim da sua vida útil, alguns destes pontos aceitam produtos gratuitamente. Ao reciclar o produto e respectiva embalagem desta forma, ajuda a preservar o ambiente e protege a saúde humana.

A D-Link e o ambiente

Na D-Link compreendemos e comprometemo-nos com a redução do impacto que as nossas operações e produtos possam ter no ambiente. Para minimizar este impacto a D-Link concebe e constrói os seus produtos para que estes sejam o mais inofensivos para o ambiente possível, utilizando materiais recicláveis e não tóxicos tanto nos produtos como nas embalagens.

A D-Link recomenda que desligue os seus produtos D-Link quando estes não se encontrarem em utilização. Com esta acção ajudará a poupar energia e reduzir as emissões de CO₂.
