

## WHAT THIS PRODUCT DOES

The D-Link® 10" Wireless Internet Photo Frame (DSM-210) combines the benefits of a digital photo frame with the convenience of the Internet<sup>1</sup>. Now you can display and share family, vacation, and holiday photos with friends and loved ones around the world. The frame can also access the Internet to view new photos from multiple websites and get RSS feeds of the latest news, weather, sports, and more.

## ENJOY PHOTOS, NEWS, & MORE AROUND YOUR HOME

### UNLEASH YOUR PHOTOS

With the Internet Photo Frame you can finally display all of those digital photos you have sitting untouched in your PC. Don't let all those wonderful memories collect dust on your hard drive where no one will ever see them again. Display the DSM-210 in your living room and let guests see photos from your latest vacation, holiday, or other family outing.

### THE INTERNET IN A FRAME

Send the DSM-210 as a gift to your family and loved ones. Then share your latest photos with them through popular photo sharing sites such as Flickr™, Picasa®, Facebook®, FrameChannel™, and more. You can also use the Internet Photo Frame to subscribe to your favorite RSS feeds. Get the latest news, stock updates, sports scores, clock, calendar, weather conditions, and more directly on your frame.

### WIRED OR WIRELESS

With the Internet Photo Frame you won't be tied to simply using a memory card to upload new photos. Use the convenience of your home network to get new photos using a wired Ethernet connection or the DSM-210's built-in wireless connection. Wireless setup is made even easier using WPS (Wi-Fi Protected Setup™). Simply push the WPS button on the frame and then on your compatible router to connect.

### MORE THAN MEMORY CARDS

The Internet Photo Frame can also handle many of your standard flash memory formats such as USB thumb drive, SD, MMC, and Memory Stick<sup>2</sup>. Or you can choose to get pictures from a local UPnP™ AV server such as a PC or Network Attached Storage (NAS) device. Additionally, you can save pictures to the 1GB of internal memory

### IN THE HALL OR ON THE WALL

Use the DSM-210 just as you would any standard photo frame. The frame can be wall mounted to hang in your living room or proudly displayed next to all your other photo frames on a shelf in the hall.

### BEING GREEN IS GOOD

Power savings isn't just for large appliances anymore. The Internet Photo Frame has motion detection so it can automatically turn on when you enter the room or off if nobody is in the room.

The D-Link 10" Wireless Internet Photo Frame (DSM-210) combines the benefits of a digital photo frame with the convenience of the Internet to give you a whole new digital photo frame experience.
