Fast Ethernet USB Adapter

USB 1.1

DU-E100

This adapter provides an easy and economical way to connect your PC to a Fast Ethernet network. Any desktop or notebook PC equipped with a USB port can make use of this adapter. It's USB plug-and-play, just plug in the cables, and you are connected.

Supporting Ethernet and Fast Ethernet dual speeds, the adapter auto-senses 10/100Mbps, auto-negotiates the network speeds and full/half duplex to let you access databases, send files and e-mail, share printers, scanners and other peripherals across an office or school.

With full duplex support, you can even connect your computer to a Fast Ethernet switch to get a full 200Mbps dedicated bandwidth to run intensive multi-media applications.
