DWL-7620AP Firmware Release Notes

Firmware Version: V4.7.3.0 Published: Oct 29, 2020

Content:

D-Link

Revision History and System Requirement:	2
New Features:	2
Problems Fixed:	3
Known Issues:	2

Revision History and System Requirement:

FW Version	Date	Model	HW	MD5 CHECKSUM
V4.7.3.0	29-Oct-2020	DWL-7620AP	A1	3e7efaf4a3f2386c70dc19e0c0c248b4

New Features:

Firmware Version	New Features
V4.7.3.0	N/A
	1. WPA3
	2. Default Password change
V4 7 2 0	Note: Due to memory partition reconstruct, after upgrading to v4.7.2.9:
V4.7.2.9	a. System will reset to factory default.
	b. Downgrade to v4.7.2.6 or lower version is not allowed.
	c. Load lower version config file is not allowed.
	1. Support WDS without security.
	2. Support IP & MAC address ACL under managed mode.
	3. Support DHCP offer/ACK to Unicast function.
	4. Support QoS Bandwidth Control.
	5. Support Wireless Multicast Forwarding.
	6. Support Management IPv6.
	7. Support Load Balancing.
4.7.2.5	8. Support Airtime Fairness. Enable/Disable button is also available.
	9. Support D-Link Discovery Protocol (DDP) so that the DWL-X620AP can be
	discovered and managed by D-Link Network Assistant (DNA).
	10. Enhancement to skip manually factory reset while firmware upgrade.
	For example:
	V4.7.0.9 > V4.7.2.5, manually reset system to factory default is needed.
	V4.7.2.5 > to any version onwards, no factory reset needed.
	V4.7.2.5 > V4.7.0.9 (or lower version), manually reset system to factory
	default is needed.
4.7.0.9	Initial Release

dlinkigreen

Problems Fixed:

Firmware Version	Problems Fixed
	1. To remove channel 144 for DJP.
	2. To fix max rate issue in managed mode.
	3. With old controller firmware which doesn't support Max stations per SSID feature, say DWC-2000/4.7.2.1B106C, after the controller manages AP, wireless clients will fail to connect to AP.
V4.7.3.0	4. To drop VLAN tagged pkt when there is no matching VAP VID.
	5. Dynamic VLAN is not working issue
	6. The SSID which is set as WPA2/WPA3 Enterprise is broadcasted as WEP.
	DI20200619000006/HQ20200622000008
	7. Doesn't accept UI op and moves to login page.
	DI20200508000002/HQ20200508000006
	1. DI20190205000001/ DI20190306000002 WMF issues.
V4.7.2.9	 2. DI20190205000002/ DI20190306000005 Multicast to Unicast feature doe not change the destination MAC address from multicast packets to unicast address. 3. DI20190220000003/ DI20190311000011 AP reloads configuration when A
	loses management session, and it caused wireless client disconnection. 4. DI20190227000004/ DI20190315000002 WLAN utilization 0% issue.
	5. DI20190226000005/ HQ20190304000011 All parameters in WMM/WME I becomes 0 after DWC-2k manages DWL-6620APS.
	6. DI20190516000003 /HQ20190528000011 Showing Radar status info on controller.
	7. DI20190219000008/ HQ20190223000009 Basic rate issue.
	 Roaming issue on DWL-6620APS/7620AP. When wireless client roams from AP1 to AP2, after wireless client connects to AP1 again, wireless client can't access Internet.
	01. Fix Bug: Managed Mode - after Controller reboot, AP doesn't do CP agai
	02. Fix Bug: Accept Item (DKP1810013-0084) - CLI - set show the error message (VBG19010632)
V4.7.2.5	03. Fix Bug: Accept Item (DKP1810013-0093) - Events has smart antenna
	message (VBG19010623) 04. Fix Bug: Accept Item (DKP1810013-0050) - Managed Mode - DUT UI
	cannot get the force roaming setting from DWC-2000
reen	

D-Link DWL-7620AP Firmware Release Notes

	(VBG19010588)
	05. Fix Bug: Accept Item (DKP1810013-0116) - Managed Mode - Band Steer
	setting doesn't copy to UI (VBG19010618)
	06. Fix Bug: CLI - Incorrect Radio wlan ID
	07. Fix Bug: tx-power default value is incorrect
	08. Fix Bug: U-APSD doesn't work on Managed Mode and Standalone Mode
	09. Fix Bug: DI20190207000003/ HQ20190213000012 [DWL-6620APS]
	Beacon Interval became 200 msec if the number of SSID is 9 or more
	(#60042)
	10. Fix Bug: DNA (D-Link Network Assistant) not work, firmware upgrade part
	11. Fix Bug: LAN crash after receiving special ipv6 packet
	12. Fix Bug: DI20190207000001 [DWL-6620APS] There is no Radius Fail
	Through feature (#60051)
	13. Fix Bug: CLI - "set system led off" doesn't turn off WiFi LED
	14. Fix Bug: LED Off doesn't turn off WiFi LED
	15. Fix Bug: CLI name should use Web UI Hostname
	16. Fix Bug: Standalone - Incorrect ATF string
	17. Hide Multicast to Unicast function
	18. DI20190207000003/ HQ20190213000012 [DWL-6620APS] Beacon
	Interval became 200 msec if the number of SSID is 9 or more (#60042)
	19. Fix Bug: Japan Domain fail to change channel (HQ20180906000008)
	(Mantis ID:0057993)
	20. Fix Bug: UI accepts invalid Subnet Mask and Gateway
	(HQ20180709000005) (Mantis ID:0057245)
	21. Fix: Enable the DFS function of JP domain (HQ20180705000002)
	22. Fix Bug: Managed Mode - VLAN + Captive Portal not work
	(HQ20180711000010) (Mantis ID: 0056637)
4.7.0.9	N/A

Known Issues:

dlinkigreen

Firmware Version	Issues
V4.7.3.0	N/A
V4.7.2.9	1. Dynamic VLAN is not working.
V4.7.2.5	[DTrack cases]

DWL-7620AP Firmware Release Notes

 DI20190205000001/ HQ20190218000005 (Wireless multicast forwarding) (#60090)
2. DI20190205000002/ HQ20190214000002 Mulicast to Unicast feature does not change the destination MAC address from multicast packets to unicast address (#60054) (Hidden via GUI on v4720.)
3. DI20190214000005/ HQ20190304000027 [DWL-6620APS] DFS changes the channel to W56 when AP booted up with W56 channel, even if other Auto Eligible channels on W53 are not blocked (#60283)
 DI20190220000003/ HQ20190223000010 [DWC-2000/DWL-6600AP] AP reloads configuration when AP loses management session, and it caused wireless client disconnection (#60279)
5. DI20190227000004/ HQ20190304000015 WLAN utilization 0% issue
 DI20190226000005/ HQ20190304000011 all parameters in WMM/WME IE becomes 0 after DWC-2k manages DWL-6620APS

CLI Commands

D-Link

Command	Action
get managed-ap	Get information about switches that can discover and manage the AP.
get management	 View the following information about the management interface on the AP: VLAN ID Interface name Static IP address (if DHCP is not used) Static subnet mask IP address Subnet mask MAC address DHCP status
get management dhcp-status	View the connection type.
set management dhcp-status on	Use DHCP as the connection type.

DWL-7620AP Firmware Release Notes

set management dhcp-status off	Use Static IP as the connection type.
get management static-ip	View the static IP address.
get management static-mask	View the subnet address.
get management vlan-id	View management VLAN ID.
set management vlan-id 1~4094	Set management VLAN ID.
reboot	Reboot the system.
factory-reset	Return to factory default setting.
get system led	View system LED status. Status 1: Turned on.
	Status 0: Turn off.
	Turn on system LED.
set system led on	Turn off all system LED.
set system led off	After setting command, need to type the command
save-running	save-running to and then reboot to make the setting
	effective.
