2.00.001	15-March.-2019	DBA-3621P	A1	1st release

Upgrade Instructions:

When the device added to Nuclias portal, the Nuclias portal will automatically update the Access Point firmware to the latest version. User can go to SETTINGS→Firmware → ACCESS POINT UPGRADE to change the firmware upgrade policy and there are three options:

ACCESS POINT UPGRADE

DBA-1210P DBA-1510P DBA-1520P DBA-2520P DBA-2620P DBA-2720P
 DBA-2820P DBA-3620P **DBA-3621P** DBA-X2830P

Model no. DBA-3621P

Current version

Upgrade version

Follow upgrade window
 Reschedule the upgrade to
 Perform the upgrade now

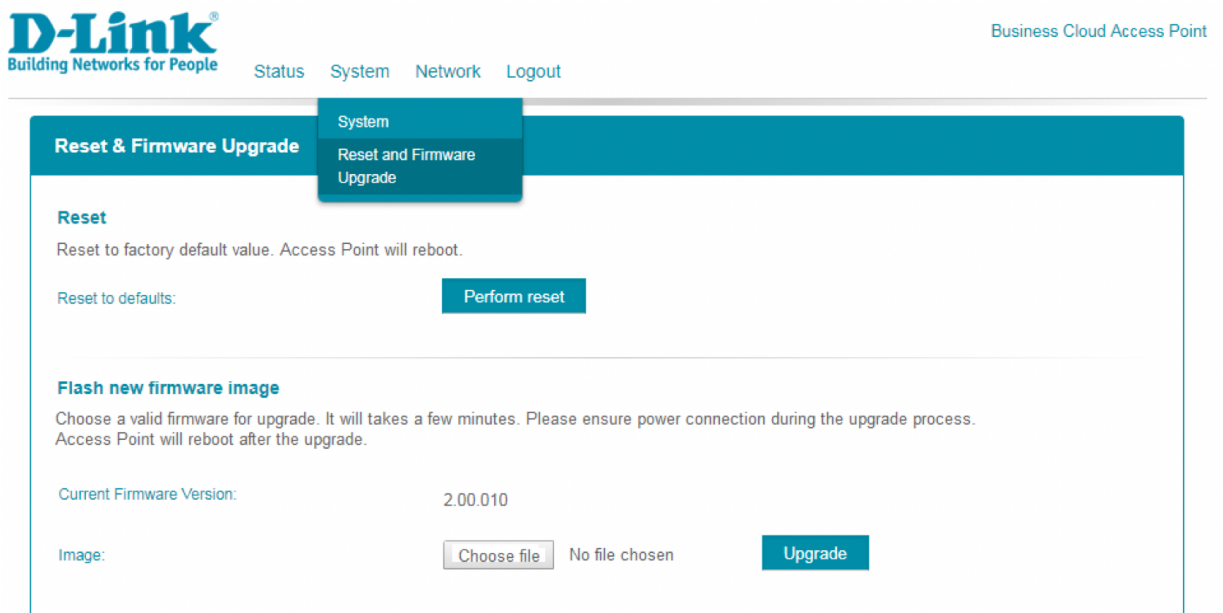

#	Model no.	Devices	Current firmware version	Firmware status	Upgrade schedule	Last upgrade time
1	DBA-3621P	0		Up to date	Follow upgrade window (Wednesday; 4:00 PM)	01/01/1970

Or, user can upgrade Access Point through local GUI, please follow up the following steps.

1. Use an Ethernet cable to connect the device to the management PC or to the switch or router the management PC is connected to.
2. Open the web browser and type in the default host name of the device and press Enter. The default host name is DBA-3621P-XXXX where XXXX represent the last 4 characters of the MAC address listed on the device label located on the bottom of the device.
3. Enter username and password then press OK to login. The username and password are "admin" and "admin" by default.

4. To update AP's firmware, select **System > Reset and Firmware Upgrade** from the banner.

5. Select **Reset and Firmware Update** to upgrade the firmware to or from your local drive of PC.

- a. Click **"Choose file"** to browse your inventories for a saved firmware file
- b. Click **Upgrade** after selecting the firmware file you want to upgrade
- c. It will be downloading the firmware file to DUT.
- d. When download success, do not power off.
- e. Wait until display the login page
