Bluetooth Pairing Procedure The Pairing Procedure generates a secret key that will be used for authentication and encryption in future connections to this device.
To pair with a remote device, the remote device must be in pairable mode and you must know the PIN code. For information about the PIN code of the remote device, refer to that device's documentation. For a brief description of pairing, click Pairing Help. For more detailed information, consult your user's manual. If the remote device does not require a PIN code or if you want to pair with the device later, click Skip Pairing. Initiate Pairing To begin the pairing process, enter the PIN code and click Initiate Pairing. PIN Code:
