**WELCOME TO D-LINK SETUP WIZARD - INTERNET CONNECTION SETUP**

This wizard will guide you through a step-by-step process to configure and connect your D-Link Camera to the internet. For your camera motion detection settings, please click Back button to close this wizard and select the Motion Detection Setup Wizard.

- Step 1: LAN Settings
- Step 2: Internet Settings
- Step 3: DDNS Settings
- Step 4: Camera Name Settings
- Step 5: Time Zone

**STEP 1: LAN SETTINGS**

Please select whether your camera will connect to the Internet with a DHCP connection or Static IP address. If your camera is connected to a router, or you are unsure which settings to pick, D-Link recommends that you keep the default selection of DHCP connection. Otherwise, select Static IP address to manually assign an IP address before clicking on the Next button.

DHCP Connection  
 Static IP Address

IP Address	<input type="text" value="192.168.100.199"/>
Subnet Mask	<input type="text" value="255.255.255.0"/>
Default Gateway	<input type="text" value="192.168.100.3"/>
Primary DNS	<input type="text" value="61.88.88.88"/>
Secondary DNS	<input type="text" value="4.2.2.3"/>

**STEP 2: INTERNET SETTINGS**

If your ISP is using PPPoE, please enable this setting and enter your ISP Username and Password. Then, click on the Next button. Please contact your ISP if you do not know your Username and Password.

Enabled

Username

(e.g. 123456@hinet.net)

Password

### STEP 3: DDNS SETTINGS

If you have a Dynamic DNS account and would like the camera to update the IP address automatically, please enable DDNS and enter your host information below. Then, click on the Next button to continue.

Enable

Server Address  <<

Host Name

User Name

Password

Verify Password

Timeout  (Hours)

### STEP 4: CAMERA NAME SETTINGS

D-Link recommends that you rename your camera for easy accessibility. You can then identify and connect to your camera via this name. Please assign a name of your choice before clicking on the Next button.

Camera Name

### STEP 5: TIME ZONE

Please configure the correct time to ensure that all events are triggered, captured and scheduled at the right time. Then, click on the Next button.

Time Zone

Enable Daylight Saving

Auto Daylight Saving

Set date and time manually

Offset

	Month	Week	Day of week	Hour	Minutes
Start time	<input type="text" value="3"/>	<input type="text" value="2"/>	<input type="text" value="Sunday"/>	<input type="text" value="2"/>	<input type="text" value="00"/>
End time	<input type="text" value="11"/>	<input type="text" value="1"/>	<input type="text" value="Sunday"/>	<input type="text" value="2"/>	<input type="text" value="00"/>

### STEP 6: SETUP COMPLETE

Click on the Back button to review or modify settings or click on the Apply button if all settings are correct. It is recommended to note down these settings in order to access your camera on the network or via your web browser.

IP Address	192.168.100.199
IP Camera Name	DCS-5635
Time Zone	(GMT+10:00) Canberra, Melbourne, Sydney
DDNS	Disable
PPPoE	Disable

## WELCOME TO D-LINK SETUP WIZARD - MOTION DETECTION

This wizard will guide you through a step-by-step process to configure your camera's motion detection functions. To setup the camera LAN or Internet settings, please click on the Back button to close this wizard and re-open the Internet Connection Setup Wizard. Otherwise click on the Next button to begin.

- Step 1: Specify Motion Detection Area Settings
- Step 2: Alerts and Notifications

## STEP 1: SPECIFY MOTION DETECTION AREA SETTINGS

This section will allow you to enable or disable motion detection function, draw or erase motion area, as well as configure the sensitivity setting of your camera to detect movement.

Enable Video Motion

### Sensitivity

0~100%

### Drawing Mode

Draw motion area

Erase motion area

## STEP 1: SPECIFY MOTION DETECTION AREA SETTINGS

This section will allow you to enable or disable motion detection function, draw or erase motion area, as well as configure the sensitivity setting of your camera to detect movement.

Enable Video Motion

### Sensitivity

0~100%

### Drawing Mode

Draw motion area

Erase motion area

## STEP 1: SPECIFY MOTION DETECTION AREA SETTINGS

This section will allow you to enable or disable motion detection function, draw or erase motion area, as well as configure the sensitivity setting of your camera to detect movement.

Enable Video Motion

### Sensitivity

90 0~100%

### Drawing Mode

Draw motion area

Erase motion area

Clear

Back Next Cancel

## STEP 2: ALERTS AND NOTIFICATIONS

This final step allows you to specify how you will receive alert and notification of camera events. You can enable an email notification and/or a FTP Notification by input all the relevant information. Then, click on the Next button.

Enable e-mail notification

User Name

Password

SMTP Mail Server

Sender E-mail Address

Recipient E-mail Address

Port

TLS/SSL

Enable FTP uploading

User Name

Password

Host Name

Path

Filename Prefix

Port

Interval  Seconds (range 1 to 86400 seconds)

Passive Mode

Back Next Cancel

### STEP 3: SETUP COMPLETE

You have completed your camera setup. Please click the Back button if you want to review or modify your settings or click on the Apply button to save and apply your settings.

Motion Detection: Enable  
Alerts and Notification: Do not notify me

DCS-5635	LIVE VIDEO	SETUP	ADVANCED	MAINTENANCE	STATUS	HELP
Setup Wizard	<b>NETWORK SETUP</b>					<b>Helpful Hints..</b> Select 'DHCP Connection' if you are running a DHCP server on your network and would like an IP address assigned to your camera automatically.  - 'Enabling UPnP' settings will allow you to configure your camera as an UPnP device in the network.  - 'Port Detail Settings' allow you to specify the ports you reserve for both HTTP and RTSP Streaming.  - 'HTTP Port' is the port you allocate in order to connect to the camera via a standard web browser.  - 'RTSP Port' is the port you allocate in order to connect to a camera by using streaming mobile device(s), such as a mobile phone or PDA.
Network Setup	You can configure your LAN and Internet settings here. <input type="button" value="Save Settings"/> <input type="button" value="Don't Save Settings"/>

DCS-5635	LIVE VIDEO	SETUP	ADVANCED	MAINTENANCE	STATUS	HELP												
Setup Wizard	<b>AUDIO AND VIDEO</b>					<b>Helpful Hints..</b> <b>Encode Type</b> - Select the video codec: 'JPEG', 'MPEG4' or 'H264'. <b>Resolution</b> - 3 options depend on display system used. <b>FPS (Frame per second)</b> - 30fps is the highest video quality for this camera. <b>bps (bit per second)</b> - Select a fixed bandwidth for your camera operation. Higher value means a higher quality image but consumes more network bandwidth. <b>JPEG Quality</b> - Set the quality of JPEG image. <b>RTSP URL</b> - The URL used to connect to the camera when viewing from a mobile device or PDA. (i.e. rtsp://EXAMPLE.dinkdns.com/3gpp). <b>Audio Setup</b> - To switch the external speaker and microphone on/off or adjust the volume. <b>Enable Speaker</b> - Enabling this feature to allow you to talk using PC's microphone and your voice to be transmitted to the external speaker connected to the camera. <b>Speaker Volume</b> - You can adjust the speaker volume using the volume level setting. <b>Enable Microphone</b> - Enabling this feature to hear audio from the IP Camera's microphone. <b>Microphone Volume</b> - You can adjust the MIC Port volume using the volume level setting. We suggest using smallest resolution at 5 FPS and 64k BPS to watch images on your cell phone or PDA.												
Network Setup	This section allows you to configure the sound and video of your camera, you can configure different settings depending on whether you are viewing content from a PC or a Mobile phone/PDA.

Save Settings Don't Save Settings

**Helpful Hints..**

You can choose to receive notifications by FTP and/or E-mail. The 'Test' buttons are provided to test if your input settings are valid and functional. IP Camera can send the snapshot images to 5 recipient E-mail addresses. To specify multiple recipients for the Sender E-mail Address, simply separate each recipient with a semicolon (;). For example: user1@isp.com; user2@isp.com; user3@isp.com; user4@isp.com; user5@isp.com.

### SD CARD

Here you could browse and manage the record files which stored in SD card.

### SD CARD

The SD Card Storage is unavailable or not formatted.  
SD Status : Card Invalid

**Helpful Hints..**

Clicking "Format SD Card" will delete all data from the SD card, and create folder for video.

Clicking "Remove SD Card" will remove SD card, otherwise Camera might reboot.

DCS-5635	LIVE VIDEO	SETUP	ADVANCED	MAINTENANCE	STATUS	HELP
ICR	<b>ICR</b>					<b>Helpful Hints..</b>  <b>ICR :</b>  <b>Automatic:</b> The Day/Night mode is set automatically. It is normally set in the Day mode and changes to the Night mode in a dark place.  <b>Day mode:</b> The Day mode means enable the IR Cut Filter.  <b>Night mode:</b> The Night mode means disable the IR Cut Filter.  <b>Schedule mode:</b> Set the Day/Night mode using the schedule. Fill in the time so the Day/Night mode is normally set to Day mode and it enters the Day mode at the start time and returns to the Night mode at the end time.
Digital Output	An IR(Infrared) Cut-Removable(ICR) filter can be disengaged from the image path for increased sensitivity in low light environments. The ICR filter will automatically engage depending on the ambient light, allowing the camera to be effective in day/night environments.  1. Select the Day/Night from the radio button. The available options are Automatic, Schedule mode, Day mode and Night mode.  2. The default value is Automatic.  <input type="button" value="Save Settings"/> <input type="button" value="Don't Save Settings"/>					
Logout	<b>ICR</b> IR-Cut Removable filter trigger condition: <input checked="" type="radio"/> Automatic <input type="radio"/> Day mode <input type="radio"/> Night mode <input type="radio"/> Scheduled mode Day mode(24hr) From <input type="text"/> to <input type="text"/>

Admin	<b>ADMIN</b>					<b>Helpful Hints..</b>  For security purposes, it is recommended to change the password for your administrator account. Be sure to write down the new password to avoid having to reset the camera in the event that it is forgotten.  Enabling OSD, the camera name and time will be displayed on the video screen.  Recalibrate the home position to the default center to recover the tolerance caused by some external forces
System	Here you can change the administrator's password for your account as well as add and/or delete user account(s). You can also configure a unique name for your camera, and enable its OSD (On-Screen Display) feature in order to display camera name and time stamp for both live video and recordings of your camera.
