Setting up on BPALogin:

BPALogin is the freeware login client written by Shane Hyde. This is the client program that was modified to work on static port 5050. Please keep in mind that BPALogin is not distributed by or supported by Telstra or BigPond Advance. BPALogin is simply an open-source/freeware version of the authentication client.
You can see his page at http://bpalogin.sourceforge.net/
Basically, the settings is below:
- Just make sure the same port is used in DI-701 and BPALogin
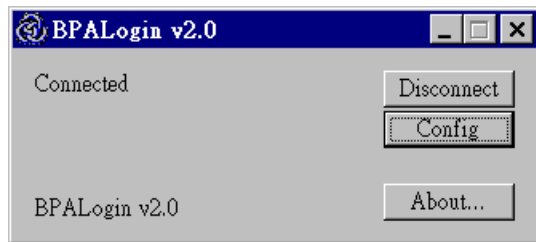

IMPORTANT! Please set the Default Domain to your state.bigpond.net.au

Config

Username	user	OK
Password	********	Cancel
Local Port	5050	Set to 5050 if unsure
Default Domain	nsw.bigpond.net.au	
onConnected run		
onDisconnected run		
☑ Log to file	bpalogin.log

IMPORTANT NOTES TO USERS:

For the best firmware and Config program to use in Australia, please visit:
http://www.dlink.com.au/tech/drivers/files/internets/di701.htm

Note that the firmware version is 2.20 or 3.21. The Config program version can be version 2.20 (on the web) or version 2.22 (in the package). Both Config programs are working fine with firmware version 2.20 but we will recommend ver 2.20 as in this example. Config program version 3.20 has to be used with 3.21 firmware.

Other DI-701 related info (eg. setup on Bigpond ADSL service) is on:
http://www.dlink.com.au/tech/resources/files/internets/di701.htm
