D-Link
Quick Installation Guide

This product can be set up using any current web browser, i.e., Internet Explorer 5x, Netscape Navigator 4x.

DI-704P
Express EtherNetwork™
Broadband Router

Before You Begin

1. If you purchased this router to share your high-speed Internet connection with other computers, you must have an Ethernet-based Cable/DSL modem with an established Internet account from an Internet Service Provider (ISP).
2. It's best to use the same computer that is connected to your modem for configuring the DI-704P router. The DI-704P Router acts as a DHCP server and will assign all the necessary IP address information on your network. **See Appendix at the end of this Quick Installation Guide or the Manual on the CD-ROM for setting each network adapter to automatically obtain an IP address.**

Check Your Package Contents

These are the items included with your DI-704P purchase:

• **DI-704P Ethernet Broadband Router**

• **CD-ROM (containing Manual and Warranty)**

• **Ethernet (CAT5 UTP/Straight-Through) Cable**
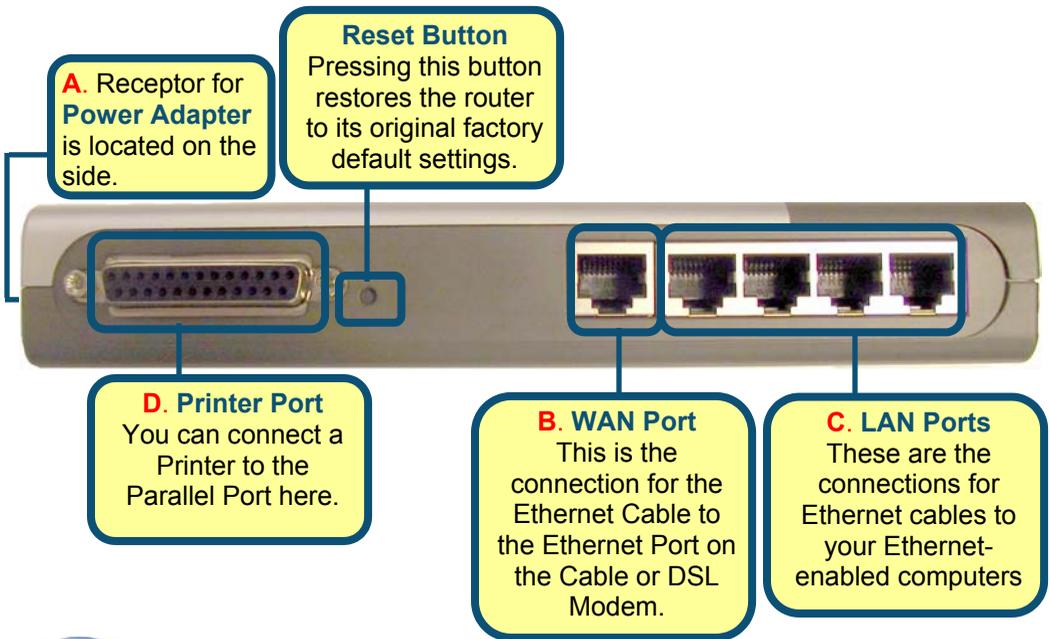

• **5V DC, 2A Power Adapter**

⚠ Using a power supply with a different voltage rating will damage and void the warranty for this product.

If any of the above items are missing, please contact your reseller.

1 Connecting The DI-704P Broadband Router To Your Network

A. First, connect the power adapter to the **receptor** at the side panel of the DI-704P and then plug the other end of the power adapter to a wall outlet or power strip. The Power LED will turn **ON** to indicate proper operation.

B. Insert one end of an Ethernet cable to the **WAN port** on the back panel of the DI-704P and the other end to the Ethernet port located on your Cable or DSL modem. The WAN LED light will illuminate to indicate proper connection.

C. Insert one end of an Ethernet cable to **LAN port 1** on the back panel of the DI-704P and the other end to the Ethernet port on the network adapter in the computer you will use to configure the DI-704P. The LED light for LAN Port 1 will illuminate to indicate proper connection. (Note: Some computers already have network adapters pre-installed.)

D. The parallel port on the DI-704P is used to connect printers only. Connect one end of the printer cable to your printer and the other end to the DI-704P.

Reset Button
Pressing this button restores the router to its original factory default settings.

A. Receptor for **Power Adapter** is located on the side.

D. **Printer Port**
You can connect a Printer to the Parallel Port here.

B. **WAN Port**
This is the connection for the Ethernet Cable to the Ethernet Port on the Cable or DSL Modem.

C. **LAN Ports**
These are the connections for Ethernet cables to your Ethernet-enabled computers
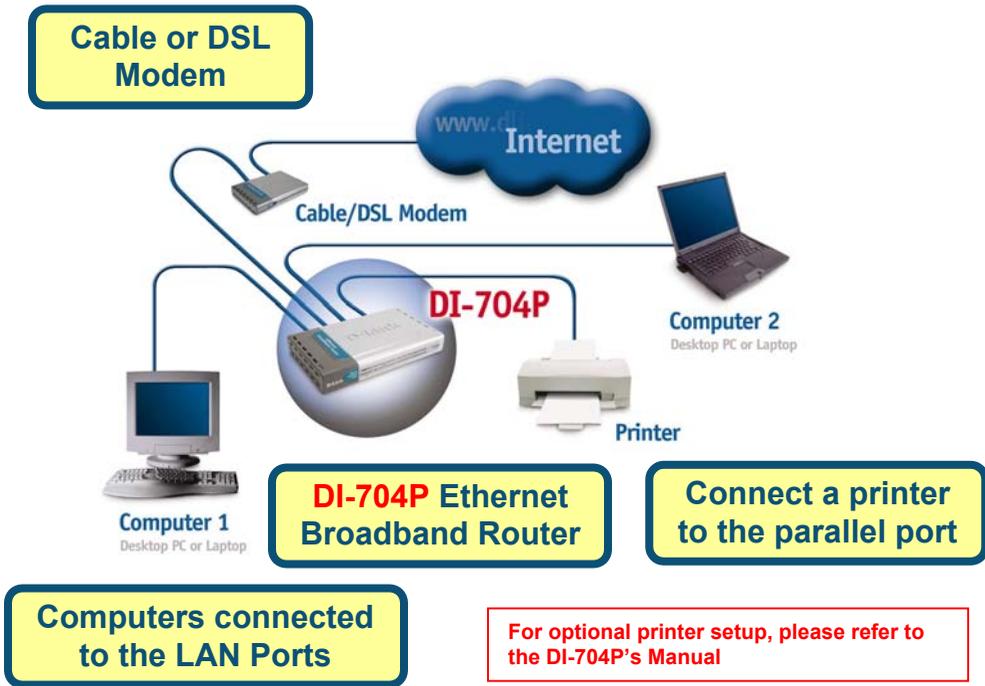

2 Restart Your Computer

3. Connecting Additional Computers To The DI-704P Broadband Router

Using additional Ethernet (CAT5 UTP/Straight-Through) cables, connect your Ethernet-equipped computer(s) to one of the 3 remaining Ethernet LAN ports on the back panel of the DI-704P.

LAN Port LEDs. Each of the LAN ports on the back of the DI-704P have a corresponding LED light on the front panel of the unit. When a proper connection has been made to a computer that is ON, the LED on the front panel should illuminate.
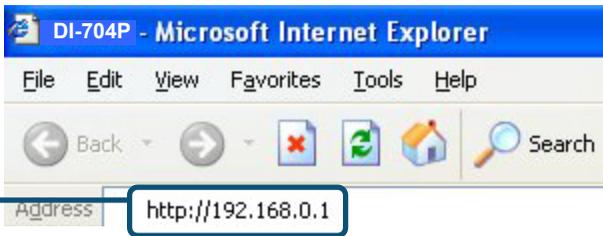

When you have completed the steps in this *Quick Installation Guide,* your connected network should look similar to this:

Cable or DSL Modem

Computer 1
Desktop PC or Laptop

DI-704P Ethernet Broadband Router

Connect a printer to the parallel port

Computers connected to the LAN Ports

For optional printer setup, please refer to the DI-704P's Manual

Using The Setup Wizard

Open your Web browser and type **"http://192.168.0.1"** into the URL address box. Then press the **Enter** or **Return** key.

Click Next

Select the type of Internet connection for your router.

Setup Wizard

Select Internet Connection Type (WAN)

Select the connection type to connect to your ISP. Click **Next** to continue.

○	Static IP Address	ISP assigns you a static IP address.
●	Dynamic IP Address	Obtain an IP address from ISP automatically.
○	Dynamic IP Address for BigPond Cable	Obtain an IP address from ISP with Heartbeat Management.(e.g. Telstra BigPond Cable)
○	PPP over Ethernet	Some ISPs require the use of PPPoE to connect to their services.
○	PPTP	Some ISPs require the use of PPTP to connect to their services.

Select one of these settings

Back Next Cancel Exit

If you are unsure of which setting to select, please contact your Internet Service Provider.

Click Next

Setup Wizard

Set Dynamic IP Address

The **Clone MAC Address** button is used to copy the MAC address of your Ethernet adapter to the DI-704P.If your ISP requies you to enter a specific host name or specific MAC address, please enter it in. Click **Next** to continue.

MAC Address   FF-FF-FF-FF-FF-FF   Clone MAC

Host Name   _____ (optional)

If you selected **Dynamic IP Address**, this screen will appear:
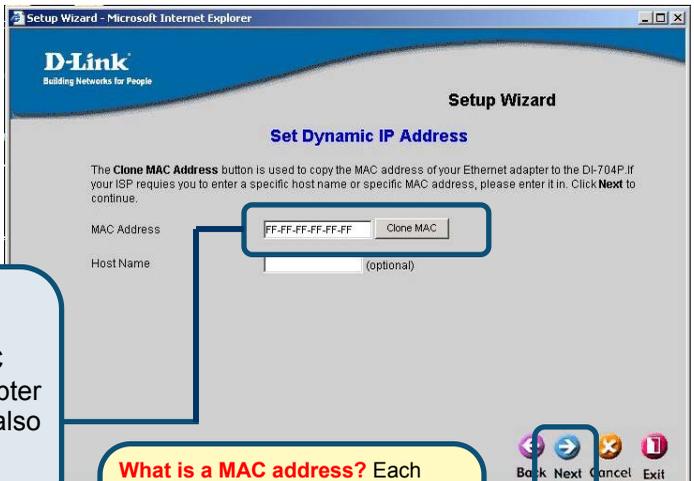

Click the **"Clone MAC Address"** button to automatically copy the MAC address of the network adapter in your computer. You can also manually type in the MAC address.

Back Next Cancel Exit

What is a MAC address? Each network adapter has a discrete Media Access Control (MAC) address. Note that some computers and peripherals may already include built-in network adapters.

Click Next

If your ISP requires a **Static IP Address**, and this option is selected, then this screen will appear:

Enter the IP address information originally provided to you by your ISP. You will need to complete all the required fields.

APPENDIX

To connect to the network, make sure the network adapter in your computer is configured properly. Here's how to configure the network adapter to obtain an IP address automatically for the DI-704P Broadband Router.

For **Microsoft Windows XP:**
Go to **Start** > **right click** on
My Network Places >
select **Properties** > **Double-click** on
the **Network Connection** associated
with the Ethernet adapter (i.e.,
D-Link DFE-530TX+).

Click Internet Protocol (TCP/IP)

Click Properties

Select Obtain an IP address automatically
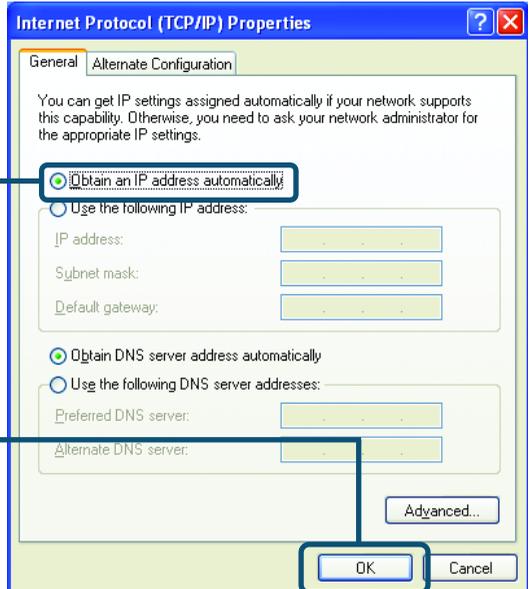

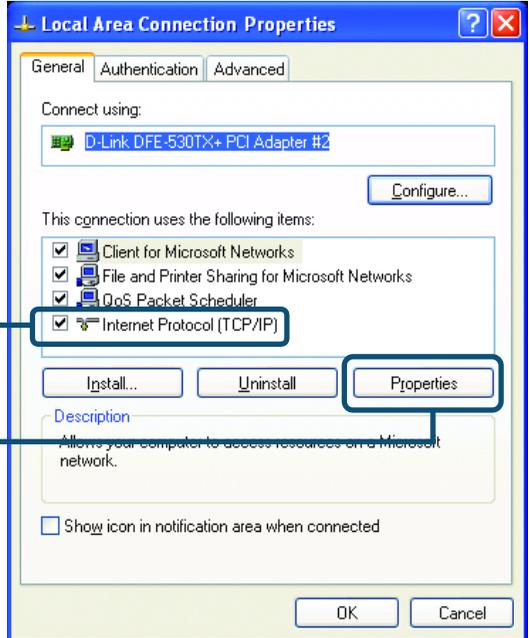

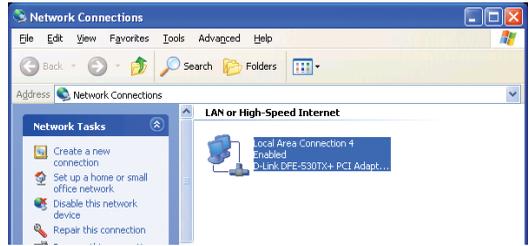

Click OK

**Restart your computer**

For **Apple Macintosh OS X:**

Go to **the Apple Menu** and **Select System Preferences**.

Click on Network

Select Built-in Ethernet in the Show pull-down menu

Select Using DHCP in the Configure pull-down menu

Click on Apply Now

The IP address information, the Subnet Mask, the Router's IP address and the Ethernet adapter address will appear.

Technical Support

You can find the most recent software and user documentation on the **D-Link** website.

D-Link provides free technical support for customers within the United States for the duration of the warranty period on this product.

U.S. customers can contact **D-Link** technical support through our web site or by phone.
