

D-Link DIR-451 Supported PCMCIA, USB and Express Card Models.

The D-Link DIR-451 does have support for many other 3G Modems, though the majority of them are already predefined by the Country/ISP dropdowns and the models which Australia mainly uses.

To see the full list of supported 3G Adapters, select --None-- for Country and ISP settings. Then click on the Card dropdown and you will see the below additional models:

BandLuxe C100	Huawei E870
BandLuxe C120	Huawei E170 (USB)
D-Link DWM-652	Huawei E169 (USB)

Huawei E660A	Option GT 7.2 Ready
Huawei E800	Option GT Fusion + EMEA
Huawei E172	Option GT MAX GX0201
	Option GT MAX GX0202
	Option GT Quad

To allow for a connection to occur you will need to ensure that you know the below information from your Internet Service Provider (3G Provider):

- Username (optional)
- Password (optional)
- Server Name (optional)
- Dial Number
- APN

NOTE: As 3G is becoming more and more popular D-Link Australia will determine if new adapters when released and available can be added in future software updates.
