### **Minimum Requirements**

### **Internet Requirements:**

- An activated ADSL telephone line and account with an Internet provider
- An active NBN/UFB connection and account with an Internet provider

### Web-based Configuration Requirements:

Device with the following: • An installed Ethernet adapter or wireless adapter

Supported Browsers:

- Internet Explorer 7 or higher
- Safari 4 or higher
- Chrome
- Firefox

# 

- Android device (1.6 or higher)
- Web Browser Requirements: Internet Explorer 7 or higher • Safari 5 or higher
- Chrome
- Firefox

## **Before you Start**

• Internet Provider Account Details - If you are using an Australian or New Zealand ADSL connection, you will need your user name and password. If you do not have this information, contact your Internet provider.

Do not proceed until you have this information.

If you experience issues configuring this Modem Router, try performing a hard reset by using an unfolded paperclip to press and hold the reset button for 10 seconds while the Modem Router is powered on.

### **Connect your Modem Router**

Connect your existing Phone cable from the telephone outlet to the LINE port on the Microfilter and your telephone handset into the PHONE port.

Plug the power adapter into your modem router and connect to an available power outlet. Power Adapter Computer DSL-2790U

6 After the modem router has powered up, verify that the Power and ADSL LEDs are both lit.

6 Continue with the *Configuration* section on the other side of this document.

**D-Link** 

### Configuration

There are two options to configure your modem router:

A. **One-Touch app** - Use a mobile device with the D-Link One-Touch app. B. Web Browser - Use a web browser from your computer.

## **Option A. One-Touch Setup**

Scan the code below or search "D-Link One-Touch" (App Store or Google Play) to download the D-Link One-Touch app to your iPhone, iPad, or Android device.

iOS

One-Touch App

Once your app is installed, you may now configure your modem router. Connect to the modem router wirelessly by going to your wireless utility on your device. The default Wi-Fi Network is *dlink-2790U-z*. Connect and then continue to step 3.

**Note:** By default, the DSL-2790U has wireless security enabled. The default password can be found on a label on the under side of the device or on a configuration card included in the packaae.

3 Once connected via wireless, click on the **D-Link One-Touch** icon from your mobile device, then click Start to continue. Please follow the onscreen instructions to complete the setup.

**4** Once the Setup Complete screen appears, click **Finish**. You will then be asked if you wish to save the Profile card with all of the details that you have just configured, it is recommended to select **YES** for future reference.

Congratulations! You have completed the modem router installation.

## **Option B. Web Browser Setup**

Congratulations! You have completed the modem router installation.

### Troubleshooting

#### How do I connect my wireless devices to the DSL-2790U modem router?

- 1. Open your wireless network utility that displays available wireless networks.
- 2. Select the Wi-Fi Network name you assigned in the wizard and connect

**Note:** If you did not run the setup wizard or you reset the router to its default settings, the default Wi-Fi Network Name is dlink-2790U-z and the default password can be found on a label on the under side of the device or on a configuration card included in the package.

#### How do I change the wireless settings on the DSL-2790U modem router?

- 1. Open a web browser (e.g. Internet Explorer, Chrome, Firefox, or Safari) and enter the IP address of the router (http://192.168.1.1)
- 2. At the login screen, type in **admin** for the user name and enter the router password you created in the wizard (**admin** by default).
- 3. Go to Setup > Wireless Connection > Manual Setup to create a new Wi-Fi network name (SSID) and Wi-Fi password.

#### How do I reset the DSL-2790U modem router to factory default settings?

- 1. Ensure the device is powered on.
- 2. Press and hold the reset button on the under side of the device near the serial number sticker for 7~10 seconds.

#### Note

Resetting the router to factory default will erase the current configuration settings. To reconfigure your settings, log into the router using the and follow the Web Browser Setup Wizard or run the One-Touch Setup app
