I Forgot My Wireless Security Password

This document details how to locate your Wireless Security Password

Step 1. You will need to use a computer which is connected to your modem router via a network cable. Or a device that is already connected to your router's Wi-Fi network with pre-saved password.

Open your Internet Browser and in the address field type http://192.168.1.1.

192.168.1.1/login.htm ×

D -]	Link			
	LOGIN			
	Login in to the router	User Name : Password :	admin I Login	
BRÖADBAND				
Copyright © 2012-2013 D-Link Systems, Inc.				

Step 2. Type in the Username and Password you assigned to your modem when you were setting it up. If you did not change them, the factory defaults are:

Username: admin Password: admin

If you cannot recall the password you assigned to your modem you will need to reset the modem to factory defaults by pressing the reset button for 10 seconds. Please note that this will revert all the settings in the modem to factory settings and you will have to reconfigure it with your Internet settings and Wireless security. Make sure you have your Internet account details (given by your Internet Provider) handy.

Step 3. After logging in you will be presented with the modem's configuration pages. Please click on **Setup** tab and then on **Wireless 2.4G Setup**.

Time and Date IPv6 Mydlink [™] Settings					POIC

Step 4. Note the **SSID / Network Name**. Is it the Wi-Fi network you are trying to connect to? Scroll down to the bottom of the page, to the WPA Settings section. Your password will be in the **PSK String** field:

WIRELESS SETTING	
Wireless Mode :	Disable Always-on Schedule
Enable Multiple SSIDs :	
Multiple SSID Index :	1.
SSID / Network Name :	dlink-2870B-z
Enable Access Point :	
Disable SSID / Network Name Broadcast :	
Country :	AUSTRALIA
Channel :	2.452 GHz - CH 9
Security :	WPA2 💌
Cipher Type :	TKIP+AES 💌
Group Key Interval :	3600
WPA SETTING	
WPA type :	992.1x @ PSK string
PSK string	wifipassword

Note: Setting changes may require a reboot to take effect.

Apply

Step 5. Your modem router has two independent Wi-Fi radios (2.4GHz and 5GHz). If you are trying to connect to a 5GHz Wi-Fi network, look under **Wireless 5G Setup**.
