(ADSL 2/2+ 802.11g Wireless Modem/Router)

1. Install Device
2. Internet Settings
3. Internet Connection

> Set wireless connection

**You now have the option to add security to you network.
If you do not want security click NEXT now.**

SSID

Please choose a name for your wireless network. This can be between 1-32 characters long.
For example: DLINK

Channel

Choose a number from 1-13 to differentiate your wireless channel from other wireless networks in your area.
If you are unsure, we suggest 1, 6 or 11.

Encryption

This setting will add security to your wireless network, preventing unauthorised wireless users from accessing your network. You can choose 64bit, 128bit or the stronger WPA-PSK encryption.

WPA Key (ASCII)

Enter a string of 8 - 63 characters e.g. office14538
Above WPA key is auto-generated by the utility as a suggestion.
But you can input your own preferred key.
