--------------	--------------	----------	----

#### **Important Notes:**

- 1. Automatic factory reset when image upgrade detects a firmware region mismatch between RU and WW images. Such as firmware upgrade from RU->WW or WW->RU image.
- 2. The switching between RU & WW images will initiate an automatic factory reset. The feature differences between these images are significant and can only be aligned with a reset of the configuration.
- 3. Russian firmware version doesn't support over 56bit encrypted algorithm according to regulatory restriction.
- 4. All DSR routers with WW version are not allowed to install RU firmware image in order to prevent unnecessary misunderstanding for customers.
- 5. Microsoft Windows XP has some well-known limitation to access USB storage of DSR router, D-Link provides a Registry Script file named: WinXP.reg which can solve limitation of Windows XP environment. Without applying this script file, it cannot copy file from Windows XP to USB storage. (This issue will not happen when copy file from USB storage to Windows XP)
- 6. For any firmware downgrade situation, i.e. from a newer version to an older one, it will take more time to restart system comparing to firmware upgrade, i.e. from an older version to a newer one. If you MUST execute firmware downgrade for your own reasons, please allow DSR more time to reboot system. It will take around 3 minutes at least for this case.
- 7. DHCP reserved IP feature is changed to support "inside DHCP IP pool range" in order to meet common behavior in networking industry. Old DHCP reserved IP entries will still be valid. When creating a new DHCP reserved IP, it has to follow newer behavior.
- Now we support following 3G dongles:
   D-Link: DWM-152 A1, DWM-156 A1/A3/A5/A6/A7/A8, DWM-157 A1/B1/C1/D1, DWM-158
   D1/E1 and DWP-156 B1 and DWP-157 B1, HUAWEI: E1550, E173, EC306 and E303
- Before plug DWM-152/156/157/158 3G USB dongle, please make sure the SIM Card is NOT set PIN code.
- 10. To authenticate SSL VPN users through external databases including RADIUS, LDAP, AD and POP3, admin must also need to create user accounts with the same username and password in the local user database.

### Notes for Configuration Auto-Backup/Restore in USB Storage

D-Link DSR router series support configuration backup or restore automatically while a USB drive is inserted. Following information instructs what condition will perform backup/restore.

- The router configuration will be automatically backed up to the USB drive as soon as the USB drive is inserted. The back name has format <Model Name>\_<Serial Number>.cfg provided this USB drive doesn't have a backup configuration file from a DSR router already present.
- 2. The system LED on the router blinks 3X in amber to indicate a backup operation has started.
- 3. The configuration in the USB drive can be updated if the user manually clicks 'Save Settings' in any GUI page and provided the Model Number and the Serial Number of the router matches with the file already present in the USB drive.
- 4. In case of reboot, the router checks for the presence of configuration file (with format ModelName\_SerialNumber.cfg). If found, the configuration from the USB drive is restored on the router. If a configuration file with the correct format is present in both connected USB drives, the configuration from the first USB drive will be used to restore the router.
- 5. The USB drive can have only one configuration with the above mentioned format for each model name.
- 6. If the USB drive is plugged in to the router which is in factory default state, then during reboot, no backup is taken since no custom configuration file exists in the router by that time. The custom configuration is stored on the USB drive once the user clicks Save Settings in any GUI page.

### **Upgrading Instructions:**

#### Upgrading by using Web-UI

- Please use GUI upgrade feature to upgrade to this firmware version. For detailed installation and upgrade instructions, please refer to the Firmware Upgrades chapter in the *Unified Services Router v3.13 User Manual.*
- Please upgrade firmware from v3.12
- If your device's firmware is earlier than 3.12, please upgrade corresponding firmware based your device hardware version.
- DSR-150/150N/250/250N firmware v3.12 have two parts of firmware, Intermediate firmware and Common firmware, the list as below:

Intermediate firmware
DSR-150_A2_A3_A4_FW3.11B202E_WW/RU
DSR-150N_ A2_A3_A4_FW3.11B202E_WW/RU
DSR-250_ A2_A3_A4_FW3.11B202E_WW/RU
DSR-250N_ A2_A3_A4_FW3.11B202E_WW/RU
DSR-250N_B1_B2_FW3.11B202E_WW/RU
Common firmware
DSR-150_Ax_FW3.12_WW/RU
DSR-150N_Ax_FW3.12_WW/RU
DSR-250_Ax_FW3.12_WW/RU
DSR-250N_Ax_FW3.12_WW/RU
DSR-250N_Bx_FW3.12_WW/RU

Please follow the upgrade procedure in case fault caused during firmware upgrade.

- 1. Please check HW version on device UI first.
- 2. Select the corresponding intermediate and common firmware version for upgrade process.

Examples:

- DSR-150 HW A2 v3.11\_WW-> DSR-150\_A2\_A3\_A4\_FW3.11B202E\_WW-> DSR-150\_Ax\_FW3.12\_WW
- DSR-250N HW B1 v3.11\_WW-> DSR-250N\_B1\_B2\_FW3.11B202E\_WW-> DSR-250N\_Bx\_FW3.12\_WW
- DSR-250 HW A4 v3.11\_WW-> DSR-250\_A2\_A3\_A4\_FW3.11B202E\_WW-> DSR-250\_Ax\_FW3.12\_WW

### New Features:

Firmware	New Features
Version	
3.17	1. Force user to change default password
	2. OPEN SSL's client login URL is changed to https:/WAN IP/omnissl/
3.14	1. VLAN 1 support trunk mode
	2. L2TP/PPTP support full tunnel
3.13	1. DNA app support.
	2. OpenVPN supports manually establish tunnel.
	3. WIFI transmit power setting is changed to % instead of dbm.
	4. The number of firewall policy is shared for inbond and outbound.
	5. OmniSSL support Win10.
	6. OmniSSL support portal layout setting
	7. Application Control (Only available on Cx HW) (licensed by 3'rd party)
	8. DUA-2000 External Captive Portal support.
	9. SHA2 Hash Algoruthm support for generating OmniSSL certificate
3.12	1. Improviding device throughput when Traffic managerment enable.
	2. Bandwidth managemnt support by session number.
	3. URL filtering support wildcard.
	4. WCF support https protocol.
	5. Improving logging content information.
	6. Option WAN support.
	7. CLI support IPv6 and OpenVPN self cert.
	8. DWM-157 D1 support.
	9. OpenVPN support various authenication by userbase, Certicatate and TLS
	conbination.
3.11	1. Static route can be displayed in Route Information.
	2. OmniSSL VPN support SSL Certification generation.
	3. IPv6 VLAN support.
	4. Support VLAN/IPSec base Radius Authentication.
	5. Hostname display support for DHCP clients.
	6. IPv6 stateful and prefix delegation support.
	7. Device support 3G/4G dongle with pin code password.
	8. DWM-221 & 222 LTE Dongle support.
A second second second	9. DWM-156 A8, DWM-157 C1 and DWM-158 E1 dongle support.
	10. Support PPTP/L2TP client mode auto re-connect
reen	

	11. Support single IP or IP range to be Whitelist and Blacklist for URL filtering and Web Content Filtering.
2.11	1. PPTP/L2TP VPN Client auto dial-in feature
2.111	2. User's group and group's privileges edit support
	3. Updated max number of wireless clients
	4. Wireless IGMP Snooping support
	5. LAN IGMP Snooping support (DSR-250/250N only)
	6. OSPF support on L2TP over IPSec
	7. Category filters for device logging
	8. Support configurable IPSec backup policy
	9. Support WCF 3-month trial license
	10. Support multiple OpenVPN clients with the same certificate
	11. Alerts via SMS for WAN/IPSec/CPU/RAM events
	12. Support source port configuration for custom services
	13. Select verified DDNS services:
	a. DynDNS
	b. D-Link DDNS
	c. FreeDNS
	d. NO-IP
	e. 3322.org
	f. Oray (existing in M7)
	g. Custom
2.02	1. CPU watchdog support, the device will reboot once CPU overload.
	PS : CPU watchdod is ebale by default, but it can be disable via CLI command
	« util watchdog_disable Y »
	2. Update SSL VPN compatibility support list for Window 8.1 and Browser
	version.
2.01	1. Brand new GUI design
	2. Dynamic Web Content Filtering (Subscription is required).
	3. Supporting DHCP ranges for all subnets.
	4. VLAN on WAN for single VLAN ID.
	5. Supporting web GUI access by a particular IP or VLAN.
	6. SSLVPN authenication support external user DB.
1.09B32	<ol> <li>L2TP client mode enhancements: support MPPE and demand dialing.</li> <li>User DB enhancements: support PPTP/L2TP tunnels external authentication</li> </ol>
	though AD, LDAP and POP3.
	3. Support Selectable Outbound Interface for IGMP [HQ20121210000012]
	4. Proxy ARP: Allowing PPTP server range in range of LAN

	5. CLI enhancements: support the "space" character
	6. Web GUI enhancements: support auto parameters fill-out in the DHCP server configuration page
	7. 3G dongle supports: add Huawei E303, D-Link DWM-156 A7, D-Link DWM-157 B1, and D-Link DWM-158 D1.
	8. A new click button to quickly download Dbglogs.
	9. A new checkbox to enable/disable auto config backup.
	10. A new checkbox to enable/disable config file encryption.
	11. Support a Windows-based config viewer for encrypted config files.
	12. Support L2TP VPN client mode.
	13. Support 5 concurrent GRE tunnels.
	14. Lengthen IPSec Pre-shared key length to 64 characters.
	15. Simplify IGMP settings – allow all net to pass through DSR by default.
	16. Add package manager with single selectable 3G driver support
	17. Change IP address setting for inbound traffic management to configure LAN
	IP from server IP.
1.05B53	1. Support email address to be local ID in IPSec policy.
	2. Support SHA-1 in Phase 1.
	3. Support DH group need support group 1, 2 and 5 for Phase 1.
	4. Add PFS group 1, 2 and 5 for Phase 2.
	5. Add a keyword with "." (dot) in Blocked Keywords text box.
	1. Support 3G dongle DWM-152 A1/A2/A3, DWM-156 A1/A2/A3, Huawei E1550, E173.
1.05B20	2. Pre-Share key can be configurable in wireless wizard.
	3. Change design to disable auto refresh for Traffic Monitor by default.
1.05B06	Support SSH remote management from WAN port
1.01B46	It's the first release.

### Changes of MIB & D-View Module:

Firmware Version	New Features
1.05B06	Support LED and IPSec MIB.
1.01B46	It's the first release.

### SSL VPN Compatibility List:

SSL-VPN SPLIT TUNNEL & SSL-VPN FULL TUNNEL		
I.E-8.0, Firefox 16.0.1, Opera 12.0.2, Google Chrome 22.0.1229.96m		
I.E-8.0, Firefox 33.1.1, Opera 26, Google Chrome 40.0.22.09		
I.E-9.0, I.E-10.0, Firefox 33.1.1, Opera 26, Google Chrome		
40.0.22.09

I.E-10.0		
Firefox33.1.1, Opera 26, Google Chrome 40.0.22.09		
Firefox 33.1.1, Opera 12.0.2, Google Chrome 22.0.1229.96m		
MAC Firefox 3.6.15, MAC Safari 4.1.3(45533.19.4)		
MAC Safari 5.1.7.0, MAC Firefox 33.1.1		

### **Problem Fixed:**

Firmware	Problems Fixed
Version	
3.17	1. Wan port speed graph on dashboard page is not showing properly.
	HQ20190319000009
	2. "Device is in high performance mode" message is not showing on
	dashboard page if 'Traffic overview' button is disabled in Manage dashboard page. HQ20190514000007
	3. User is able to add single address/address range as default Vlan IP address
	when selected as custom Vlan. HQ20190530000010
	4. Unable to send the email logs. HQ20190606000007
	6. Device is showing error popup in OPENVPN page when user try to
	upload/generate certificates with backslash character. HQ20190621000018
	7. IPsec tunnel cannot be established after factory and restore configuration. HQ20190611000014
	8. L2TP tunnel is getting disconnected after 10 minutes even though
	"Reconnect mode - Always on" and "Auto connect" options are enabled.
	HQ2019073000008
	9. Port forwarding is not work when bandwidth management is enable.
	HQ20190531000006
	10. Time settings are loading incorrectly. HQ20190926000008
	11. Lock the "Remote IP" to "Any" only if remote endpoint is FQDN. HQ20191016000008
	12. Add logging for OpenVPN client connect and disconnect.
	HQ20200204000009
	13. SIP registration Fails while calling using PPTP HQ20190819000008
	14. VLAN Enable changing to OFF causes losing connection
	HQ20190919000003
	15. VPN user's are bloqued after some time HQ20200322000001
	16. OpenVPN logs enhancement HQ20200204000009
	17. VLAN Enable changing to OFF causes losing connection
	HQ20190919000003
3.14	1. WAN3 statistics are not getting updated on the Dashboard page
	HQ20180910000003
	2. [CLI]system status WAN MAC address field is showing incorrect
	information, when WAN is configured as PPTP/L2TP/PPPoE
	HQ20190221000005

	3. VLAN functionality is not working after changing the Option port from LAN
	to WAN/DMZ. HQ20181106000013
	4. Default Vlan is unable to access from custom Vlan. HQ20181002000007
	5. Able to restore configuration from old HW version to new one.
	HQ20181018000014
	6. Need to DROP invalid state TCP packets received. HQ20181115000020
	7. Device will reboot when the subnet mask of remote network is configured
	32 in PPTP client page. HQ20190222000010
	8. Turn off the debugging log for device logging. HQ20190221000004
3.13	1. Remove BSSID from traffic selector
	2. Cannot browse network share when WAN is connected to the modem
	HQ20170928000003
	3. Jumbo packet settings turns off after a reboot or power outage
	HQ20171114000010
	4. No traffic between DSR PPTP client to DFL HQ20171129000003
	5. Unable to add out of LAN subnet for firewall rule HQ20170731000017
	6. Can't remove rule pirority after deleting one of rules HQ20180312000007
	7. Unable to save VLAN settings when PPTP/L2TP server's client IP address
	range is configured VLAN subnet HQ20180430000005
	8. No openvpn logging entry HQ20180419000014
	9. Unable to configure x.x.x.0 IP address in GRE setting HQ20180601000011
	10. Weakness in user data validation (reflected cross-site scripting)
	(CVE-2018-6212) HQ20180531000002
	11. Able to set the SSID with spaces from CLI, but not able to configure the
	same from GUI HQ2018060600002
	12. Traffic selector setup page error HQ20180704000009
	13. The number of L2TP tunnel can not reach specification
	HQ20180705000012
3.12	1. L2TP over IPsec disconnect after reboot or logging enable.
	HQ20170120000005
	2. Failed restore config due to large file size. HQ20170309000002
	3. WAN auto-Rollover is not work. HQ20170612000008
	4. Logging ascending issue. HQ20170911000008
	5. OpenVPN and OmniSSL can't access the configured network.
	HQ20171016000004
	6. L2TP over IPsec VPN with AD or NT Domain authentication is not work.
	HQ20170515000012

	7. USB SharePort transmission speed slow. HQ20170614000006
	8. CVE-2017-14491 Dnsmasq Vulnerability.
	9. SMS alert functionality is not working when WAN mode is configured as
	auto rollover between WAN1 & WAN2.
	10. Unable to connect wireless clients on untagged interface when SSID is
	configured with trunk mode.
	11. SMS functionality is not working until changing WAN mode from WAN1 to
	WAN3 with DWM-156-A7 dongle.
	12. IPsec clients connected behind NAT will have traffic loss
	13. Unable to reach DUT LAN IP over IPSEC tunnel when WAN Mode is
	configured as load balancing.
	14. User based OmniSSL server policy is not working if custom OpenVPN
	network is configured in OpenVPN settings page.
	15. Unable to configure more than 16 characters for username and password
	of PPPoE WAN Type. HQ20170103000005
	16. Unable to access GUI after change default VLAN IP network.
	HQ20170207000017
	17. WAN is probably link down if the cable is plugged during device boot up.
	HQ20170413000006
	18. Static DNS IP is required when static IP is configured for WAN interface.
	HQ20161213000003
	19. Unable to generate the OPENVPN certificate when user input the space
	characters while creating OPENVPN certificates. HQ20170628000012
	20. Unable to extract downloaded OpenVPN certificates from GUI.
	21. 3G is not getting UP when WAN Mode is configured as Auto rollover with
	WAN3 as primary.
	22. Unable to configure the IP aliasing entry on WAN2 interface.
	23. Unable to support '/' (slash) character in Approved URLs and Blocked URLs
	page.
	24. Unable to access GUI pages with IPV6 address of LAN.
	25. Unable to Establish the PPTP and L2TP VPN tunnels with External
	authentication servers (Active Directory, NT Domain and LDAP Servers).
	26. IPsec tunnel status do not update properly for Mobile phone.
	HQ20170222000011
	27. Webpage Error on Google Chrome with QUIC protocol enabled.
	HQ20170428000006
	28. Unable to enable multiple IPsec policy for identical remote network.
	HQ2017021000006
dlinkigreen	

	i	
		29. Unable to configure DNS server in IPsec tunnel mode.
		HQ20170510000003
		30. Change max. value for NAT keep alive time to 3600. HQ20170531000020
		31. Unable to allow TeamViewer when IP/IDP enable. HQ20170301000007
		32. CVE-2014-0195, CVE-2014-0224, CVE-2016-2183, CVE-2014-3566
		Vulnerability. HQ20170502000007
		33. DWM-156 A3 is not work. HQ20160629000012
	3.11	1. Backup tunnel is not getting auto establish in DSR-150N.
		HQ20140317000009
		2. Not able to run FTP and HTTP traffic from SSL VPN client for PPP links
		3. Device is blocking the sites whose respective category is blocked but
		unable to generate blocked logs in the device or syslog server configured.
		<ol> <li>Couldn't able to establish GRE tunnel when wan is PPPoE of VLAN on WAN type</li> </ol>
		5. Able to run traffic over OpenVPN Access Server tunnel when it is disabled.
		6. Unable to upgrade firmware, save/load configuration and upload ca
		certificate from D-View browser.
		7. D-View MIB Compiler is closed after trying to add an IPSec VPN Policy.
		8. Unable to send traffic through IPSec tunnel sometimes after enabling the
		logs in the device.
		9. Content filter functionality is not working after disable and enable content
		filtering option.
		10. Unable to Block Invalid Client Certificates for OpenVPN.
		11. Unable to access device after configuring WAN 'host name' with max of 128 characters in GUI.
		12. DDNS status message is not displaying properly when there is symbol # in
		the password. HQ20160422000009
		13. Device configuration is getting increased with reboot even without a
		configuration change. HQ20160406000030.
		14. Unable to access SMS Service page, device is redirecting to login page.
		15. Device is getting hanged when we run UDP traffic over OmniSSL tunnel.
		16. OmniSSL server policy' is not working for policy type as "User"
		17. IPSec tunnel is not establishing when max SA lifetime(2147483647 sec) is
		configured.
		18. IP protocol version is changing to IPv4 mode from IPv6 when user editing
		IPv6 manual IPSec policy
		19. Dashboard fields were not updated properly after overnight traffic of SSL
		VPN tunnel.

43. Setup wizard user is Unable to configure local network or remote network
fields with network address in IPSEC GW-GW policy.
44. IP/MAC binding logs are not updating correctly in view logs page.
45. Change Severity of LAN/WAN & WAN/LAN kernel logs from Warning to
Information
46. Unable to check UPnP functionality with UPnP wizard
47. Device is accepting the IPSec Policy name with special characters from
Security Wizard.
48. Device is accepting special characters for SSL-VPN Resource name and
Policy Name in SSL-VPN pages.
49. IP/MAC binding functionality is not working when log dropped packets are
enabled in the rule.
50. Unable to connect wireless clients on untagged interface when SSID is
configured with trunk mode.
51. WAN PPTP/L2TP is not getting up after firmware upgrade from remote side.
52. Unable to login to OmniSSL portal with MS-CHAP and MS-CHAPv2
authentications.
53. Device should not allow to configure remote and local identifier as
USER-FQDN in main mode.
54. Unable to establish OmniSSL tunnel with username and password contains
maximum characters length.
55. Unable to add OmniSSL configuration if the client name was same as 'user
name' of deleted entry.
56. The Idle Timeout value should be in "minutes" not in "seconds" in add
Group page.
57. Not able to disable the DDNS settings when we configure the password filed
with # symbol.
58. TFTP ALG functionality is not working if inbound firewall rule was added
with same PC.
59. Able to configure phase -1 SA lifetime field with more value than mentioned
range.
60. User failed to enable other Phase2 Encryption Algorithms when we enable
"None".
61. 'Block all URL' option is going to disable state after performing select
all+delete operation on Blocked URL list.
62. Domain name configuration issue from VLAN settings page
63. Current channel filed should be update properly when we configured
channel as 12 or 13 in radio settings page from GUI for Australia country.

	64. Hostname validations should be same from setup wizard and WAN settings
	page.
	65. LED status should be show same for LAN and WAN ports which are not
	connected to device.
	66. Maximum characters allowed in 'Client name' field should be same as of
	'OpenVPN user name' field.
	67. Select all option is not available in OmniSSL server policy page and help page to delete all entries.
	68. Device is displaying Wireless VLAN List options in port VLAN page, even it doesn't support wireless.
	69. Device is throwing 'Undefined' pop up message in Dynamic DNS Wizard
	page.
	70. IPSec GW-GW tunnel got disconnected after overnight test.
	71. Unable to get WAN up when Russian dual access WAN type is configured
	with Static ips and server is configured with domain name. HQ20161213000003
	72. DNS configured in Router is not working. HQ20170119000012
	73. Able to configure 0.0.0.0 as ip address field in traffic selector page. HQ20160922000014
	74. Device is not allowing '/' (slash) character in Approved URL
	HQ20161025000011
	75. Need to display active private routes in "IPv4 routes table in GUI" HQ20150820000012
	76. Able to see IPV6 related information in WAN status and shell even the IP
	mode is changed to IPV4 only, if common PPPOE session is enabled in IPV6 WAN.
	77. User is unable to change IPV4 WAN settings when the IP mode is changed
	to IPV4 only with common PPPOE session enabled.
	78. Both IPV4 & IPV6 WAN functionality is not working if common PPPOE
	enabled when idle timeout is configured in IPV4 WAN.
	79. IPV6 WAN is not getting UP if IPV4 connection is not available when
	common PPPOE session was enabled.
	80. Unable to establish the PPTP VPN and L2TP tunnels using service route
	management.
	81. Able to configure same name for server and client in OpenVPN certificate
	generation but unable to use them in OpenVPN settings page.
	82. Unable to save maximum PPTP Client IP Range in Server side.
	83. Unable to save maximum L2TP Client IP Range in Server side.

48. Device is displaying WLAN edit configuration page for VLAN through CLI.
49. Synchronization Select Interface options of UPNP in CLI and GUI.
50. Showing wrong firmware version in SSLVPN portal page.
51. Able to configure the DMZ configuration without enabling the DMZ.

52. User is not able to access the device CLI using SSH.
<ol> <li>53. Device is getting default when downgraded from 1.09b08.img to 1.08b39.img.</li> </ol>
54. No options are available for VLAN configuration on wan page from CLI.
55. Unable to upgrade the firmware via USB.
56. Error message should be proper when we try to add DMZ reserved entry without DMZ enabled.
57. LAN host can't receive 6 to 4 prefix radvd IP from the device.
58. Device is showing '***failed to open ?directory' in CLI when log in by telnet.
59. Kernel panic while running traffic over VPN tunnel.
60. IPS signatures can't be loaded if IPS is enabled.
61. ISATAP functionality is not working.
62. PPTP client status through CLI is showing "Disconnected" even it is connected.
63. Interfaces are not displaying when user configures status route through CLI.
64. Improve PPTP performance.
65. Improve RFC 2544 UDP performance via IXIA.
66. Support DHCP option 66
67. Unable to establish the IPv6 IPSec tunnel after edit the policy.
68. GW-GW tunnel can't be established when traffic selectors "SubnetRange".
69. Outbound traffic over IPSec tunnel is blocked when default outbound policy is configured "block always".
 70. No option for L2TP mode in CLI when IPSec policy is added.
71. Kernel panic while executing VPN manual tunnel automation scripts.
72. Device is showing entry for the wireless clients which are trying to authenticate in "wireless clients page".
73. Need to regenerate selfsigned certificates.
74. Unable to establish GRE tunnel when WAN ISP type is configured for PPTP/L2TP.

		75. DNS request timeout in LAN host by nslookup when IPS/IDS is enabled in the device.	
		76. Unable to connect PPTP server using LDAP External Authentication.	
		77. Unable to connect L2TP server using LDAP External Authentication.	
		78. "configuration could not be saved" message when user done any configuration through CLI for the first time.	
		79. Getting critical error when clicked save button in DHCP Reserved IP address page after upgrading from 1.01B46. HQ20130827000010	
		80. Need username and password fields for open VPN client authentication in open VPN configure page. HQ20130724000015	
		81. Custom VAP active can't be enabled or disabled for device time. HQ20130917000005	
		82. SSID "DSR-250N_2" can be visible if the user configure "active time" but disabled the VAP. HQ20130902000003	
		83. VLAN firewall rule is not work. HQ20130930000008	
		84. Default SSIP can be visible even though WIFI disable. HQ20131108000016	
		85. Need to remove the Debug log after device gets bootup in serial console. HQ20131217000002	
		86. Change source IP address option for inbound traffic selector to destination IP address. HQ20140121000011	
		87. LAN client page is not displaying the connected LAN clients.	
		88. When the GRE tunnel is established, local PC ping to peer DSR's LAN IP address can't get response.	
		89. Usage of extended authentication when redundant gateway checkbox is enabled	
	1.08B44	1. Security Vulnerabilities Addressed: Devices respond clients some	
		unnecessary information, and hence give hackers a chance to get a	
		non-persistent root shell.	
		Reference: (CVE-2013-5945, CVE-2013-5946)	
		Solution: Remove all unnecessary root user accounts	
		2. After rebooting devices, synchronization with NTP didn't works.	
		(DRU20130424000003)	
		3. Firewall rule with scheduling is not work. (DUSA20130125000001)	
	1.08B39	1. Including 1.08B31 all fixes for DSR-250N in this version	
		2. The MPPE function does not work in L2TP client mode	
dlinkigreen			

	3. Restore configuration file to different HW version
	4. WAN responses ARP packet
	5. Add a message to inform user, who need to change 443 port number for
	SSLVPN or remote management once two features are enabled.
	6. Can't work with any AP connected with network cable
	7. Device time not synchronizing with default NTP servers after reboot.
	8. Firewall rule disable is not work unless reboot device.
	9. WIFI stability issue under heavy BT traffic
1.08B31	1. The OpenVPN Local Network page disappear when I used IE8 or IE9 to
	manage the DSR.
	2. USB sharing could not download/upload large file
	3. DWM-156 A3, A6 compatility issue
	4. Security Vulnerabilities Addressed: Persistent root access.
	Reference:
	http://packetstormsecurity.com/files/118355/D-Link-DSR-250N-Backdoor
	<u>.html</u>
	<b>Solution:</b> Removed CLI commands that could allow someone to overwrite
	the super user password and gain root access to the device. Root user
	account will be completely removed in the next firmware version.
	5. Prevent to upload config file into different model
	6. Unable to change the Wireless output power
	7. Device stuck under BT download
	8. X.509 certificate expired issue
	9. Security Vulnerabilities Addressed: uPnP vulnerabilities identified in the
	audit of libupnp code base.
	Reference: CVE-2012-5958, CVE-2012-5959, CVE-2012-5961,
	CVE-2012-5962, CVE-2012-5963, CVE-2012-5964, CVE-2012-5965
	Solution: Patched Intel SDK libupnp v1.3.1 to add the following; 1) use
	'snprintf' and 'strncpy' instead of 'sprintf' and 'strcpy', 2) While doing a
	'strncpy', check if we are copying more bytes than the destination string
	size.
	10. DNS query issue for L2TP WAN type
1.05B53	1. DSR-250 and 250N don't show Logs for tunnel disconnect and Logout for
	SSL VPN & port forwarding.

Т
2. "LAN clients" page is not displaying the connected information.
3. CLI wan1 status does not show wan1 physical interface information when
device is in RU firmware dual PPPoE mode.
4. When server IP is configured with FQDN, Wan L2TP over DHCP connection
does not reconnect after device reboot.
5. Default VLAN is associated with all the wireless SSID after reboot.
6. "Block ICMP" is not work for a SSL VPN policy with permit permissions.
7. Traffic is not going from PPTP/L2TP client to device's LAN after changing
WAN ISP until disable and enable PPTP server again.
8. When the user login SSL portal with wrong credentials domain name in I
browser address bar, the browser will not refresh back to 'SSL portal login
page.
9. Dyndns name provided in the SSL portal page will be changed into the
device WAN IP, if the user try to login SSL portal page with wrong credentials in Firefox browsers.
10. Device's MAC address field in WDS page is blank in RU image.
11. Device is taking 40-50 seconds to apply the configuration in VLAN page of
RU image.
12. Wireless client status page is showing wrong Authentication and
Encryption types.
13. Device GUI is getting stuck after running bulk traffic over PPTP/L2TP
tunnel.
14. "Connect" button is not working for IPv6 gw-gw policy in Active VPNs pag
when IPv6 WAN is radvd IP.
15. No information on WLAN Domain when country code is set to Japan.
16. Firewall rule with schedule is working correctly only for GMT time zone.
17. Device displaying critical error message when trying to upload certificate
to activate OpenVPN server/client.
18. Unable to access GUI after factory reset and power OFF/ON the device.
19. Wireless clients are not getting updated in Wireless Clients status page.
20. UPnP process is not running in Dual Stack IPv4/IPV6 mode.
1. IPv6 to IPv4 tunneling is not work.
2. Internet web surfing is very slow for WLAN client if SPPE enabled.
3. Remove CLI command which is not supported in DSR-250/250N.
4. PPTP client is getting disconnected while uploading and downloading files
using windows sharing.
using windows sharing. 5. Device shell is getting stuck after running bulk traffic over PPTP/L2TP

	tunnel.
	6. Bandwidth Usage and Used applications are not displayed in dashboard.
	7. Default VLAN will be associated with all the wireless AP after reboot.
	8. Fixing L2TP doesn't reconnects to L2TP server after reboot.
	9. Fixing wireless clients is not displayed on status page.
	1. Improving link up time of WAN interface less than 1 minute after device
	power on.
1.05B06	2. Fixing the printer shared port detection issue.
	3. Fixing PPTP pass through is not working.
	4. Fixing SSL tunnel is disconnected when user tries to download 200 MB file.
	1. Improving link up time of WAN interface to $1 \sim 1.5$ minutes after device
1.01B56	power on
	2. Fixing PPPoE isn't working in custom MAC address

### **Known Issues:**

Firmware	Known Issues
Version	
3.17	1. <b>OpenVPN Certificates Limitation</b> : Due to OpenVPN & SSL component
	upgrade, the old certificates generated/uploaded (in OpenVPN Certificates)
	are not compatible with the new OpenVPN component.
	Users either have to reconfigure (if custom certificates are being used or
	access server/client is chosen) or share updated default certificates to Clients
	(if default certificate is being used, as default certificate is updated) to be able
	to continue using OpenVPN.
