

DWM-315 Remote Management via SMS

Go to SMS & Event > Configuration.

Enable Event Management.

Under SMS Account List – click on "Add".

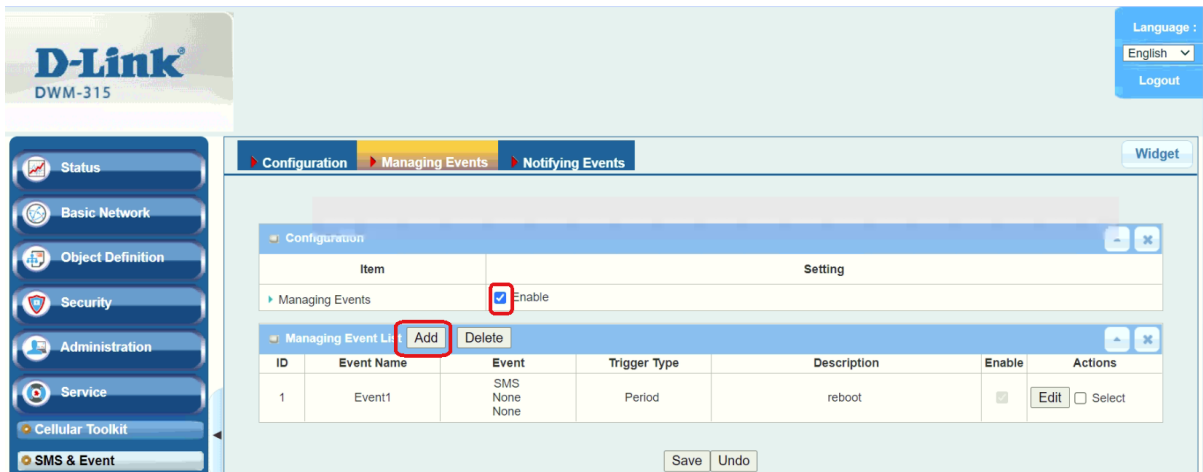

The screenshot shows the D-Link DWM-315 web interface. The left sidebar contains navigation options: Status, Basic Network, Object Definition, Security, Administration, Service, Cellular Toolkit, SMS & Event (selected), and Location Tracking. The main content area is titled 'Configuration' and includes sections for 'Event Management' (with 'Enable' checked), 'SMS Configuration' (with 'Message Prefix' and 'Delete Managed SMS after Processing' options), and 'SMS Account List' (with 'Add' and 'Delete' buttons). Below these is a table with columns: ID, Phone Number, Phone Description, Application, Send confirmed SMS, Enable, and Actions. The table contains one row with ID 1, Phone Number 0953606923, Phone Description 'first', Application 'Event Trigger', Send confirmed SMS 'Enable', and Enable checked.

Specify the phone number from which the management SAM will be coming. Enable the required options.

The screenshot shows the 'SMS Account Configuration' form. The 'Phone Number' dropdown is set to 'Specific Number' with the value '0953606923'. The 'Phone Description' is 'first'. The 'Application' is 'Event Trigger', 'Send confirmed SMS' is 'Enable', and 'Enable' is 'Enable'. The 'Save' button is visible at the bottom.

Go to the "Managing Events" tab.

Make sure the "Managing Events" is enabled. Add a new Managing Event:

Specify what text will trigger the event and what action:
