

DFL-500 with f/w 2.36,build075, 030604 PPTP Setup

Go to User > Local. Create new user(s) for PPTP connection:

The screenshot shows the D-Link Firewall Appliance web interface in Microsoft Internet Explorer. The address bar shows <https://192.168.0.19/theme1/index?login=1>. The page title is "D-Link Firewall Appliance DFL-500". The left sidebar shows the navigation menu with "User" selected. The "Local" tab is active. The "Edit User" dialog box is open, showing the following fields:

- User Name:
- ☐ Disable
- ☒ Password:
- ☐ Radius:
- ☐ Try other servers if connect to selected server fails.

Buttons: OK, Cancel

The screenshot shows the D-Link Firewall Appliance web interface in Microsoft Internet Explorer. The address bar shows <https://192.168.0.19/theme1/index?login=1>. The page title is "D-Link Firewall Appliance DFL-500". The left sidebar shows the navigation menu with "User" selected. The "Local" tab is active. The "Local" user list table is displayed:

User Name	Type	Modify
pptpuser	LOCAL	 

Buttons: New

Under User > User Group create a new Group and add the PPTP user(s) into the Group:

The first screenshot shows the 'Edit User Group' dialog box. The 'Group Name' is 'pptpgroup'. The 'Available Users' list contains 'pptpuser', and the 'Members' list also contains 'pptpuser'. The 'OK' button is highlighted.

The second screenshot shows the 'User Group' management page. It displays a table with the following data:

Group Name	Members	Modify
grouplocal		 
pptpgroup	pptpuser	 

Below the table is a 'New' button.

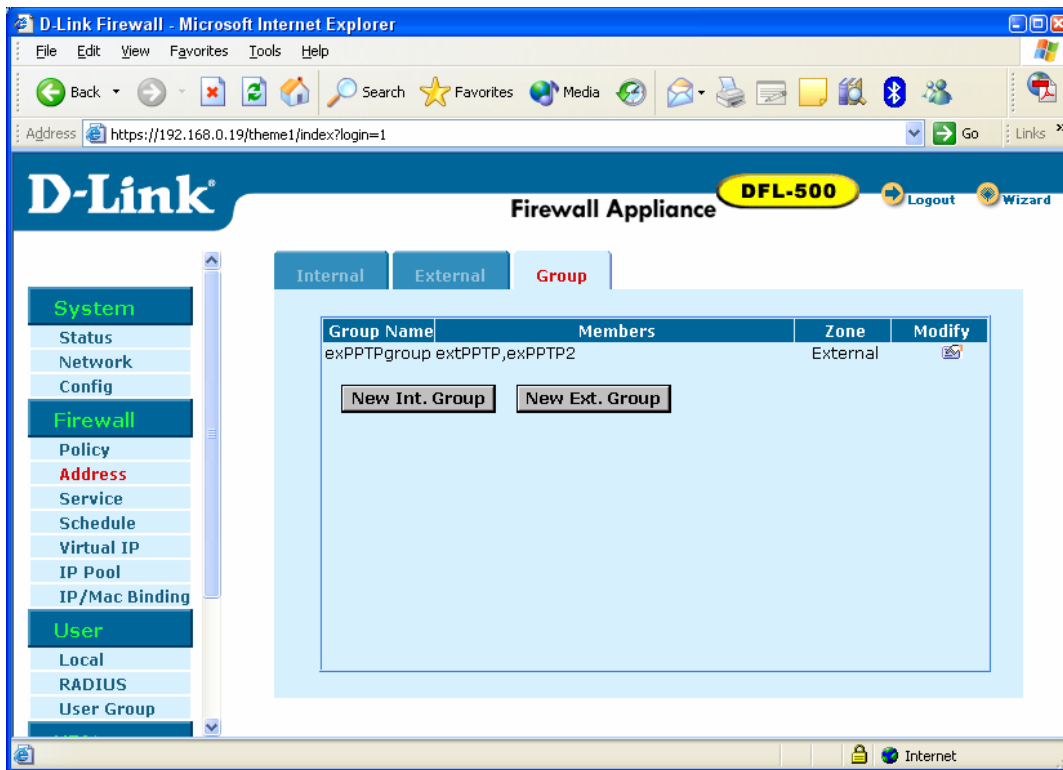

Go to Firewall > Address. Create IP address entries (for PPTP users) on External interface and add them into a group:

The first screenshot shows the 'External' tab in the Firewall Appliance interface. It displays a table of IP address entries:

Name	IP/Netmask	Modify
External_All	0.0.0.0/0.0.0.0	
extPPTP	192.168.0.17/255.255.255.0	
extPPTP2	192.168.0.18/255.255.255.0	

A 'New' button is visible below the table.

The second screenshot shows the 'Edit Address Group' dialog box. The 'Group Name' is 'exPPTPgroup'. The 'Available Addresses' list contains 'extPPTP' and 'extPPTP2'. The 'Members' list also contains 'extPPTP' and 'extPPTP2'. The 'OK' and 'Cancel' buttons are at the bottom.

Under Firewall > Policy create a Policy for the PPTP group:
