

DUB-AV300

How To Capture Video

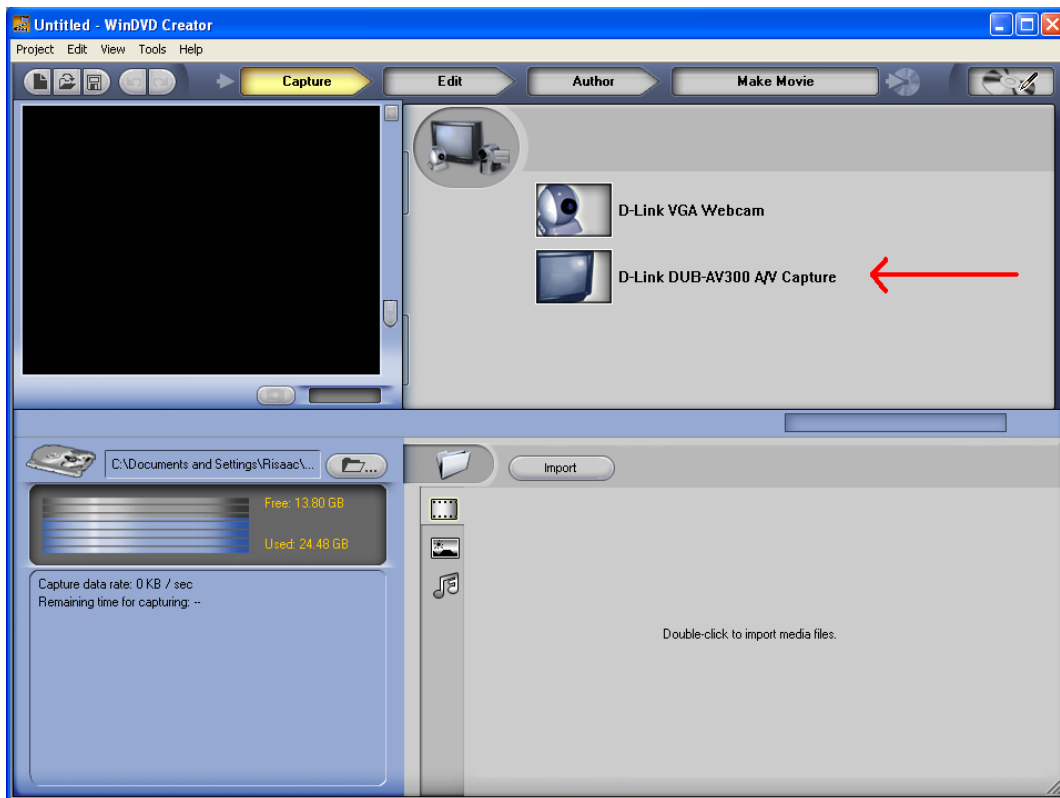

Double Click on the shortcut INTERVIDEO Win DVD

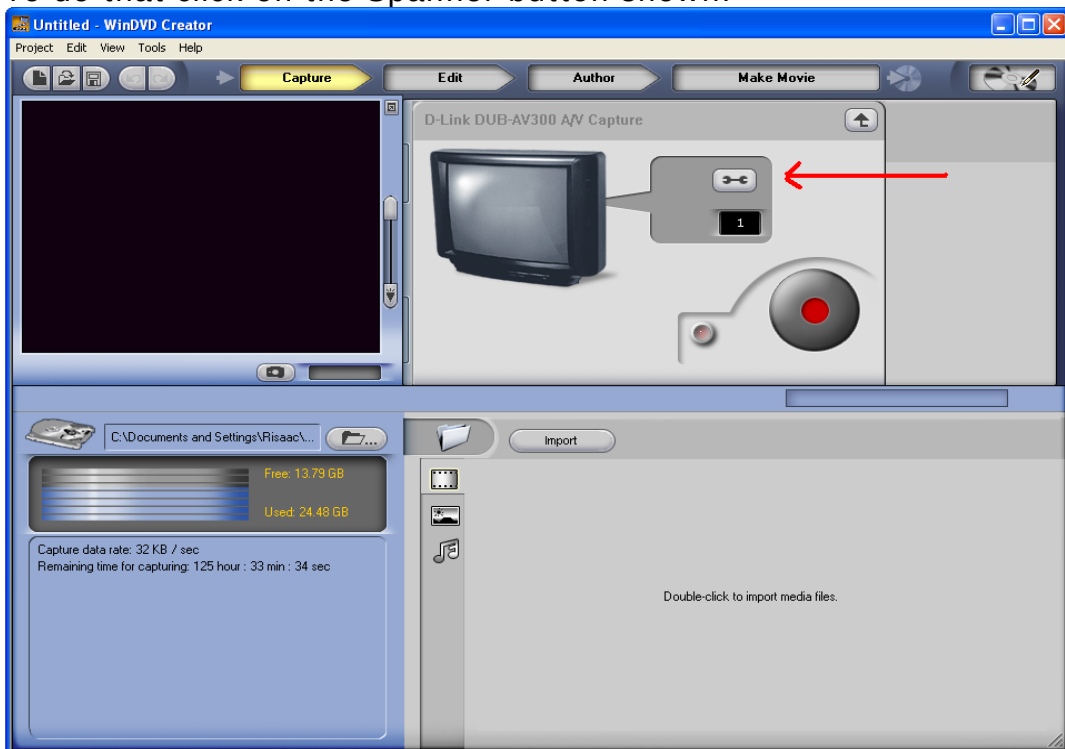

Then click on the 'Capture video into hard disk' button

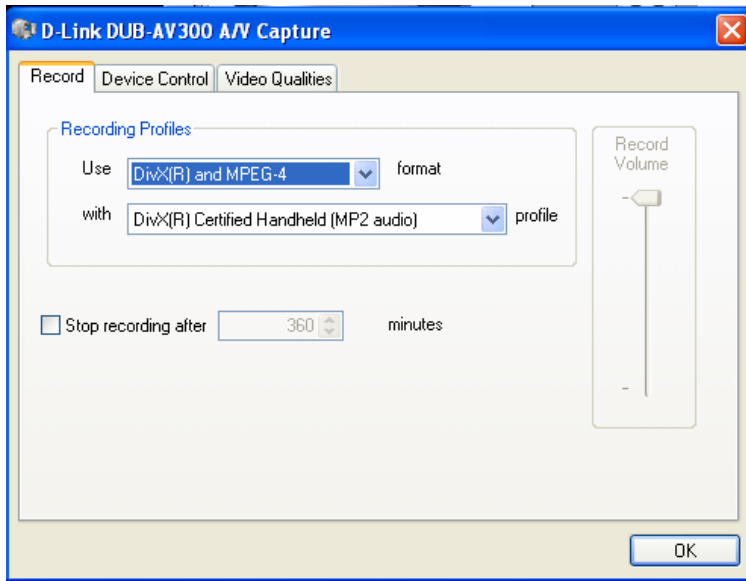

Select the DUB-AV300 device as the capture portal

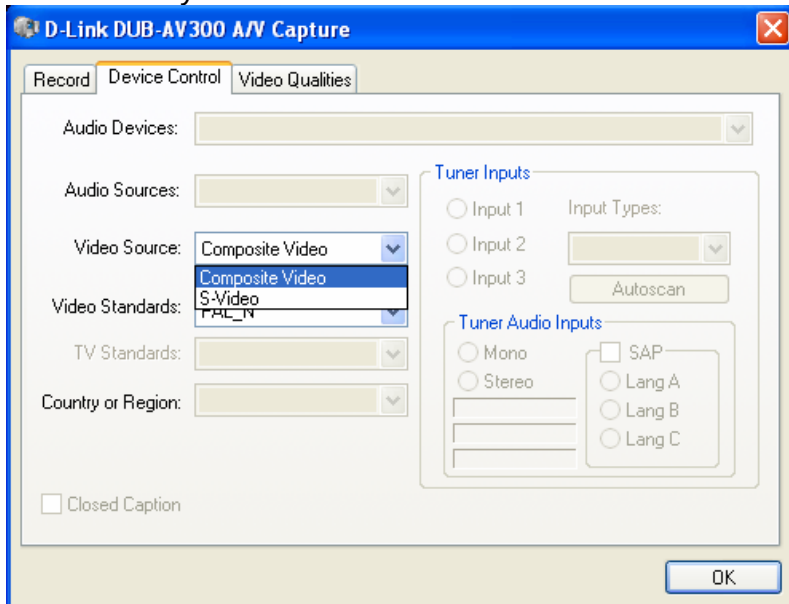

The image should be displayed in the box in the top left of the screen, if nothing is found you might have to select the correct viewing settings (source and format PAL, NTSC etc). To do that click on the Spanner button shown.

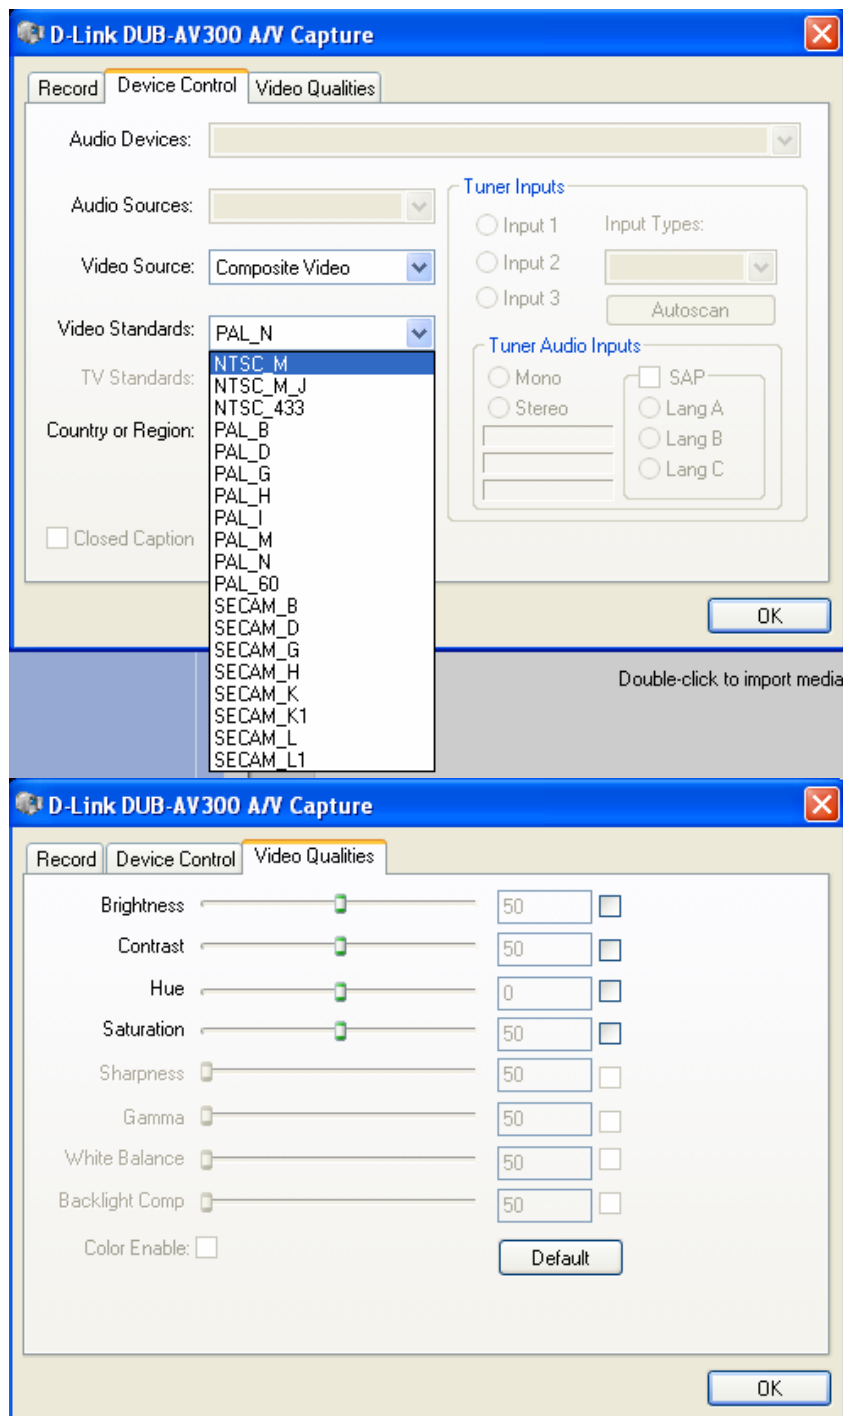

You can change the Record and playback settings here.

Make sure you have the correct Video Source selected:

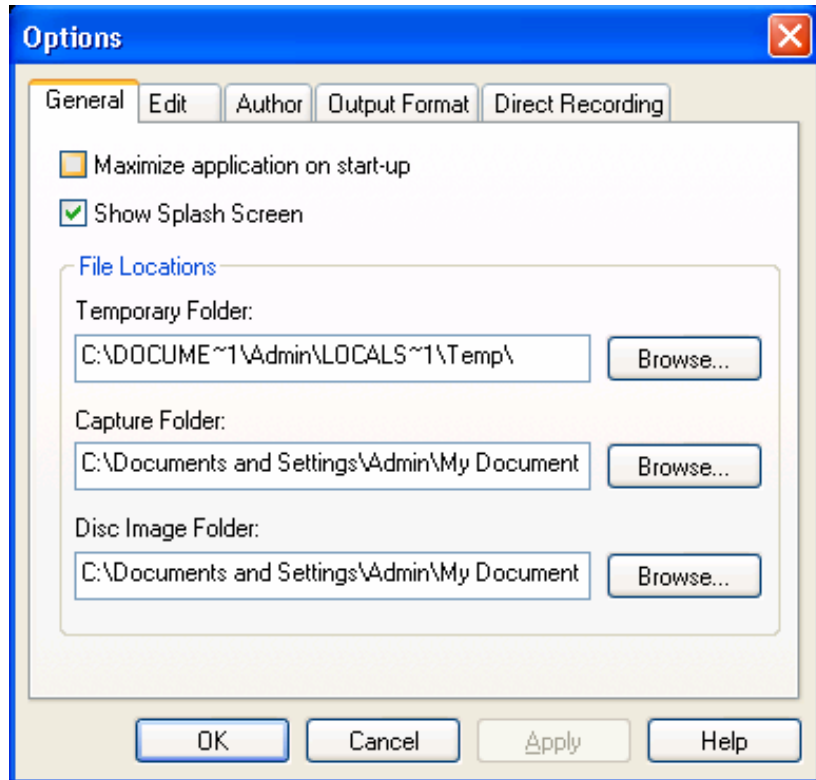

Once you see the image in the preview area, you can record the video onto your hard drive. To start recording, press the Record button.

You can find the recorded video files in My Documents > My Videos folder. You can modify the default location of the recorded videos under Tools > Options > General:
