### D-Link NetDefend UTM Subscription

The standard NetDefend UTM (Unified Threat Management) Subscription provides your security device with UTM services for 12months starting from the day you activate or extend your service. Your NetDefend UTM Subscription should be renewed regularly to provide your security device with important updates and your network with the most up-to-date security service available from D-Link.

NetDefend UTM Subscription includes 3 optional services, IPS, Anti-Virus and Web Content Filtering. Customer can purchase either one of the 3 or any service combination.

#### **D-Link NetDefend IPS Subscription**

D-Link adopts the unique technology - Component-based signatures, which are built to recognize and protect against all varieties of known and unknown attacks, and address several aspects of an attack including payload, NOP sled, infection, exploit and more. In terms of signature coverage, the database includes attacks and data from a global attack sensor-grid and exploits collected from public sites such as the National Vulnerability Database and Bugtrax.

D-Link commits to deliver high quality IPS signatures by constantly creating and optimizing the signatures via D-Link Auto-Signature sensor system. Without overloading the existing security appliances, D-Link IPS signatures ensure a high ratio of detection accuracy and a lowest ratio of false positive.

#### **D-Link NetDefend Anti-Virus Subscription**

NetDefend UTM Firewall implements Stream Based Virus Scanning technology without caching the incoming files first, thus increase the inspection performance of UTM Firewall, and ease the nightmare of network bottleneck while enabling antivirus feature on UTM Firewall.

NetDefend UTM Firewall adopts the Signatures from the Well-Known Kaspersky Lab to enable customers the prompt signature update time and high quality antivirus signatures.

Built-in extreme performance AV acceleration engine together with stream-based virus scanning technology, NetDefend UTM Firewall blocks virus and malware before they ever reach the desktops or mobile devices, thus creates a safer network environment for SMB and enterprises.

#### **D-Link NetDefend Web Content Filtering Subscription**

Web surfing is becoming a critical concern of enterprise business, D-Link Web Content Filtering service enforces protection and management policy in terms of Internet resources access for your organization.

NetDefend Web Content Filtering Subscription helps organizations Monitor, Manage, and Control employee usage of and access to Internet resources. It puts management back in control, enabling a more business orientated and cost effective usage of the Internet.

Allow organizations to gain significant cost savings through:

**1)A reduction in wasted staff time** (by reducing inappropriate web surfing).

**2)Reduced Internet access costs** and achieving bandwidth savings – by limiting and / or controlling non-business related use, and improve network response

**3)Reducing legal exposure** to work place relations (e.g. sexual harassment cases / child pornography and the adverse publicity that an incident would generate)

**4)Reduced costs for recovering from an attack** as less inappropriate content will be allowed to enter into the network.

## Activate your update service of UTM firewall

D-Link provides 90 days free trial for IPS, Anti-Virus and WCF service. After 90 days trial period expired, you need to subscribe NetDefend UTM Subscription Package and enter authentication code onto the device GUI to renew your either one of NetDefend UTM Service or all service combination you purchased.

## How to activate 90 days free trial Update Service of UTM firewall?

1.Please login your account on NetDefend Center, and click "UTM Firewall Service" of My D-Link, and click "Activate 90 days trial" button.
