# PRODUCT SETUP

## INSTALL YOUR ROUTER

### Step 1

Position your router close to your modem and the computer that is already online. Place this router in an open area of your intended work area for better wireless coverage.

### Step 2

Unplug the Ethernet cable from your modem that is connected to your computer. Plug it into the LAN port labeled 1 on the back of your router. The router is now connected to your computer.

### Step 3

Find another Ethernet cable and plug the of end of this cable into the port labeled INTERNET on the back of the router. Plug the other end of this cable into the Ethernet port on your modem.

### Step 4

Connect the supplied power adapter into the power port on the back of the router and then plug into a power outlet or surge protector. Verify the power light is lit. Below is a basic network setup.

# PRODUCT SETUP

## RUN EASY SETUP WIZARD AND mydlink SERVICE

### Step 1

From the computer you connected to the router, open a web browser and enter <http://192.168.0.1> or <http://dlinkrouter> Then, press Enter and you will be directed to the D-Link Setup Wizard page, which detects INTERNET connection type.

#### WELCOME TO THE D-LINK EASY SETUP WIZARD

The router is detecting your Internet connection type. Please wait until the router provides suitable settings for your configuration.

### Step 2

According to the detection result, follow the on-screen instructions to configure your INTERNET setting. If your INTERNET setting is DHCP, the wizard will bring you to the page of "CURRENT NETWORK SETTING".

#### CONFIGURE YOUR INTERNET CONNECTION

Please fill out the required fields and click "Connect"

# TROUBLESHOOTING

## SET-UP AND CONFIGURATION PROBLEMS

### 1. HOW DO I CONFIGURE MY DIR-600L ROUTER, OR CHECK MY WIRELESS NETWORK NAME (SSID) AND WIRELESS ENCRYPTION KEY?

- Connect your PC to the router using an Ethernet cable.
- Open a web browser and enter the address <http://dlinkrouter> or <http://192.168.0.1>
- The default username is 'admin'. The default password is "" (leave the field blank).
- If you have changed the password and can not remember it, you will need to reset the router to set the password back to "" (leave the field blank).

### 2. HOW DO I RESET MY DIR-600L ROUTER TO FACTORY DEFAULT SETTINGS?

- Ensure the router is powered on.
- Press and hold the reset button on the rear of the device for 20 seconds.  
Note: Resetting the router to factory default will erase the current configuration settings. To re-configure your settings, log into the router as outlined in question 1, then run the Setup Wizard.

### 3. HOW DO I ADD A NEW WIRELESS CLIENT OR PC IF I HAVE FORGOTTEN MY WIRELESS NETWORK NAME (SSID) OR WIRELESS ENCRYPTION KEY?

- Every PC that needs to connect to the router wirelessly, you will need to ensure you use the correct Wireless Network Name (SSID) and encryption key.
- Use the web based user interface (as described in question 1 above) to check or choose your wireless settings.
- Make sure you write down these settings so that you can enter them into each wirelessly connected PC. You will find a dedicated area on the back of this document, this important information for future use.

### 4. WHY CAN I NOT GET AN INTERNET CONNECTION?

- For ADSL users please contact your ISP to make sure the service has been enabled/connected by your ISP and that your ISP username and password is correct.

You can find software updates and user documentation on the D-Link website.
