How to connect my Apple iPhone/iPad to my wireless network?

How do I connect my Apple iPhone/iPad to my wireless network?

Note: The steps are shown for version 6.0.1 of the iOS

Step 1: Find and select the Settings icon on your iPhone, iPod Touch or iPad.

Step 2: Select Wi-Fi from the Settings menu.

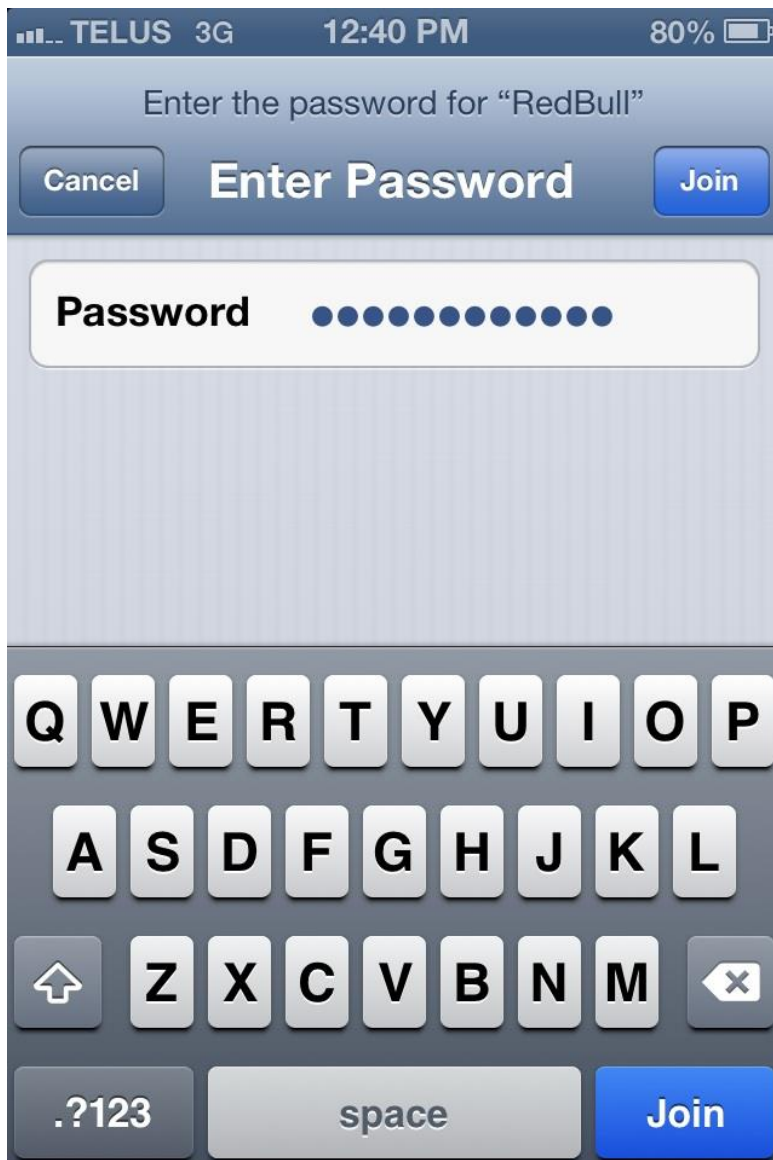

Step 3: If your Wi-Fi is currently set to Off, tap it to turn it on.

Step 4: Once your Wi-Fi is enabled you should see a list of available networks. Secure/Encrypted networks will have a padlock to the right of the name while "open" networks will not. Tap your network to join.

Step 5: If you choose a network that requires a password, you'll be prompted to enter it. Type in your password and select Join.

When connected, your Wi-Fi network name will be indicated in blue with a check mark beside it.
