

D-Link iSCSI IP SAN storage DSN-610/ DSN-640

**1GbE/ 10 GbE iSCSI to SATA / SAS
RAID controller**

Quick Installation Guide

Version 1.0 (April, 2011)

D-Link Corporation
<http://www.dlink.com>

Package contents

The package contains the following items:

1. RAID controller, DSN-610 or DSN-640 (x1)
2. GBIC transceiver (x1) and cable (x1) for DSN-640 only

Install battery backup module

Please follow procedure below to install battery backup module.

1. Make sure DSN-6000 series is power off.
2. Remove the cover of battery backup module.

3. Insert the battery backup module.

4. Tighten the screws up.
5. Power on DSN-6000 series

Install DSN-610/DSN-640 in DSN-6x10 subsystem

This following procedure applies to upgrading from DSN-6110 to DSN-6120 as well as from DSN-6410 to DSN-6420. Before you do this, please make sure that either DSN-6110 or DSN-6410 is properly installed according to the manuals.

Before you can insert the second controller to the IP SAN storage, the IP SAN storage system should be up and running and the maintenance\system page of the GUI should look like the following screenshot.. Note that the status is single as you have one controller only.

The screenshot shows the 'System information' tab of the DSN-6000 GUI. The left sidebar contains navigation options: System configuration, iSCSI configuration, Volume configuration, Enclosure management, Maintenance, Quick installation, and Volume creation wizard. The main content area displays a table of system details.

Item	Information
CPU type	XSC3-IOP8134x Family rev 9 (v5l)
System memory	ECC Unbuffered DDR-II 2048MB
Firmware version	DSN-6000 2.0.1 (build 201102111500)
Serial number	14D64D868E40 (Controller 1 : 500137800390AD98)
Backplane ID	DSN6000
JBOD serial no.	No JBOD connected
JBOD status	No JBOD connected
Status	Single
Replication	Not activated.

You can also verify controller mode in "Maintenance\Upgrade". Check out the "Controller Mode" section.

The screenshot shows the 'Upgrade' tab of the DSN-6000 GUI. The left sidebar is the same as in the previous screenshot. The main content area is divided into three sections: RAID Controller/System(s), JBOD Controller/System(s), and Controller Mode. The 'Controller Mode' section is highlighted with a yellow box.

Please follow the steps below to upgrade to dual controller mode.

Step 1

Go to "Maintenance\System". Copy the IP SAN storage serial number.

Item	Information
CPU type	XSC3-IOP8134x Family rev 9 (v5l)
System memory	ECC Unbuffered DDR-II 2048MB
Firmware version	DSN-6000 2.0.1 (build 201102111500)
Serial number	14D64D868E40 (Controller 1 : 500137800390AD98)
Backplane ID	DSN6000
JBOD serial no.	No JBOD connected
JBOD status	No JBOD connected
Status	Single
Replication	Not activated.

Step 2

Go to "Maintenance\Upgrade" and paste the serial number into "Controller Mode" section. Select "Dual" as operation mode.

? Sure to shutdown?

確定 取消

Step 4

Power off DSN-6110 or DSN-6410 by switching power button. Remove the empty cage by loosening the screws and ejection levers.

Step 5

Insert the second controller to the IP SAN storage and secure in place, then power on the system.

The IP SAN storage should now appear in dual controller mode as either DSN-6120 or DSN-6420.

Go to "Maintenance\System information" to check that the IP SAN storage is running in dual controller mode now.
