

DWC-2000 Authorize.net Payment Gateway Account Configuration Steps

Go to <https://developer.authorize.net/sandbox/>

Create a New Sandbox Account by giving all the required fields

The screenshot shows a web browser window with the URL <https://developer.authorize.net/sandbox/>. The page contains a form for creating a new sandbox account. The form fields are as follows:

- First Name:** Text input field with a red asterisk indicating it is a required field.
- Last Name:** Text input field with a red asterisk indicating it is a required field.
- Country:** Dropdown menu with "-- Please Select --" and a red asterisk indicating it is a required field.
- Email Address:** Text input field with a red asterisk indicating it is a required field.
- Developer Type:** Dropdown menu with "-- Please Select --" and a red asterisk indicating it is a required field.
- Job Level:** Dropdown menu with "-- Please Select --" and a red asterisk indicating it is a required field.
- Sandbox Company Name:** Text input field with a red asterisk indicating it is a required field.
- Sandbox Currency:** Dropdown menu with "-- Please Select --" and a red asterisk indicating it is a required field.
- Create a Login ID:** Text input field with a red asterisk indicating it is a required field. Below this field, there is a note: "Between 8-20 characters, no symbols, must include letters and numbers."
- Password:** Text input field (partially visible at the bottom).

A red asterisk and the text "* Required field" are positioned at the top right of the form area.

...solutions developed by MasterCard and American Express, properly provide a solution that can simplify the checkout process, help reduce your fraud risk, and expand your business and customer payment options.

PRODUCTS & SERVICES

eCheck.Net®
Offer your customers an additional payment option. eCheck.Net enables you to accept and process electronic check payments directly from your website, Virtual Terminal or Batch Upload.

Automated Recurring Billing™ (ARB)
ARB enables you to create "subscriptions" for recurring billings. Simply enter the customer's payment information, billing amount, and a specific billing interval and duration. ARB automatically generates the subsequent recurring transactions for you!

Advanced Fraud Detection Suite™ (AFDS)
The Advanced Fraud Detection Suite safeguards your account using powerful transaction filters and IP address tools to identify and prevent suspicious transactions. Flexible settings allow you to customize the transaction filters to meet your unique business needs.

Customer Information Manager (CIM)
CIM allows you to store your customers' sensitive payment information on our secure servers, simplifying payments for returning customers and recurring transactions. It can also help you comply with the Payment Card Industry (PCI) Data Security Standard, since customer data is no longer stored locally.

THIRD-PARTY SOLUTION

Merchant Toolbox
The Merchant Toolbox is designed to provide you with best-of-class solutions to help you better manage key areas of your business. Categories include marketing, security, accounting and business productivity. Many vendors in the Merchant Toolbox offer special discounts or other incentives exclusively to Authorize.Net merchants. Whether you're looking for help marketing your company, identifying and preventing fraudulent transactions or updating your bookkeeping, the Merchant Toolbox

Test Mode [Help](#)

Test Mode allows you to submit test transactions to the payment gateway. Transactions that are submitted while Test Mode is ON are NOT actually processed. To place your account in Test Mode, click "Turn Test ON." To turn Test Mode OFF in order to process live transactions, click "Turn Test OFF." For more information on how to use Test Mode, please refer to [Reference & User Guides](#).

Note: Transactions that are submitted for capture or void via the Unsettled Transactions menu while your account is in Test Mode are also NOT actually processed. Please be sure to verify that Test Mode is OFF when you wish to submit real transactions.

This account is currently in LIVE MODE.

Go to Security Settings --> General Security Settings --> MD5-Hash and generate a "Hash Value"
