

**Existing Network > New Network**

**QUICK INSTALL GUIDE**

**MODEL: DGL-4100**

**Vertical Stands**

Vertical stacking stands are provided so that you can place your D-Link<sup>®</sup> Gaming Router in a vertical position. Positioning the unit vertically saves space and allows the unit to remain cooler.

To attach the vertical stands, simply slide the vertical stands into the slotted grooves on the top and bottom panels of the D-Link<sup>®</sup> Gaming Router.

**Rubber Feet**

Rubber Feet are provided to allow proper ventilation when the D-Link<sup>®</sup> Gaming Router is placed horizontally or stacked upon other D-Link<sup>®</sup> stackable products.

To attach the rubber feet, simply press the rubber feet into the four corners on the bottom panel of the D-Link<sup>®</sup> Gaming Router.

**Hardware Installation**

**TCP/IP Settings**

IP Address:

Subnet Mask:

Default Gateway:

Secondary DNS:

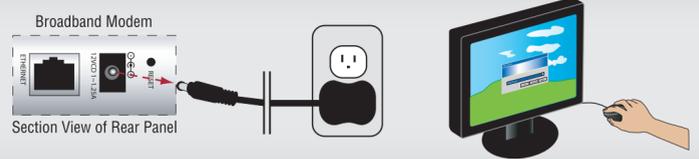

**PPPoE Settings**

Name:

Password:

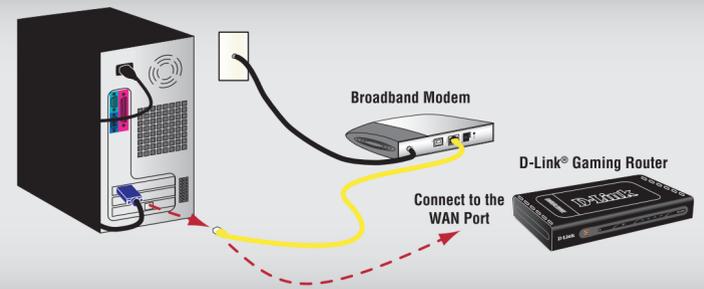

**1** Unplug the power from your broadband modem and shut down your computer.

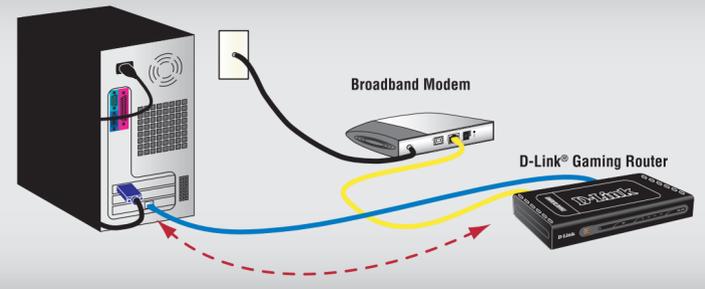

**2** Disconnect the Ethernet cable connected from your computer to your broadband modem. Leave the end connected to your broadband modem attached.

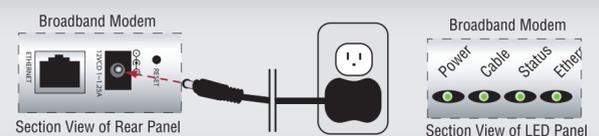

**3** Connect the end of the Ethernet cable removed from your computer to the WAN port on the router.

**4** Connect the provided Ethernet cable from a numbered port on the router to your computer.

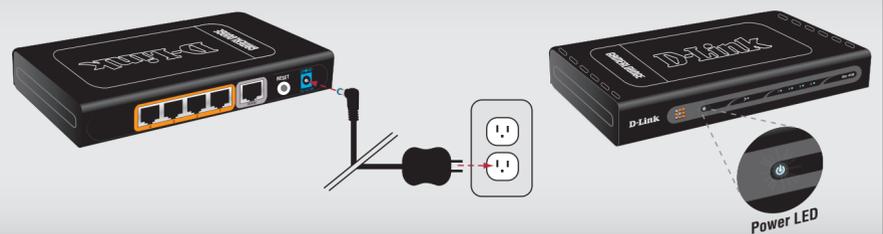

**5** Plug the power back into your broadband modem and wait for the broadband modem to synchronize to the network (refer to the Modem manual for information on this).

**6** Plug the power adapter (provided with the router) into the router, then connect the other end to a power outlet and verify that the POWER LED on the router is on.

*Note: If the Power LED is not lit, verify that the power adapter is properly connected to the D-Link<sup>®</sup> Gaming Router and to a working power outlet.*

**7** Power on your computer.

**8** Verify that the WAN and LAN port (corresponding to where the computer was connected in step 4) LEDs are on.

*Note: If the WAN LED is not lit, check the connection of the Ethernet cable from the Broadband modem to the WAN port of the D-Link<sup>®</sup> Gaming Router as detailed in steps 2-3. If the LAN LED is not lit, check the connection of the Ethernet cable as detailed in step 4.*

**9** Launch your web browser and type in a web address such as <http://games.dlink.com> to verify that you have an Internet connection.

Address

**10** If a web address is not accessible, enter <http://192.168.0.1> in your web browser address bar. Once the main screen appears, press the button labeled **Internet Connection Setup Wizard** and proceed through the wizard.

Address

*For additional details on the Internet Connection Setup Wizard, please refer to the User Manual on the CD-ROM*

**Support**  
D-Link's website contains the latest user documentation and software updates for D-Link<sup>®</sup> products. D-Link<sup>®</sup> provides free technical support for customers within the United States and Canada for the duration of the product's warranty period. Please refer to the user manual on the CD-ROM and the Help section in the Gaming Router's web-based management interface for support. U.S. and Canadian customers can contact D-Link<sup>®</sup> Technical Support through our website or by phone.
